

## **What are community services and facilities (CS&F)?**

- Community facilities are non-profit, publicly accessible facilities and places such as libraries, child care and recreation centres where City divisions, school boards and community agencies deliver their programs and services.

## **We are studying the community services and facilities in the area:**

- to review the services and facilities currently serving the area and the particular needs of the community; and
- to determine what services and facilities are needed to support a growing population.

## Statistics in the Community Services and Facilities (CS&F) Study Area

### Demographics

- Just under **26,000 people** live in the CSF study area
- **Youth and young adults** (15-29 years) account for **27%** of the population
- Approximately **60%**, or **15,665**, residents were **born outside of Canada**
- Nearly **50%** of households have more than 3 people living at home and **14%** of households have 6 or more people
- Over **72% of families have children** and **28% are lone-parent families**
- Growing household incomes remain well below Toronto average (**\$55,270 vs. \$87,038**) with an unemployment rate of **11.5%**

*All data from the 2016 Census*

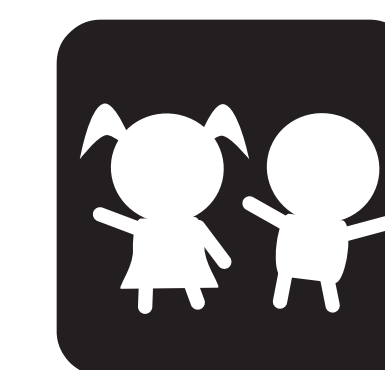

### Community Facilities

Libraries - York Woods District Library  
hosted 1,275 programs in 2016

Recreation centres - Grandravine Community Recreation Centre; and Toronto Track and Field Centre

