

# Toronto 2017 BUDGET

## CAPITAL PROGRAM SUMMARY

## CONTENTS

### Overview

1: 10-Year Capital Plan [5](#)

2: Issues for Discussion [21](#)

### Appendices:

1. 2016 Performance [28](#)

2. 10-Year Capital Plan Summary [30](#)

3. 2017 Capital Budget; 2018-2026 Capital Plan [31](#)

4. 2017 Cash Flow & Future Year Commitments [32](#)

5. 2017 Capital Projects with Financing Detail [33](#)

6. 2017 Reserve / Reserve Fund Review [34](#)

## Toronto Water

### 2017 – 2026 CAPITAL BUDGET AND PLAN OVERVIEW

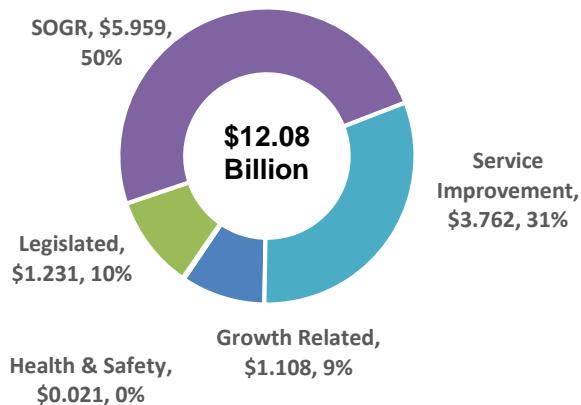

Toronto Water is responsible for water treatment and supply; wastewater collection and treatment; and stormwater management across the City. It services 3.6 million residents and businesses in Toronto and portions of York and Peel Region.

Toronto Water has stewardship of an inventory of capital assets valued at \$28.415 billion. Toronto Water maintains two categories of capital assets, linear infrastructure, such as distribution (5,551 km) and transmission (550 km) watermains, sanitary (3,730 km), combined (1,411 km) and storm (4,981 km) sewers; and facilities/plant assets such as water filtration (4) and waste water treatment plants (4), water (18) and wastewater pumping stations (87), reservoirs, storage and detention tanks.

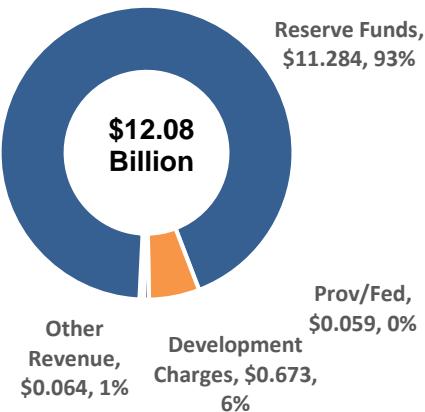

State of Good Repair (SOGR) projects remain a priority given the significant backlog in infrastructure renewal, with considerable funding also included in the 2017-2026 Capital Budget and Plan for investments in Basement Flooding Protection and Wet Weather Flow Master Plan projects.

## Capital Spending and Financing

### 2017 – 2026 Capital Budget and Plan By Expenditures Category

### By Funding Source

## Where does the money go?

The 2017–2026 Capital Budget and Plan totalling \$12.080 billion provides funding for:

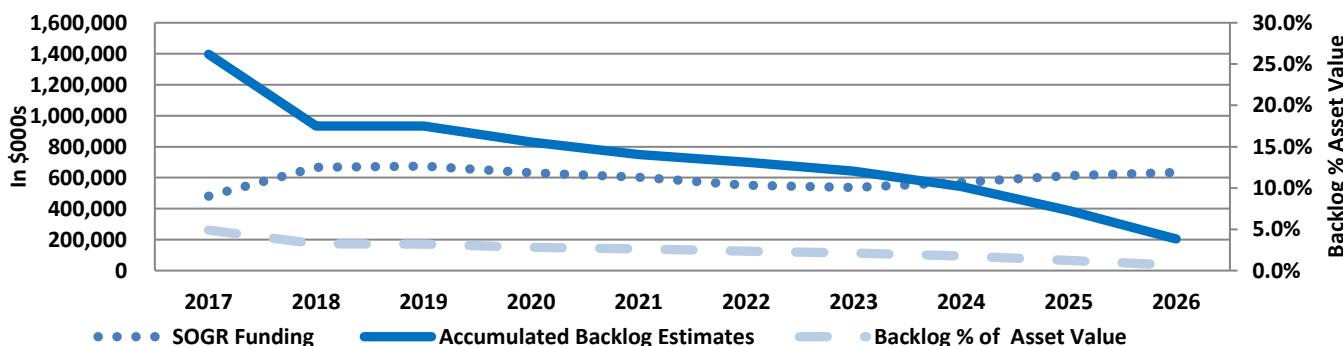

- Health and Safety, Legislated and State of Good Repair (SOGR) projects are the primary focus of the 10-Year Capital Plan. Approximately \$7.210 billion or 60% of the total funding is allocated for on-going state of good repair projects (including health and safety and legislated projects) for linear infrastructure and treatment facilities.
- Service Improvement projects account for \$3.762 billion or 31% of the total funding, and include the Basement Flooding Protection Program to reduce the risk of future flooding from extreme storm events (\$1.527 billion) and Wet Weather Flow Master Plan to improve water quality and city's environments (\$1.316 billion).
- Growth related projects at \$1.109 billion or 9% of the total funding will provide the necessary servicing capacity for projected population growth. The largest projects are the Trunk Watermain Expansion and Upgrade projects (\$0.224 billion) and New Service Connections (\$0.358 billion).

## Where does the money come from?

- Toronto Water's Capital Financing Reserves which account for approximately 93% of financing sources or \$11.284 billion are the main source of funding for the 10-Year Capital Plan.
- Development charges for growth related projects, capital cost sharing with York Region, and Provincial/Federal grants represent the remaining 7% or \$0.796 billion of the total capital financing.

## State of Good Repair Backlog

The 10-Year Capital Plan includes cash flow funding of \$5.959 billion for State of Good Repair to address the backlog. The SOGR backlog of \$1.552 billion or 5.5% of asset replacement value in 2016 will be effectively eliminated by the end of 2026.

## Our Key Issues & Priority Actions

- **Stormwater Management and Resiliency** - Considerable investment is required to manage basement flooding and other stormwater issues across the City which are caused by more frequent severe storms. Funding for stormwater management is projected to grow from 18% of the total capital program in 2016 to 40% in 2026.
  - ✓ The 10-Year Capital Plan includes an added \$393.274 million for Wet Weather Flow projects that will improve the City's resiliency to extreme weather events.
- **Strict Regulatory Control and Oversight** – The water and wastewater industry continues to experience increased legislative and regulatory reform.
  - ✓ The 10-Year Capital Plan includes funding of \$596.360 million for the design and construction of a new effluent disinfection system at the Ashbridges Bay Water Treatment Plant to meet the most recent federal regulations.
- **Aging Infrastructure** – Aging infrastructure that has an accumulated state of good repair backlog estimated at \$1.552 billion that, particularly for linear infrastructure, can result in service interruption.
  - ✓ The 10-Year Capital Plan funding of \$5.959 billion for SOGR will effectively eliminate backlog by 2026.
- **Long-term Financial Sustainability** - The 10-Year Capital Plan relies primarily on successive water rate increases of 5% in years 2017 and 2018 and 3% thereafter.
  - ✓ In addition to recommended water rate increases, a report will be submitted to Executive Committee in the spring of 2017 formulating a revenue neutral stormwater management funding model premised on a dedicated stormwater charge to support Toronto Water's financial sustainability for stormwater management projects.

