

- Conduit to be positioned to minimize the likely hood of damage from on-coming traffic and sidewalk snow clearing equipment.
 Install PVC conduit system to obtain a neat and straight installation and leaving adequate climbing space on wood poles.
- 2. On concrete poles mount conduits using 16mm stainless steel strapping and buckles.
 On wood poles mount conduits using PVC coated steel or galvanized pipe straps with 6 x 38 mm lag bolts.
 Install strapping every 1.0 m, unless otherwise specified.
- 3. Handwell may be required for distances greater than 3.0 m, unless otherwise specified.
- 4. For orientation and location of poles and equipment refer to layout drawings. All dimensions are in millimetres or metres unless otherwise shown.
