

Municipal Consent Requirements  
for the Installation of Services  
within the City of Toronto Streets

## **APPENDIX H MATERIAL SPECIFICATIONS**

### **Unshrinkable Fill**

All Unshrinkable fill is to be obtained from City approved suppliers as shown on the attached list. An applicant will be required to provide the City with quality control testing data on the Unshrinkable backfill that it uses.

City specifications for Unshrinkable fill are attached.

### **Asphalt Concrete**

HL3 hot-mix asphaltic concrete as per Toronto Transportation, Construction Specifications for Hot Laid Asphalt concrete, MT 3.00, April 1998.

**UNDER NO CIRCUMSTANCES WILL TEMPORARY CUT REPAIRS BE ACCEPTED IF COLD-MIX ASPHALT HAS BEEN USED.**

### **Equipment**

1. Vibratory Roller or Propane heated Roller (cold weather) – for compacting HL3 asphaltic concrete: and
2. Insulated Asphalt Hot Box – for transporting HL3 asphaltic concrete in cold weather.
