PRIMARY AND SECONDARY NODE TREATMENTS

TRAIL CALMING STRATEGIES PRECEDENT IMAGES

Paving Design

- "Buffer Zone" separates trail users
- "Approach Zone" banded paving alerts trail users of approaching shared space
- Enhanced paving at intersections/nodes defines shared space

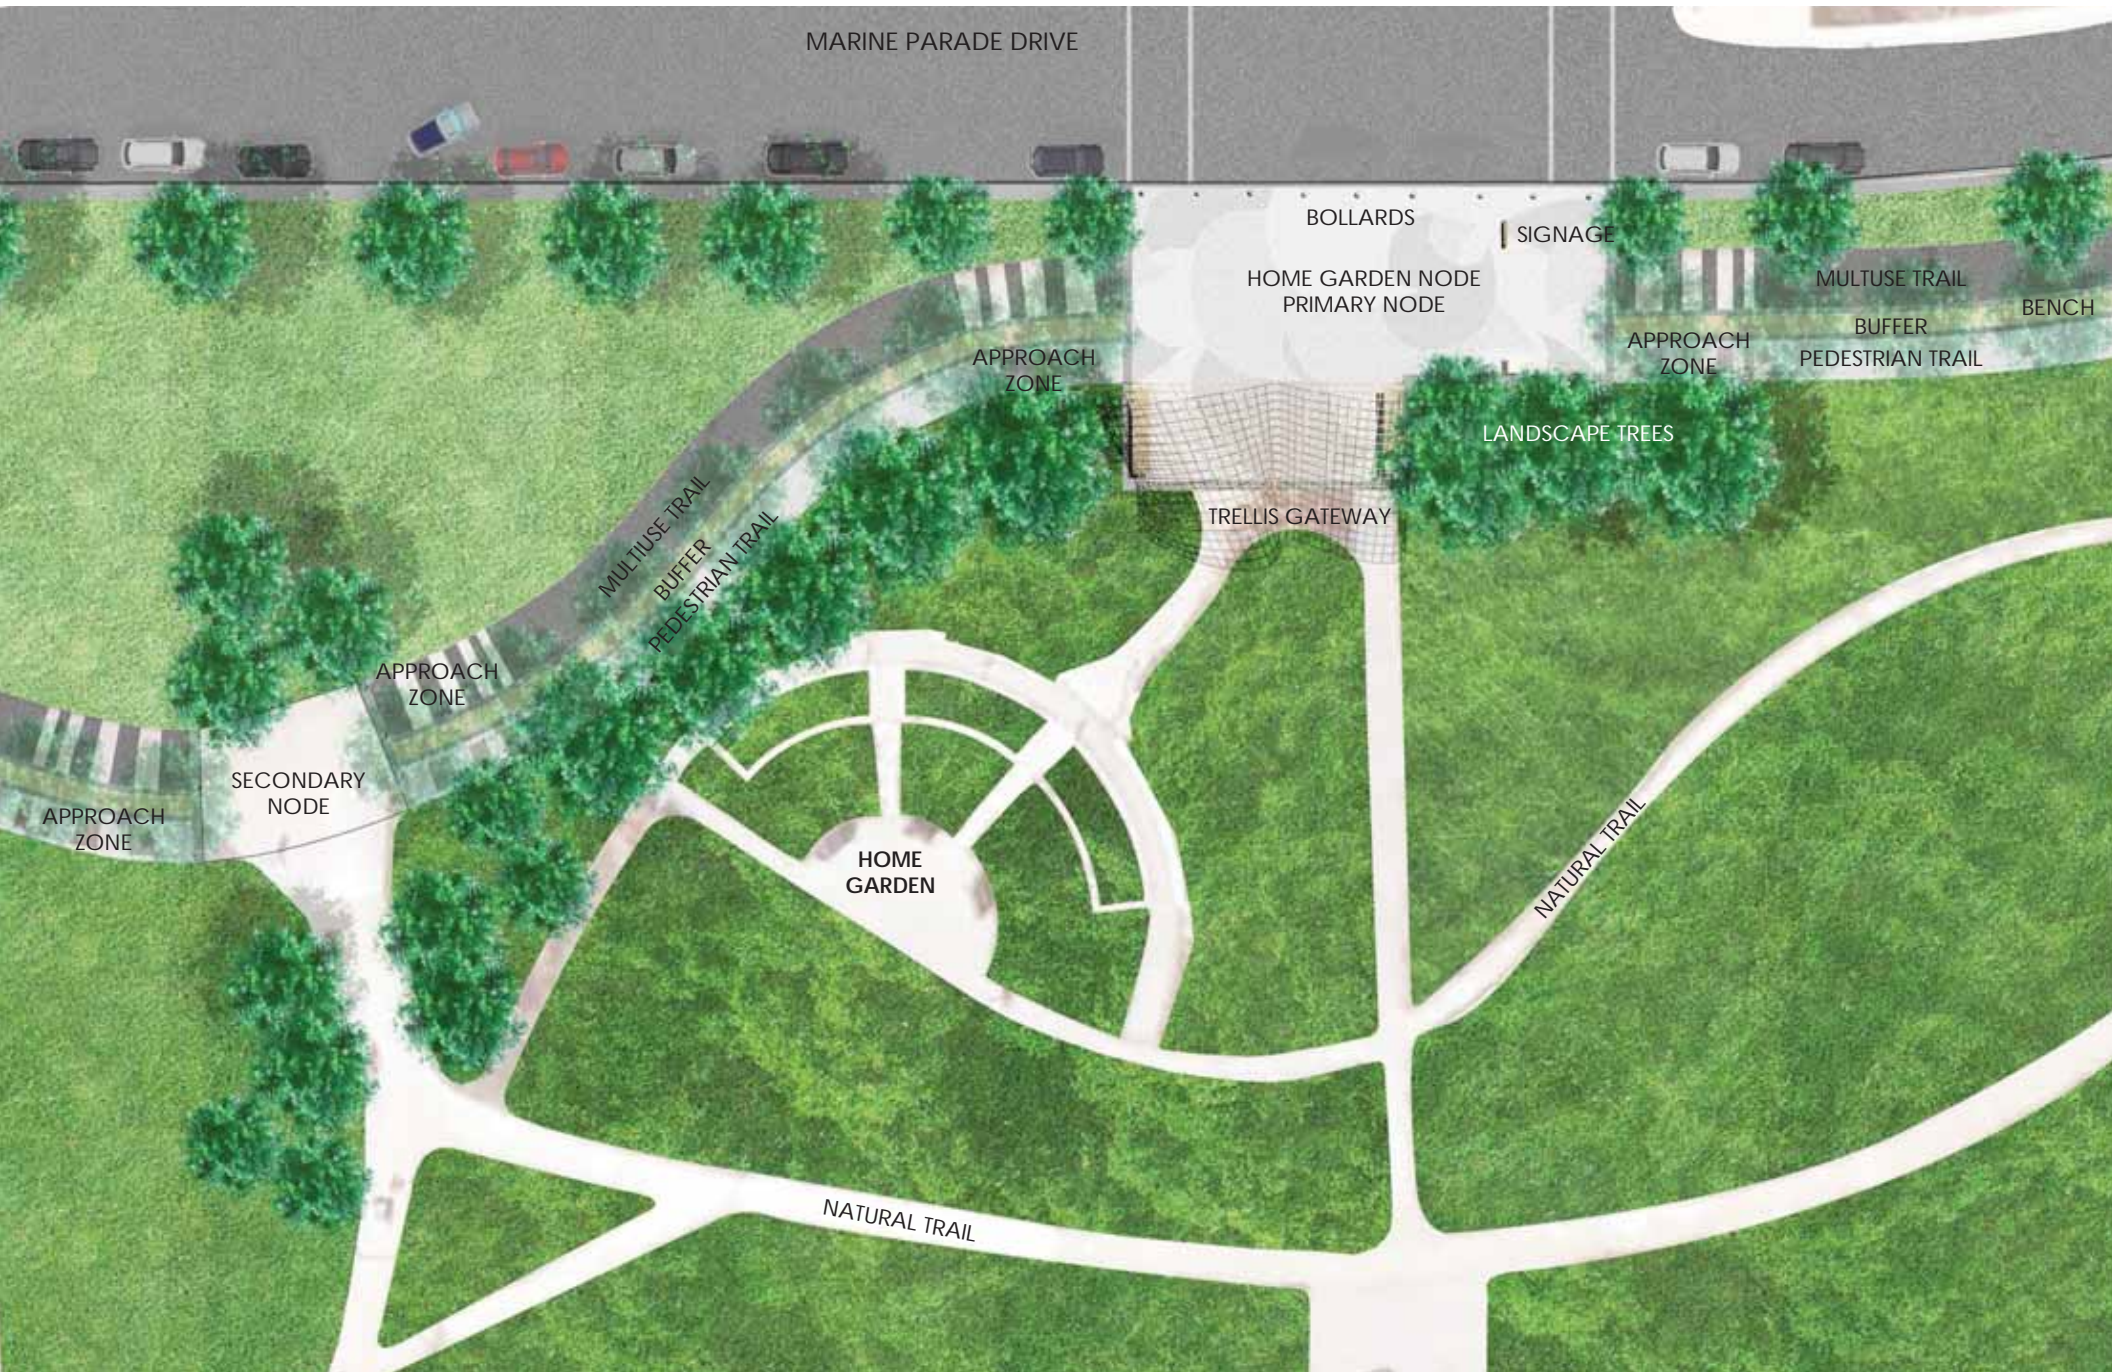

Furnishings

- Street furniture creates space to slow trail users
- Benches invite trail users to rest and relax

Trees

- Trees signal park entrances
- In the 'Buffer Zone' trees help to separate uses
- Trees provide shade, human scale and buffer noise from vehicular traffic