**813** licensed child care spaces

Outdoor pool at Grandravine Community Recreation Centre

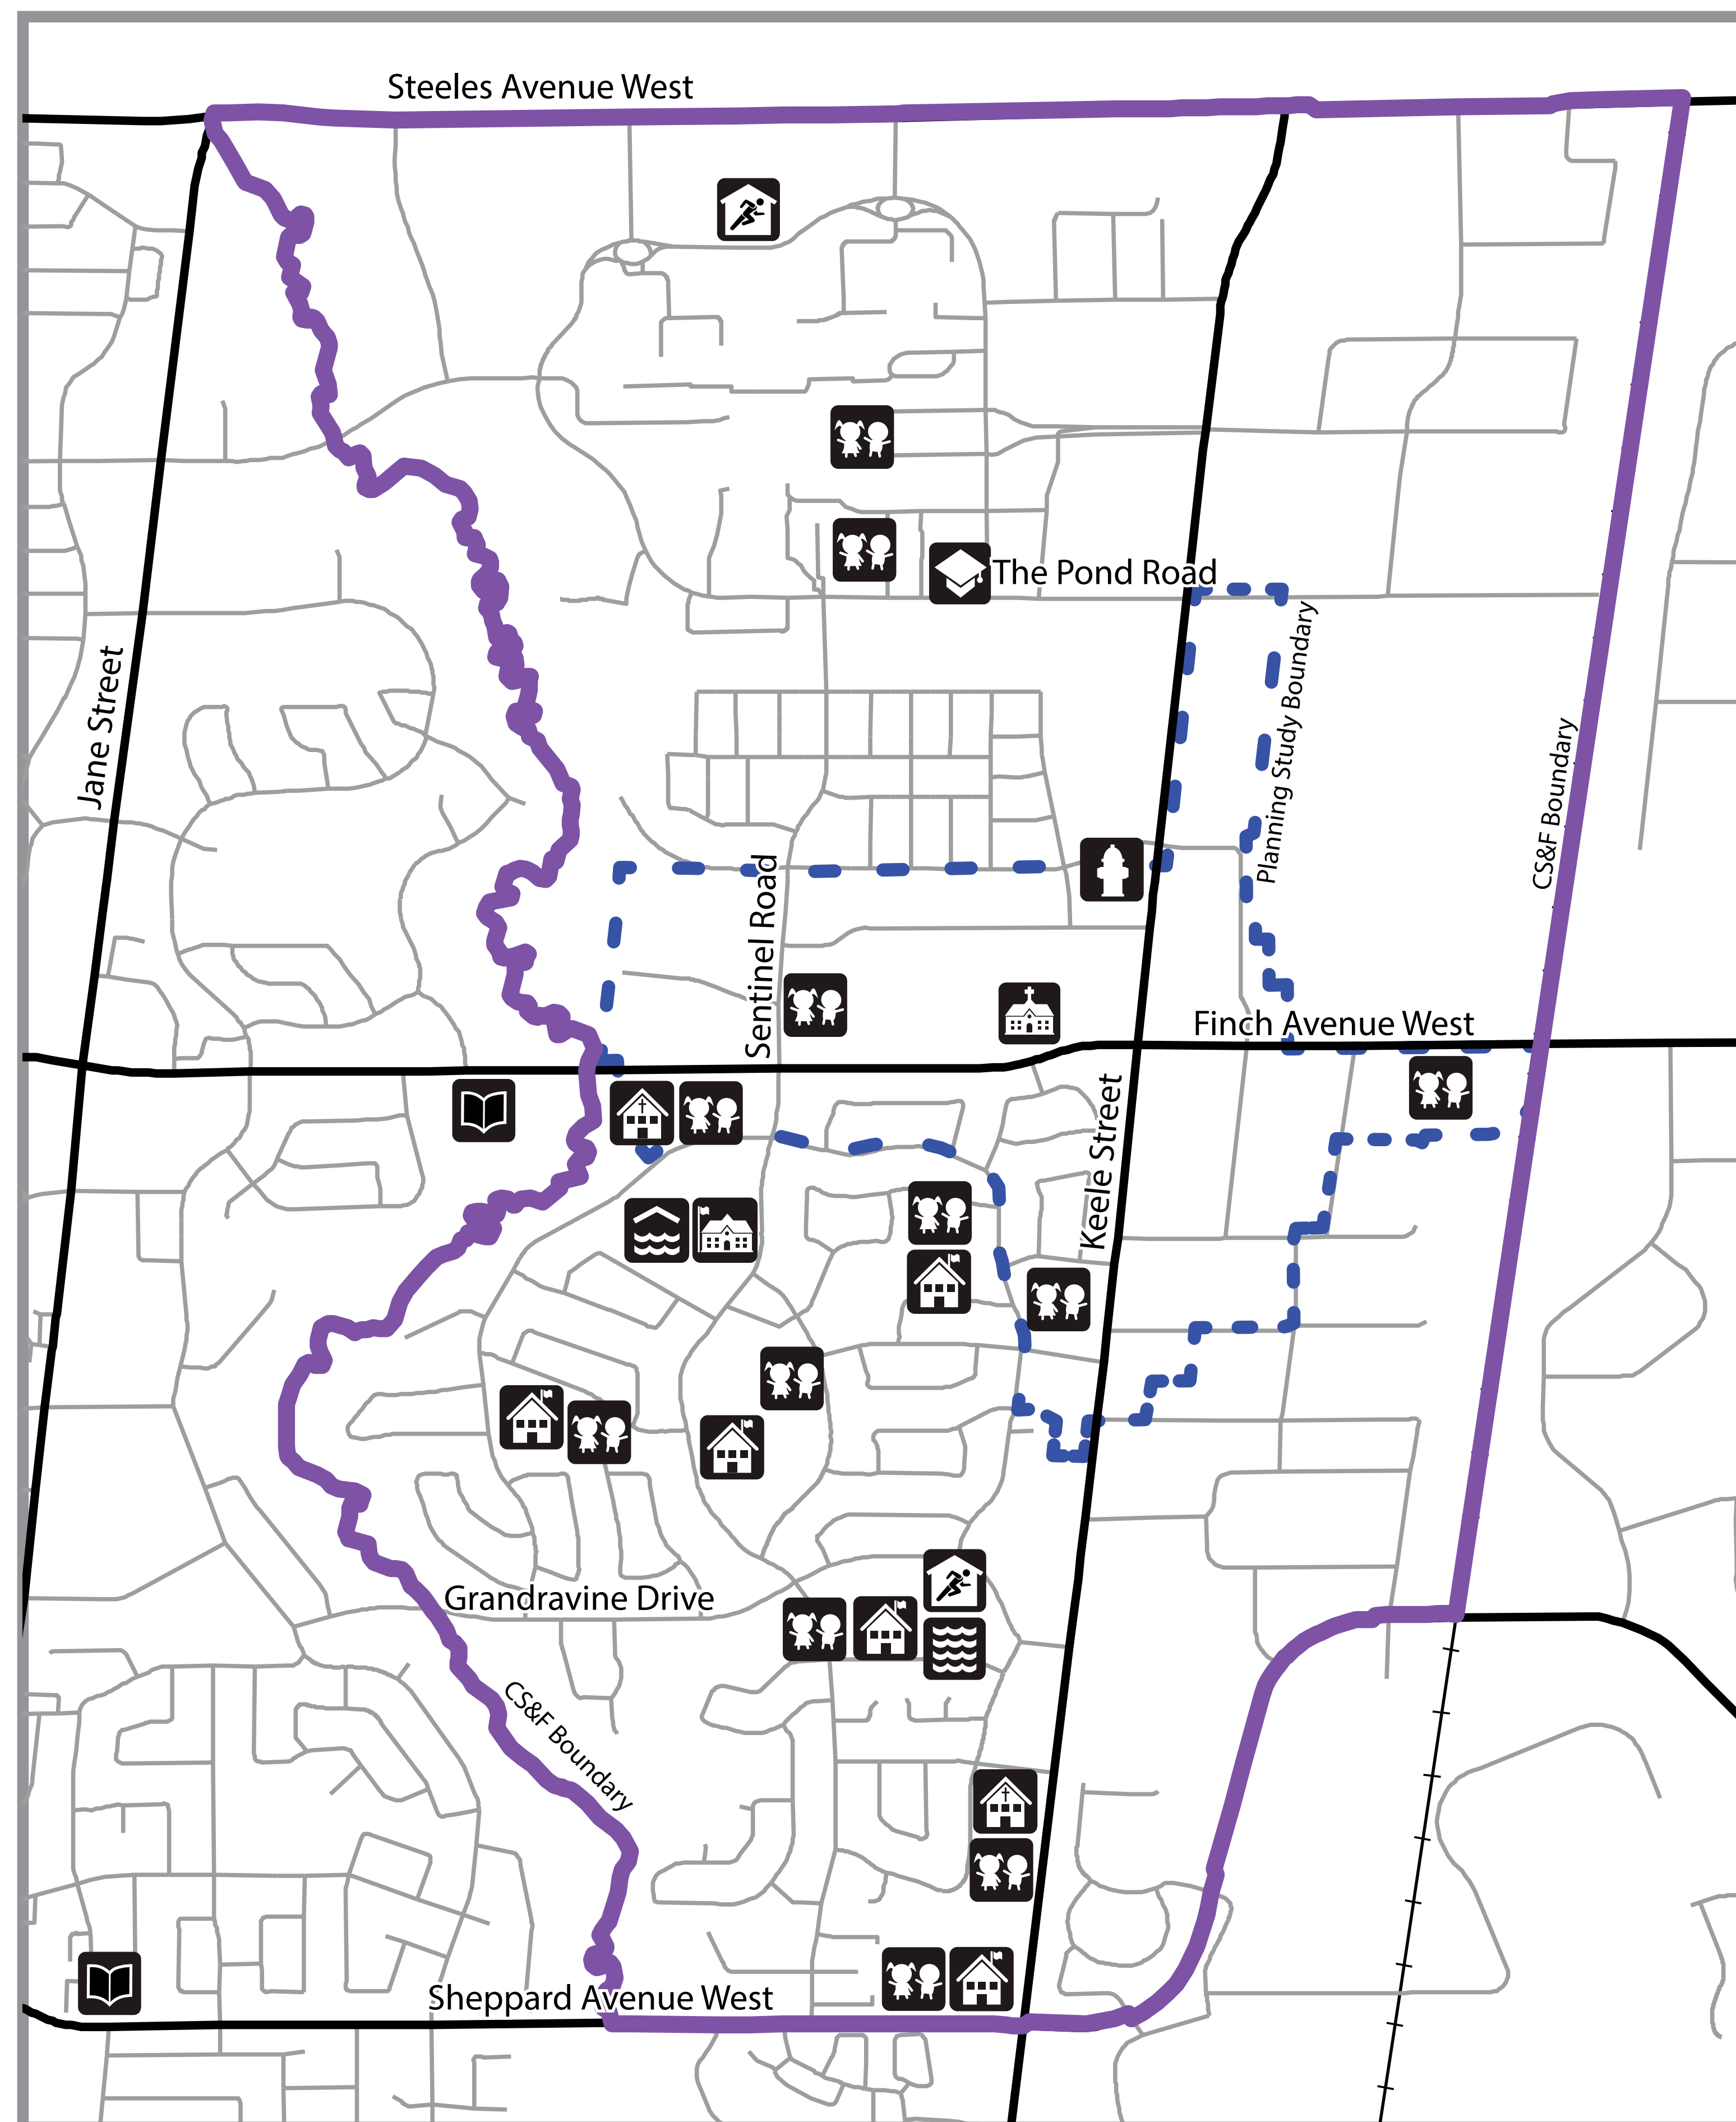

Indoor pool at CW Jefferys Collegiate Institute

3 TCDSB Schools (2 elementary, 1 secondary)  
7 TDSB Schools (6 elementary, 1 secondary)

The CS&F Study Area is larger than the Planning Study Area to recognize that services and facilities serve a range of geographies and that populations depend on a variety of delivery models.

## Help us learn about Community Services & Facilities (CS&F) in the community.

- What CS&F do you use?
- Which CS&F work well?
- Can any facilities be improved? How?
- Are there additional CS&F needed?