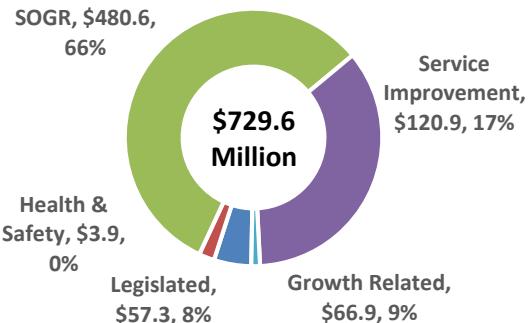

## 2017 Capital Budget Highlights

The 2017 Capital Budget for Toronto Water of \$729.565 million, excluding carry forward funding, will:

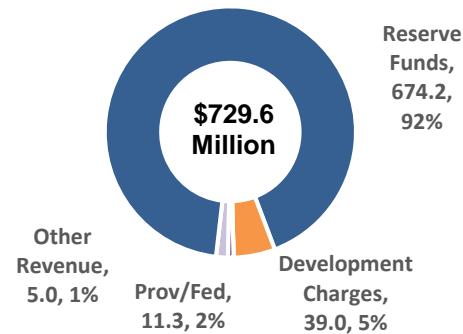

- Deliver continued state of good repair projects to address infrastructure renewal such as Watermain Replacement and Rehabilitation (\$171.021 million), Sewer System Replacement and Rehabilitation (\$77.347 million) and Trunk Sewer and Pumping Station projects (\$24.883 million).
- Implement Basement Flooding Protection projects (\$56.817 million), implement the Wet Weather Flow Master Plan (\$16.621 million), and Erosion Control projects (\$5.811 million).
- Continue to provide funding for the TRCA erosion control projects including critical erosion sites (\$12.775 million).

## 2017 Capital Budget By Project Category

## By Funding Source

## Council Approved Budget

City Council approved the following recommendations:

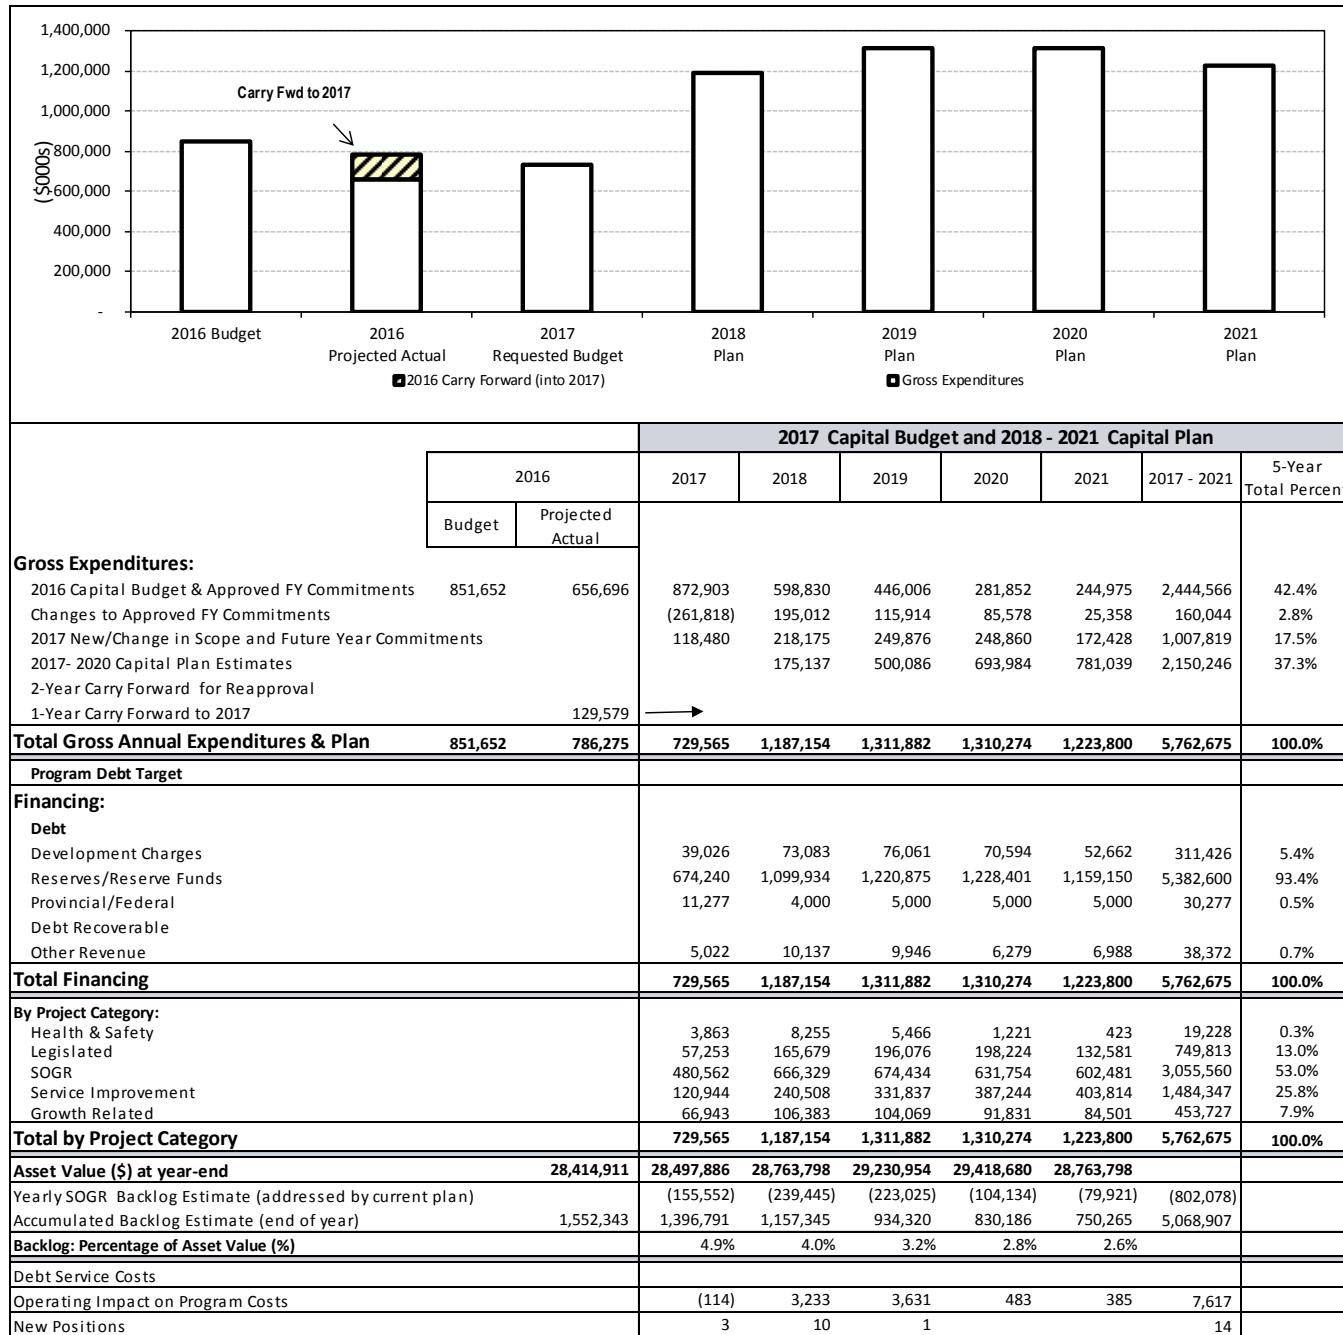

1. City Council approve the 2017 Capital Budget for Toronto Water with a total project cost of \$1.989 billion, and 2017 cash flow of \$859.144 million and future year commitments of \$4.180 billion comprised of the following:
  - a) New Cash Flow Funds for:
    - i. 248 new / change in scope sub-projects with a 2017 total project cost of \$1.989 billion that requires cash flow reduction of \$143.338 million in 2017 and future year cash flow commitments of \$413.187 million for 2018; \$365.790 million for 2019; \$334.438 million for 2020; \$197.786 million for 2021; \$179.385 million for 2022; \$187.358 million for 2023; \$188.793 million in 2024; and \$93.968 million in 2025;
    - ii. 328 previously approved sub-projects with a 2017 cash flow of \$872.903 million; and future year cash flow commitments of \$598.830 million for 2018; \$446.006 million for 2019; \$281.852 million for 2020; \$244.975 million for 2021; \$178.369 million for 2022; \$133.333 million for 2023; \$108.576 million in 2024; and \$55.630 million in 2025;
  - b) 2016 approved cash flow for 178 previously approved sub-projects with carry forward funding from 2016 into 2017 totalling \$129.579 million.
2. City Council approve the 2018 - 2026 Capital Plan for Toronto Water totalling \$7.170 billion in project estimates, comprised of \$175.137 million for 2018; \$500.086 million for 2019; \$693.984 million for 2020; \$781.039 million for 2021; \$846.095 million for 2022; \$910.094 million for 2023; \$996.937 million for 2024; \$1.125 billion for 2025 and \$1.142 billion in 2026.
3. City Council consider the operating costs/(savings) of (\$0.114) million net in 2017; \$3.233 million net in 2018; \$3.631 million net in 2019; \$0.483 million net in 2020; \$0.385 million net in 2021; \$1.038 million net in 2022; ; \$1.038 million net in 2022; \$0.050 million net in 2023; and \$1.0 million net in 2024, resulting from the approval of the 2017 Capital Budget for inclusion in the 2017 and future year operating budgets.
4. All sub-projects with third party financing be approved conditionally, subject to the receipt of such financing in 2017 and if such funding is not forthcoming, their priority and funding be reassessed by City Council relative to other City-financed priorities and needs.
5. City Council request the Deputy City Manager and Chief Financial Officer in consultation with the General Manager, Toronto Water to advance the 2018 cashflow for the Basement Flooding projects into 2017, should it become evident that greater than planned volume of work can be completed, and that the 2018– 2026 budgeted cash flows be adjusted accordingly as part of the 2018 Budget process.

### 10-Year Capital Plan

**Figure 1a**  
**10-Year Capital Plan**  
**2017 Capital Budget and 2018 - 2021 Capital Plan**

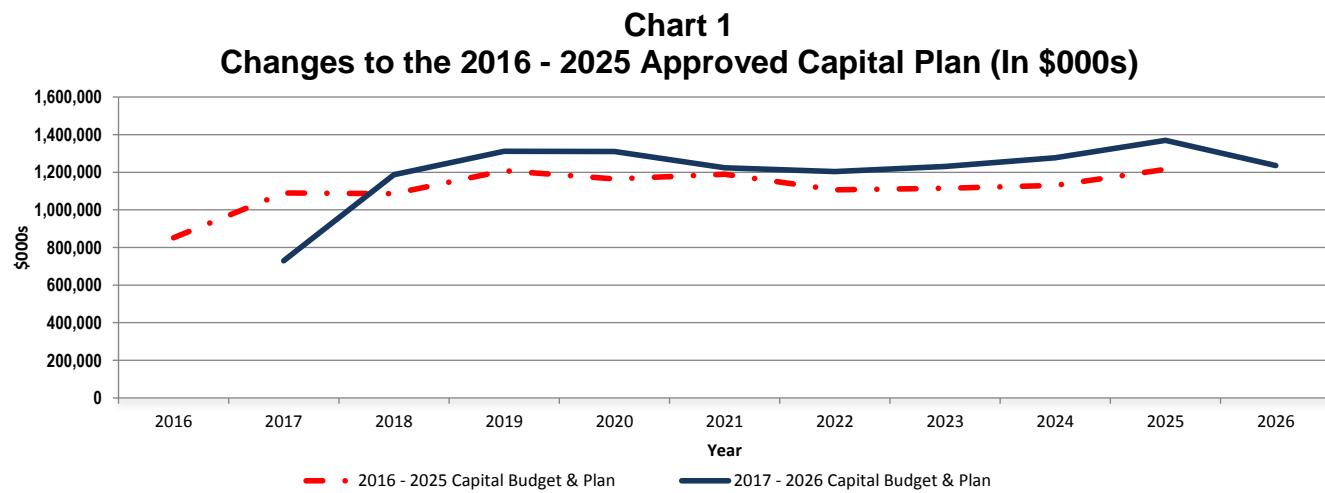

**Table 1b**  
**10-Year Capital Plan**  
**2022 - 2026 Capital Plan**

## Key Changes to the 2016 - 2025 Approved Capital Plan

The 2017 Capital Budget and the 2018 – 2026 Capital Plan reflects an increase of \$923.308 million in capital funding from the 2016 - 2025 Approved Capital Plan.

The table and chart below provide a breakdown of the \$923.308 million or 8.3% increase in the Capital Program on an annual basis from 2016 to 2026.

(\$000s)	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	10-Year Total
2016 - 2025 Capital Budget & Plan	851,652	1,090,037	1,085,903	1,208,050	1,164,159	1,189,890	1,106,964	1,114,970	1,129,835	1,215,387		11,156,847
2017 - 2026 Capital Budget & Plan		729,565	1,187,154	1,311,882	1,310,274	1,223,800	1,203,849	1,230,785	1,277,576	1,369,783	1,235,487	12,080,155
Change %		-33.1%	9.3%	8.6%	12.6%	2.8%	8.8%	10.4%	13.1%	12.7%		8.3%
Change \$		-360,472	101,251	103,832	146,115	33,910	96,885	115,815	147,741	154,396		923,308

As made evident in the chart above, the \$923.308 million increase in the Capital Program reflects an increase of \$383.835 million in various capital projects in the outer years of the 10-Year Capital Plan. The remaining \$539.473 million represents an increase in capital funding over the nine common years of the Capital Plans (2017-2025), as reflected in Table 2 on the following page. This increase arises from the reprioritization of Toronto Water's capital projects based on the following factors:

- In order to accommodate escalating construction prices, Toronto Water has modified the infrastructure renewal strategy for sewer infrastructure, directing efforts towards trenchless rehabilitation rather than replacement of sewer infrastructure.
- The 10-Year Capital Program was also aligned with available funding as calculated by the Water and Wastewater Rate Model to utilize available funds and to ensure positive reserve balances during major capital spending years.
- Changes have also been made based on updated schedules for coordinated and sequenced delivery of the projects requiring large capital funding, as well as new condition assessments.
- The need to realign Toronto Water 2017 Capital Budget with historical spending rates and ability to deliver future year projects.

