

Toronto Public Health

Toronto Public Health reduces health inequities and improves the health of the whole population

Public Health Foundations

Purpose:
To ensure effective public health programs responding to the health needs of the population.

Chronic Diseases & Injuries

Purpose:
To reduce the burden of preventable chronic diseases and injuries of public health importance and to reduce the frequency and severity of preventable injury and of substance misuse.

Family Health

Purpose:
To enable individuals and families to achieve optimal preconception health, experience a healthy pregnancy, have the healthiest newborn(s) possible, and be prepared for parenthood and all children to attain and sustain optimal health and development potential.

Infectious Diseases

Purpose:
To prevent and reduce the burden of infectious diseases of public health importance.

Environmental Health

Purpose:
To prevent and reduce the burden of illness from health hazards in the physical environment

Emergency Preparedness

Purpose:
To ensure a consistent and effective response to public health emergencies and emergencies with public health impacts
