2011 Census: Age and Sex Counts

The 2011 Census Day was May 9, 2011. Today, Statistics Canada released its second set of data from this Census, on age and sex.

Key Points:

- In 2011 Toronto's population stood at 2,615,060, a 4.5% increase over the 2006 Census. This figure, as well as the age and sex figures in this Backgrounder, are not adjusted for undercoverage which is discussed below in the Frequently Asked Questions.
- Toronto's population is 48.0% male and 52.0% female (1,255,585 men and 1,359,475 women).
- There are 92 men for every 100 women. This is down from 93 men in 2006.
- Women continue to outlive men, but the difference in longevity is decreasing. Since 2006, women age 65+ have decreased in their share of the population 65+, from 57.7% to 57.3%. Women age 75+ have decreased in their share of the population 75+, from 60.6% to 59.9%.
- The ratio of males under twenty (10.8% of the population) to females under twenty (10.3% of the population) remains stable.

Age

- In 2011, Toronto's median age was 39.2 years, slightly higher than the 2006 median age of 38.4, but 1.4 years below the national median of 40.6 years. (Median age is the point in the age distribution where exactly one-half of the population is older, and the other half is younger.)
- The age structure of Toronto's population is continuing to shift. In the five years since the 2006 Census, Toronto has continued to gain older adults; the share of adults 75+ has increased from 7.0% to 7.2%. At the same time, the number of children 0-4 has also increased, by 5,530 or 4.1%.
- The two fastest growing age groups between 2006 and 2011 were aged 60-64 years and 85+ years. Those aged 60-64 grew by 28.8% (from 109,465 to 140,965) while the 85+ grew by 27.5% (from 43,100 to 54,965).
- Despite the fact that the population grew between 2006 and 2011, those aged 5-14 and 35-44 declined.

- The first wave of Baby Boomers (the population born between 1946 and 1961) turned 65 in 2011 and represent 18.9% of Toronto's population, down from 20.4% in 2006. The cohort decreased by 15,750 in the past five years.
- Seniors (65 years of age and older) grew by 57, 595 persons, 13.4% to 14.4% of Toronto's total population between 1996 and 2011.
- Did the population of seniors grow as projected? According to projections prepared by City Planning, between 1996 and 2011, the number of seniors was expected to grow by 39,315 persons or by 12.3%. Census data show that the population change among Toronto seniors 65+, is 18.0% and above our estimates. The senior cohort is expected to increase strongly in the coming years. Between 2011 and 2031, our projections indicate that the senior population will increase by one-third.
- As a percentage of the total population:
 - o Pre-school children (0-4 years) remained at 5.4% between 2006 and 2011;
 - o School age children (5-14 years) decreased from 11.0% in 2006 to 10% in 2011;
 - o Youth (15-24 years) increased slightly from 12.7% in 2006 to 12.8% in 2011;
 - o The young working-age population (25-44 years) fell from 32.0% in 2006 to 30.6% in 2011;
 - o The older working-age population (45-64 years) increased from 24.8% in 2006 to 26.9% in 2011;
 - o People of retirement age (65 years and up) slightly increased from 14.1% in 2006 to 14.4% in 2011.

Toronto in the Greater Toronto Area

- In 2011, Toronto accounted for 43% of the GTA population, a decrease from 45% in 2006. Toronto has 38% of all GTA children 0-14, 41% of GTA youth 15-24, 44% of GTA working age population 25-64 and 49% of GTA seniors 65+.
- Toronto has a higher proportion of seniors 65+ (14.4%) than the GTA Regions (11.5%), and a lower proportion of younger children 0-14 (15.3%) than the GTA Regions (19.1%). In 2011, the City was home to 400,860 children, while 658,540 resided in the rest of the GTA.
- Population aged 45-64 years account for 26.9% of the population in Toronto versus 28.1% in the rest of the GTA.

- Toronto has the highest proportion of the population in the 25-44 age group in the GTA at 30.6%, down from 32.0% in 2006. This demonstrates that Toronto continues to attract people throughout the GTA and the world by providing a range of employment, economic and educational opportunities. This age group also contributes significantly to subsequent population growth by bearing and raising children.
- 12.8% of Toronto's population is between 15-24 years a lower share compared to the rest of the GTA at 14.0%.

Maps of Age Groups in Toronto

• Maps are attached which show the distribution of children, youth, working age adults and seniors across the city and the GTA.

FREQUENTLY ASKED QUESTIONS:

Why is meant by the term "undercoveage"?

Statistics Canada's numbers upon release and as reported above do not account for undercoverage. Although Statistics Canada makes a great effort to count every person, in each Census a notable number of people are left out for a variety of reasons. For example, people may be traveling, some dwellings are hard to find, and some people simply refuse to participate. Statistics Canada takes this into account and estimates an 'undercoverage' rate for the urban region (CMA) every Census, but not for the City. Based on the *Annual Demographic Estimates*, Cat. No. 91-214-XWE released March 7, 2012, the implied net undercoverage rate for the City of Toronto in 2011 is estimated to be 4.69%.

Net undercoverage also varies by age and sex and is highest for those between 15 and 44 years of age. In 2006, net undercoverage peaked at 9.91% for males and 6.08% for females 24-34 years of age, per the *2006 Census Technical Report: Coverage*, Cat. No. 92-567-X, released March 2010.

How do the changes in the 2011 Census methodology affect this release?

There have been changes in the way information has been collected for portions of the 2011 Census. This will impact the extent to which comparisons can be made with previous Census periods on some Census variables. The information previously collected by the long-form Census questionnaire was collected in 2011 as part of the new voluntary National Household Survey (NHS). The numbers in this particular release are from questions that are part of both the 2006 and 2011 Censuses and can be compared.

Where are other data such as income, education, and ethnicity?

The City of Toronto will be preparing Backgrounders coinciding with each release of data from the 2011 Census and the National Household Survey.

toronto.ca Call 311

The 2011 Census release schedule is as follows:

- Population and Dwellings February 8, 2012 (Backgrounder: http://www.toronto.ca/demographics/pdf/2011-census-backgrounder.pdf)
- Families, Households and Marital Status September 19, 2012
- Structural Type of Dwelling and Collectives September 19, 2012
- Language October 24, 2012

The results of the National Household Survey will be released in 2013:

- Immigration, Citizenship, Language, Ethnic Origin, Visible Minorities, Religion, Aboriginal Peoples – May 8, 2013
- Labour, Education, Place of Work, Commuting, Mobility, Migration, Language of Work June 26, 2013
- Income, Earnings, Housing and Shelter Costs August 14, 2013

When are the City's Ward Profiles and Neighbourhood Profiles being released?

The Ward Profiles are based on a series of custom tabulations from what are now the Census and the NHS. City Planning staff will update the Ward Profiles when they can obtain the necessary custom tabulations from Statistics Canada based on 2011 data from both Surveys, beginning in late 2013. The current Ward Profiles can be found at: http://app.toronto.ca/wards/isp/wards.isp

The Neighbourhood Profiles will be released through the Social Development Finance & Administration Division a few weeks after each Census and NHS release. These profiles are released sooner than the Ward Profiles because the data are not based on custom tabulations. The current Neighbourhood Profiles can be found at: http://www.toronto.ca/demographics/neighbourhoods.htm