A summary of requested project changes for the years 2017 to 2025 totaling \$539.473 million is provided in Table 2 below:

**Table 2**  
**Summary of Project Changes (In \$000s)**

## Significant Capital Project Changes in Toronto Water:

Cash flow funding for the following previously approved capital projects have been adjusted based on historical spending rates, and expected progress and completion schedules of the projects, as outlined below:

### Increases in Previously Approved Projects:

The following Toronto Water capital projects have been allocated increased funding:

- The *Island Water Treatment Plant* project requires an increase of \$40.533 million or 102%, from \$39.589 million in capital funding during the nine common years of the 2016 – 2025 Approved Capital Plan to upgrade the power supply to the plant to support planned facility upgrades and reflect a revised estimate for the Residuals Management Facility – Dewatering project.
- An increase of \$60.517 million or 37% from \$164.445 million is required to fund *Water Treatment* capital projects *plantwide* for construction of UV Disinfection facilities at each of the water treatment plants. Preliminary cost estimates have been revised upon the completion of conceptual design that factors in space constraints within each of the facilities.
- The *Watermain Rehabilitation* project has been allocated additional funding of \$43.961 million or 7%, from \$610.930 million to reflect expanded use of trenchless rehabilitation for infrastructure renewal.
- The *Watermain Replacement* project has increased funding of \$19.619 million or 2%, from \$1.005 billion to reflect increases within unit rates for linear infrastructure replacement.

- The *Water Service Replacement* project has increased funding of \$72.841 million or 22%, from \$324.598 million to align with an expanded watermain rehabilitation program and increases within unit rates for linear infrastructure replacement.
- Additional funding of \$35.191 million or 15% from \$234.143 million is necessary to accommodate the *Water Treatment & Storage* projects including a 4th phase for Indoor and Outdoor Switchgear upgrades at six pumping stations that are reaching the end of their service life, and for revised cost estimate for reservoir rehabilitation projects based on detailed design.
- Funding for the Trunk Watermain projects has been increased by \$181.334 million or 97%, from \$186.956 million to reflect updates to unit rates for linear infrastructure projects and accelerated delivery of a cast iron transmission watermain program.
- Additional funding of \$26.865 million or 5% from \$517.070 has been allocated for the *Sewer System Rehabilitation* projects to reflect expanded use of trenchless rehabilitation for infrastructure renewal.
- *The Ashbridges Bay Wastewater Treatment Plant* project costs have increased by \$164.771 million or 9% from \$1.576 billion to reflect updated cost estimates based on progression of pre-design or detailed design for the following projects: D building Phase 2 upgrades, Disinfection System Construction, Integrated Pumping Station construction and Waste Activated Sludge Construction.
- The *Wet Weather Flow Stream Restoration and Implementation* projects have been allocated increased funding of \$220.483 million or 26% from \$858.7 million to amend the design of the first phase of the Don and Central Waterfront project to improve hydraulic performance, and reduce construction impact through the bundling of construction projects including the construction of an offline storage tank and connection points to the Coxwell trunk sewer.
- The funding allocation for *Trunk Sewers & Sewage Pumping Station* projects have increases by \$107.727 million or 29%, from \$369.617 million to reflect updates to unit rates for linear infrastructure projects.
- Funding for *New Service Connection* projects has been increased by \$88.342 million or 38% from \$233.858 million to provide the necessary servicing capacity based on projected population growth and for the installation of service connections for new homes and developments.
- Increased funding totalling \$58.561 has been allocated to a number of other projects including the *Business and Technology Improvements*, *Transmission Pumping Stations*, *New Sewers*, *RL Clark Water Treatment Plant* projects and *Linear Infrastructure Engineering* projects.

### Deferral/ Reductions in Previously Approved Capital Projects:

Significant reductions in capital expenditures have been made due to the escalation in unit rate prices for linear infrastructure replacement, as well as the anticipated continuing decline in water consumption which has resulted in a need to defer/delay a number of capital projects over the 10 year planning horizon as follows:

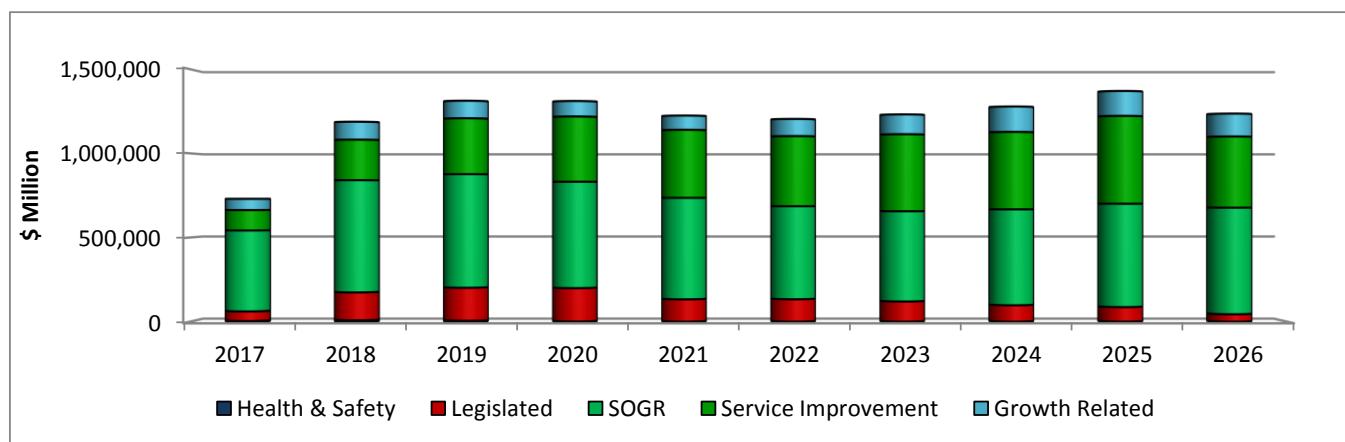

- Funding totalling \$ 9.381 million has been updated to reflect lower costs for RC Harris Water Treatment Plant projects, representing a decrease of 11%, from \$83.579 million delaying the implementation of the Filter Rehabilitation project pending the completion of a Filter Pilot project.
- *Sewer System Replacement* costs have been decreased by \$226.087 million or 60% from \$370.081 million to allocate additional funding to sewer rehabilitation through the use of trenchless technologies due to escalation of replacement unit rates, as well as results from sewer inspections that allow for the use of trenchless technologies for infrastructure renewal.
- Some of the *Basement Flooding* projects have been deferred or reduced by \$239.971 million or 15% from \$1.570 billion in the realignment of program delivery, and to undertake additional flow monitoring, modelling and design to ensure the constructability of proposed projects.

- The funding allocation for Highland Creek and Humber Wastewater Treatment Plants have been reduced by a total of \$65.981 million or 7%, from \$916.061 million due to favourable bid prices for the Humber Treatment Plant Secondary Treatment Upgrade (South) project.
- Yards and Facility projects* have been decreased by \$21.477 million or 45% from \$47.225 million due to a deferral of the Lab & EMP Facilities project.

Over the 2017-2026 planning period, there are also cashflow realignments for a variety of other projects, which reflect more updated schedules for implementation and realignment of projects between different program areas.

## 2017 – 2026 Capital Plan

**Chart 2**  
**2017 – 2026 Capital Plan by Project Category (In \$000s)**

As illustrated in the chart above, the 10-Year Capital Plan for Toronto Water of \$12.080 billion predominantly provides funding for State of Good Repair (SOGR) projects (including Health and Safety and Legislated projects), which represent 59.7% of total funding over the 10-year period. Service Improvement and Growth Related Projects account for the remaining funding allocations of 31.1% and 9.2% respectively.

- Health and Safety projects represent approximately 0.2% or \$23.844 million. Funding is allocated mostly within the first 5 years of the 10-Year Capital Plan period in order to improve the safety and upgrade electrical systems at Ashbridges Bay, Humber and North Toronto wastewater treatment plants.
- Legislated projects account for 10.2% or \$1.230 billion of total funding. These projects are required to comply with existing and emerging provincial and federal legislation. Funding for Legislative projects is expected to increase in future years as regulations governing water supply and wastewater treatment continue to become more stringent.
- State of Good Repair projects continue at stable levels with an average annual investment of about \$596 million over the 10 year period in order to ensure the continued reduction of Toronto Water's infrastructure renewal backlog estimated at \$1.552 billion at the end of 2016.
- Service Improvement projects represent approximately 31% or \$3.762 billion of total funding in the 10-Year Capital Plan. Capital funding for these projects increases consistently over the 10 year period, from \$120.944 million in 2017 to \$521.458 million in 2025 and \$422.797 million in 2026.
- Growth Related projects constitute about 9% or \$1.108 billion of the total. Funding for anticipated growth projects such as new and enhanced watermains and service connections is consistent over the 10-Year Capital Plan period, averaging \$35.820 million per year. However, funding for planned significant standalone projects will vary from year to year based on growth requirements.

The following table provides details by project category within the 2017 – 2026 Capital Budget and Plan for Toronto Water:

\*Life to Date approved cash flows are provided for multi-year capital projects with cash flow approvals prior to 2017, excluding ongoing capital projects.

## 2017 – 2026 Capital Projects

The 10-Year Capital Plan supports Toronto Water's objectives by balancing infrastructure renewal needs for State of Good Repair with new Service Improvement projects, while providing the capacity to keep pace with population growth, and ensuring the delivery of water supply and wastewater treatment within an increasingly stringent regulatory framework.

In addition to the state of good repair projects, considerable funding is provided to support the implementation of the Wet Weather Flow Master Plan, Basement Flooding and growth related projects, some of which is recovered from Development Charges. Additional financial pressures arising from updated cost estimates for engineering services for the Ashbridges Bay Wastewater Treatment Plant upgrades and the addition of the Wet Weather Flow Stream Restoration and Implementation Projects are also accommodated with the Plan.

### *State of Good Repair (SOGR), Health & Safety, and Legislated projects*

- The on-going state of good repair projects for linear infrastructure renewal to ensure the replacement or rehabilitation of aging watermains and sewers, and investment in the City's aging wastewater treatment facilities, remains a primary focus of the 2017-2026 Capital Budget and Plan.
- The 10-Year Capital Plan incorporates an investment of approximately \$7.210 billion or 60% of the total funding of \$12.080 billion for new SOGR projects (including Health & Safety and Legislated projects of \$1.252 billion or 10%) over the next 10 years.
- The 2017-2026 Capital Budget and Plan includes funding of \$596.760 million or 5% of the total capital funding to meet legislated requirements governing the Ashbridges Bay Wastewater Treatment Effluent System. Another \$76.041 million or 0.6% of the total is allocated to the legislated odour control projects at Highland Creek and Humber wastewater treatment plants.
- State of Good Repair funding included in the 10-Year Capital Plan is intended to address Toronto Water's SOGR backlog, estimated at \$1.552 billion by year-end 2016 and projected to be effectively eliminated by year-end 2026, if the current funding allocated to State of Good Repair projects is maintained over the next 10 years.
- However, due to significantly higher market rates for linear infrastructure currently returned through the bidding process, this estimate has to be regularly updated.
- It should be noted that Toronto Water is developing a strategy to implement harmonized asset management planning across its linear and vertical infrastructure in response to multiple pressures driving capital investments. The review is currently on-going, with recommendations for an implementation plan expected to be completed in early 2017.

### *Service Improvements*

- Service Improvement projects total \$3.762 million or 31% of total funding over the 10-year period, some of which is recovered from Development Charges.
- Approximately \$1.527 billion or 13% has been allocated to implement the Basement Flooding Protection projects in 67 chronic basement flooding areas across the City.
- Funding is also included for the implementation of other water quality improvement projects from the City's Wet Weather Flow Master Plan to reduce and ultimately eliminate the adverse impacts of polluted stormwater and combined sewer overflows (CSOs) that are discharged from outfalls to the City's watercourses and the waterfront. These projects will achieve a measurable improvement in ecosystem health of the City's watersheds and waterfront, and improved water quality along the City's waterfront beaches, and include:
  - The Don River and Waterfront Trunk / Combined Sewer Outfall (CSO) project with allocated funding of \$847.625 million or 7% of the total.

- The Stormwater Management End of Pipe Facilities projects totalling \$202.336 million or 2% of total capital funding which are intended to address most of the storm sewer discharges to the waterfront and all but 9 of the 69 combined sewer overflow discharges in the City.
- Approximately \$147.746 million or 1% is included in the 10-Year Capital Plan in funding contributions to the TRCA for stream restoration and erosion control projects.
- Another \$303.650 million or 3% has been allocated to the Highland Creek Waste Water Treatment Plant upgrades and biosolids and gas handling projects implementation.

### *Growth Related*

- Growth Related projects account for \$1.108 billion or 9% of the 10-Year Capital Plan's funding allocation.
- The largest projects in this category are the Trunk Watermain Expansion and Upgrade projects that will increase the hydraulic capacity in the Toronto Water supply system. Many of these projects are cost shared with the Region of York.
- The 2017-2026 Capital Budget and Plan allocates funding for the New Sewer Construction (\$70.555 million) and Trunk Sewer and Pumping Station projects (\$188.786 million), as well as New Service Connections (\$358.2 million) and Trunk Watermains (\$224.010 million) to provide the necessary servicing capacity based on projected population growth and for the installation of service connections for new homes and developments.

## **2017 Capital Budget and Future Year Commitments**

Included as a sub-set of the 10-Year Capital Plan is the 2017 Capital Budget and Future Year Commitments, that consists of 2017 and future year cash flow for projects previously approved by Council; adjustments (Scope Change) to those previously approved projects; as well as new projects that collectively require Council approval to begin, continue or complete capital work.

- Approval of the 2017 Capital Budget of \$859.144 million will result in the future year funding commitments of \$1.003 billion in 2018, \$804.280 million in 2019, \$613.183 million in 2020, \$442.207 million in 2021, \$357.152 million in 2022; \$320.102 million in 2023, \$280.504 million in 2024, \$244.273 million in 2025, and \$93.848 million in 2026, for a total of \$4.180 billion.
- Table 3a below lists the 2017 Capital Budget and Future Year Commitments for Toronto Water that will be approved through the 2017 Capital Budget process:

**Chart 3**  
**2017 – 2026 Capital Plan by Funding Source (In \$000s)**

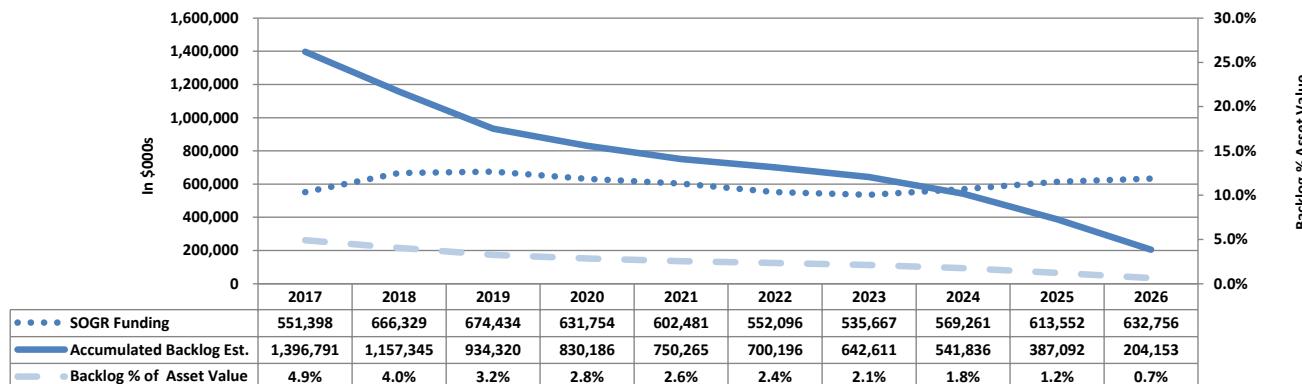

- Over the 10-year planning horizon, Toronto Water's Capital Plan continues to be 100% funded and does not require debenture financing.
- The 10-Year Capital Plan of \$12.080 billion will be funded primarily from the Program's reserves, representing approximately 93% or \$11.284 billion of total capital financing.
  - Capital funding from Toronto Water reserves increases from \$674.240 million in 2017 to \$1.156 billion in 2026. This increase in reserve funding coincides with the implementation schedules for large capital projects such as the Ashbridges Bay Waste Water Treatment Plant disinfection and outfall construction projects, the Highland Creek Biosolids project and Basement Flooding Protection projects.
  - The 10-Year Capital Plan is based on planned water rate increases of 5% (2017 and 2018), and 3% thereafter.

- Development Charges (DC) provide approximately 6% or \$673.019 million of financing included the 10-Year Capital Plan. The use of Development Charge funding has been maximized based on project eligibility resulting in an increase in funding of \$123.519 million over the 2016 – 2025 Approved Capital Plan's estimates. This increase in development charge funding will assist Toronto Water in maintaining a positive reserve balance, while accommodating increased capital funding needs.
- Other financing sources include funding of \$63.757 million from Region of York for cost sharing projects and Federal/Provincial Grant funding of \$59.277 million, totalling approximately 0.5% each in the total.

## State of Good Repair (SOGR) Backlog

**Chart 4**  
**SOGR Funding & Backlog (In \$000s)**

- At the end of 2016, the replacement value of Toronto Water's assets was estimated at \$28.415 billion incorporating both linear (watermains, sewers) and facility/plant (water treatment plants, wastewater treatment plants, pumping stations) assets.
  - Linear infrastructure assets represent approximately 74% of the total asset value at \$21.132 billion.
  - Facility/plant assets account for the remaining 26% or \$7.282 billion.
- The 2016 year-end backlog of state of good repair work for linear and plant infrastructure renewal was projected at \$1.552 billion, representing 5.5% of the asset replacement value. Approximately 54% or \$0.837 billion of the backlog relates to linear infrastructure, with the remaining 46% or \$0.716 billion representing facilities.
- The linear infrastructure and facilities State of Good Repair backlog and annual renewal need estimates have been periodically updated to reflect changes in unit rates for replacement and changing condition of the asset.
- The 10-Year Capital Budget and Plan dedicates \$5.959 billion or \$596 million on average annually, to address state of good repair, which is anticipated to effectively eliminate the backlog by 2026.

**Table 4**

<b>Linear Infrastructure</b>										
State of Good Repair Funding	358,318	402,842	391,590	395,604	387,969	375,342	371,804	397,390	415,383	403,287
Accumulated Backlog Est. (yr end)	732,662	615,169	533,454	523,936	516,992	502,143	466,887	396,449	298,340	203,336
Backlog %Asset Value	3.5%	2.9%	2.5%	2.4%	2.4%	2.3%	2.1%	1.8%	1.3%	0.9%
Asset Value	21,204,286	21,306,008	21,435,152	21,624,359	21,786,870	21,966,870	22,161,870	22,359,170	22,611,493	22,818,537

- While both categories of assets have historically received funding for state of good repair projects, the accumulated backlog of projects for linear infrastructure has been addressed at a higher rate, resulting in a proportionally lower backlog representing 4.0 % of its replacement value at the end of 2016, compared to 9.8% for facilities.
- Additional condition assessments of infrastructure continue to be undertaken based on asset classes through discrete projects. The condition assessment of booster pumping stations and sewer pipes was completed in 2014 and has resulted in the addition of a pumping station rehabilitation plan to Toronto Water's 10 year Capital Plan in 2015. Condition assessments of sewage pumping stations continue to be undertaken on a prioritized basis and a facility condition assessment is being undertaken and is expected to be completed in 2018. New methods for inspection of pressurized pipe are being explored to assess condition of assets without taking the pipes out of service during the inspection.
- Toronto Water is also undertaking a review to define its requirements to develop an integrated Asset Management solution. This review is expected to be completed in early 2017. The integrated Asset Management solution should provide a plan for implementing harmonized asset management planning across Toronto Water's linear and vertical infrastructure in response to multiple pressures driving capital investment.
- It should be noted that continued trend of higher unit rates for linear infrastructure replacement projects may impact negatively on the state of good repair backlog for infrastructure renewal. Toronto Water is in a process of quantifying that impact in order to provide an updated information on the state of backlog projects.
- Escalating unit rates for linear infrastructure replacement, due to additional funding requirement for those projects, have already resulted in a deferral of some previously planned capital projects by 1 to 5 years, to align with the funding availability projected by the Water and Wastewater Rate Model. Toronto Water has also modified the infrastructure renewal strategy to expand the use of trenchless rehabilitation to reduce the state of good repair backlog.

## 10-Year Capital Plan: Net Operating Budget Impact

**Table 5**  
**Net Operating Impact Summary (In \$000s)**

Projects	2017 Budget		2018 Plan		2019 Plan		2020 Plan		2021 Plan		2017 - 2021		2017 - 2026

<b>Total (Net)</b>	(114.5)	3.0	3,232.8	10.0	3,631.0	1.0	483.0		385.0		7,617.3	14.0	9,705.3	14.0

The 10-Year Capital Plan will increase future year Operating Budgets by a total of \$9.705 million net over the 2017 – 2026 period, as shown in the table above.

This is comprised of funding to sustain operating costs the following capital projects:

- *Year 2017:* An increase in operating costs for salaries, benefits, chemicals, energy, utilities, and contracted services from previously approved projects at the Ashbridges Bay Wastewater Treatment and Island Water Treatment plants, as well as maintenance costs of the Waterfront/ East Bayfront stormwater infrastructure (\$0.589 million) will be offset by savings from the implementation of the cogeneration facility upgrades at the Humber Wastewater Treatment Plant (\$0.703 million), resulting in a net reduction of \$0.114 million.
  - One position each is required for the water linear infrastructure inspection scans (CCTV), Humber River Wastewater Treatment Plant and the Waterfront/East Bayfront stormwater infrastructure maintenance, for a total of 3 additional permanent positions.
- *Year 2018:* An increase in operating costs in the amount of \$3.233 million mostly due to the operating impact of capital projects at Ashbridges Bay Wastewater Treatment Plant, the Humber Wastewater Treatment Plant new substation, the Water Quality Master Plan's taste and odour control projects, and the Waterfront/ East Bayfront project.
  - 3 new positions each will be needed for the Waterfront/East Bayfront sewer replacement projects and Basement Flooding Program projects. Another 2 positions are for Ashbridges Bayfront Wastewater Treatment Plant (primary treatment upgrades), and one position each is required for the Humber Wastewater Treatment Plant new substation and the Island Water Treatment Plant chemicals and residual management, for a total of 10 new positions.
- *Year 2019:* Additional operating costs of \$3.631 million are anticipated from the implementation of Water Quality Master Plan's taste and odour control projects, Wet Weather Flow Master Plan and implementation of capital projects at Ashbridges Bay and Highland Creek Wastewater Treatment plants.
  - In order to maintain new infrastructure at Ashbridges Bay Wastewater Treatment Plant, one additional position will be required.
- *Years: 2019 to 2024.* The operating cost increase of \$2.956 million is comprised of funding required to sustain variety of capital projects as presented in the table above. There will be no need for additional positions.

These future operating impacts will be reviewed each year as part of the annual Operating Budget process.

## Part 2: Issues for Discussion

## Issues Impacting the 2017 Capital Budget

### **2017 Water Consumption Forecast**

- As noted in the 2017 Water and Wastewater Consumption Rates and Service Fees report, there has been a trend towards reduced water consumption over the last decade, despite population growth. Besides weather conditions, the decline in water consumption is attributed to water efficiency measures and economic factors.
- Over the last ten years, there was a substantial drop in Toronto's water consumption that has declined from 374 in 2005 to 327 million cubic metres at the end of 2015.
- Based on the billing data to the end of August 2016, projected year-end consumption is estimated at 325 million cubic meters, a further drop of 0.5% compared to 2015 actual consumption.
  - While water consumption continues to decline in 2016, the rate of consumption decline is actually less than what had been forecast for budgeting purposes as part of the 2016 Budget.
  - As noted, projected year-end consumption is estimated at 325 million cubic meters, while the 2016 forecast was based on consumption of 321 million cubic meters.
- The 2017 Water and Wastewater Model continues to assume that the 2017 and future year consumption (2018-2026) will continue to decline further by 0.5% annually from the 2016 year-end estimates.
- It is important to note that uncertainty in revenues from the sale of water continues to be a challenge for Toronto Water, especially given that a 1% variance in water consumption estimates would have a \$10.9 million impact on annual anticipated water rate revenue.

### **Water Rate Increases & Reserve Balances**

- Council, as part of the 2015 budget process, endorsed the direction that the capital plan prepared for the 2015 Budget be premised on 8% water and wastewater consumption rate increases for 2015 and 2016, followed by successive 5% increases in 2017 and 2018 in order to reinstate approximately \$1 billion in capital funding lost from a systematic decline in consumption and to fund emerging projects.
- For 2017, Toronto Water's 10 Year Capital Plan has been updated to enable it to deliver on key priorities, while also addressing emerging service improvement projects. In order to provide the necessary revenue stream for the 2017-2026 Capital Budget and Plan in accordance with the Council decision from 2015, the following rate increases are incorporated in the 2017 Water and Wastewater Rate Model:
  - 5% in 2017 and 2018.
  - 3% from 2019 to 2026.
- The following should be noted:
  - Based on the above water consumption and water and wastewater rates, sufficient revenues will be generated to fund the 2017-2026 Capital Budget and Plan, leaving a positive capital financing reserve balance of \$93.476 million at the end of the 10-year period.
  - Toronto Water's 10-Year Capital Plan includes a forecast for the expanded TRCA Watercourse Erosion Control project for a total of \$80.0 million to be spent between 2018 and 2026. It was however assumed that 2/3 (\$48 million) will be funded by other orders of government. This funding has yet to be secured.
  - Unit rate pricing for linear infrastructure replacement have escalated recently, requiring additional funding to cover these increased project costs. As a result, the Program has deferred some previously planned capital projects by 1 to 5 years, to align with the Water and Wastewater Rate Model financial projections of available rate funding. This trend, if it continues, will not only significantly impact the state of good repair backlog for infrastructure renewal, but possibly create funding pressures in future years.
  - Due to the above and based on the fact that the reserve balance decreases to approximately \$52.7 million in 2025, as some of the largest multi-year projects are nearing completion, any further decline in water consumption would require an adjustment of the 10-Year Capital Plan's projects.

## Issues Impacting the 10-Year Capital Plan

### ***State of Good Repair (SOGR) Backlog***

- Toronto Water currently has a significant infrastructure renewal backlog, higher than any other major Canadian urban centre. It has the largest asset base in the country, estimated at \$28.415 billion with some infrastructure dating back to the 1800s.
- However, some of the City's oldest pipes (100 years or older) are still performing well. As Toronto Water plans for the renewal of aging infrastructure, a risk based approach is taken that considers infrastructure age, condition and performance assessment, upsizing, which may be required to service future growth, and opportunities to reduce overall costs.
- Some key initiatives to identify Toronto Water's State of Good Repair needs include:
  - Water Loss Reduction Program which includes leak detection surveys on distribution water mains that is an indicator of the condition and performance of watermain.
  - Closed camera TV (CCTV) inspection program that utilizes closed camera technology to assess the condition of sanitary and storm sewers.
- The 2016 year-end value of the infrastructure renewal backlog is estimated at \$1.552 billion, reflecting 5.5% of Toronto Water's total asset value of \$28.415 billion. This is based on a detailed analysis of current condition assessments and assumptions of service life by linear asset class, coupled with assessments of water and wastewater treatment facilities.
- Condition assessments of infrastructure by asset class continue to be reviewed and updated. In addition to the condition assessments, Toronto Water is undertaking a review to define its requirements for an integrated Asset Management Solution to support further development of its Asset Management Plans. This review, with recommendations for an implementation plan is expected to be completed in early 2017.
- The 10-Year Capital Plan State of Good Repair funding totals \$5.959 billion that averages \$596 million annually over the 10 year period. This level of funding will contribute towards reducing the watermain and sewer break rates. If the state of good repair backlog remains unchanged, the year-end backlog of \$1.552 billion in 2016 will be effectively eliminated by the end of 2026.
- A continued trend in escalating unit rate pricing for linear infrastructure will significantly impact the state of good repair backlog for infrastructure renewal as project deferral is required to align with projected funding. These unit rates are mostly impacted by construction industry capacity to deliver projects across the City.
- The Program's State of Good Repair Backlog analysis excludes stormwater management facilities (stormwater ponds and underground storage tanks) as they are relatively new assets, nor does it include stream restoration from erosion scars. A condition assessment of stormwater ponds is being undertaken to determine long term state of good repair requirements. Restoration of watercourses is planned on a priority basis to protect existing infrastructure and in coordination with the Toronto Region Conservation Authority based on site conditions resulting from extreme weather events.

### ***Basement Flooding***

- In April 2006, City Council approved a Basement Flooding Protection Work Plan (now referred to as the Basement Flooding Protection Program) to undertake comprehensive engineering studies in 31 basement flooding study areas that experienced significant flooding during extreme storms in May 2000 and August 2005.
- New service level standards were adopted, requiring storm drainage systems to accommodate a 1 in 100 year return frequency storm event, up from the current 1 in 2 to 1 in 5 year return frequency storm.

- Between 2006 and 2015, the number of study areas in the City was increased to 67 study areas and in response to additional storm events and new occurrences of basement flooding, City Council approved the city-wide expansion of the Basement Flooding Protection Program.
- In August 2014, Council approved an expanded program management capital delivery model for the Basement Flooding Protection Program that will deliver more quickly and more efficiently a larger number of infrastructure improvements, and meet the needs of the city-wide expansion of the Program
- As of the end of October 2016, Basement Flooding Environmental Assessment (EA) studies for 30 basement flooding study areas have been completed. These EA studies investigate the causes of basement and surface flooding and recommend sewer system improvements to reduce the risk of future basement flooding during extreme storms. Eleven studies are ongoing, one study to be completed in 2016, 8 studies are anticipated to be completed in 2017 and 2 studies are planned for completion in 2018.
- The construction of basement flooding protection projects began in 2009. Many challenges exist with the implementation of works recommended by the EA studies. Retrofitting an area to accommodate the higher level of storm drainage and overland flow controls in existing fully developed areas present the most significant challenge in terms of cost, scheduling and disruption to the local communities.
  - By the end of 2016, \$247 million will have been spent to upgrade storm and sanitary sewers and other related infrastructure to meet the enhanced level of service requirements required under the Basement Flooding Protection Program. A further \$36 million in construction projects has been committed.
- The 2017 – 2026 Capital Budget and Plan includes \$1.527 billion in funding for Basement Flooding Protection Program projects. Despite this level of funding, Toronto Water will continue to face the following challenges:
  - There are increasing demands and high expectations for the further acceleration of basement flooding EA studies and implementation of projects by residents and businesses as a result of the tremendous impacts of basement flooding during extreme weather events.
  - Some of the recommended basement flooding protection projects from completed basement flooding EA studies have a cost that is greater than the Council adopted threshold of \$32,000 per benefitting property, and therefore these projects are not proceeding to engineering design and construction.
- The cost to implement basement flooding protection projects across all 67 study areas need to be continuously updated, as basement flooding EA studies are completed and new works are recommended.

### ***Stream Restoration and Critical Erosion Projects***

- As a part of its Stormwater Management Program, Toronto Water provides an annual funding contribution to the Toronto and Region Conservation Authority (TRCA) for stream restoration and erosion control projects. The 2017-2026 Capital Budget and Plan allocates a total of \$147.746 million over a 10-year period, as Toronto Water continues to support the TRCA's efforts in watercourse management.
- Toronto Water's 2017-2026 Capital Budget and Plan also includes further funding of \$122.267 million over the next 10 year horizon for stream restoration and erosion management to carry out work to protect its own infrastructure in valley lands.

### ***Funding Pressures for Stormwater Management***

- Concurrently with the 2016 Operating Budget and 2017-2025 Capital Budget and Plan, Council approved a report entitled "***Funding Options for Paying for Toronto Water's Stormwater Management Capital Program.***"
  - This report highlighted the growing needs of the stormwater management capital program, which, as a portion of the total capital program, was projected to grow from 18% in 2015 to 40% in 2025. The report recommended development of an implementation plan for a charge that is dedicated to funding

stormwater management projects. This involves a separate funding structure for stormwater management based on alternative parameters including per lot charges and impervious area.

- The work on the implementation plan has started and the report back is expected in the spring of 2017. A possible implementation of new funding structure is anticipated for 2018.
- The 2017-2026 Capital Plan is based on the current consumption based water rate funding and all necessary revenues for the Capital Plan are to be generated by the rate increases included in the 2017 Water and Wastewater Rate Model, until such time that Council approves a new funding structure.

### **Other Challenges**

- Planning for Extreme Weather Events
  - Due to the extreme cold weather events, Toronto Water experienced an unprecedented number of watermain breaks, leaking and frozen water services, not seen in 20 years, resulting in additional funding requirements in 2014 and 2015. Planning and preparing for an adequate response during extreme weather events remains to be a challenge for Toronto Water. This process is currently underway.
- Planning for Growth
  - The City of Toronto is experiencing significant growth with many landowners submitting development applications to increase the density permitted by the zoning-by-law. A strategy is required to ensure that water and wastewater services are available for the new developments.

## **Issues Referred to the 2017 Capital Budget Process**

### **TRCA Unfunded Projects:**

- During the 2016 Capital Budget Process, since TRCA has identified \$182.942 million of unmet needs, including \$60 million for the Scarborough Waterfront Access Trail that could not be accommodated within the existing debt targets, City Council requested that the Chief Executive Officer of the Toronto and Region Conservation Authority, in consultation with the General Managers of Parks, Forestry & Recreation, Toronto Water, and Transportation Services work together to develop the business cases for the unfunded priority projects consistent with the City of Toronto's Capital Budget Instructions and Guidelines for consideration in the 2017-2026 Capital Plan.
- These projects go beyond erosion control and source water protection and have linkages not only to service objectives of Toronto Water, but other City Programs including Parks, Forestry and Recreation, and Transportation Services as well. They encompass variety of initiatives, such as the restoration of the natural environment, the creation of recreation and transportation infrastructure such as visitor's centres, public access to the water, trails, and cycling paths.
- In response to the above request TRCA developed an updated list of unmet needs which is presented in the table below:

## TRCA: Unmet Needs - Projects Excluded due to Funding Constraints

Project Description	Criteria	Total Project Cost	Non-Debt Funding	Debt Required	Cash Flow									
					2017	2018	2019	2020	2021	2022	2023	2024	2025	2026
Scarborough Waterfront Access Trail	6	51,000	25,500	25,500		3,000	6,000	6,000	6,000	6,000	6,000	6,000	6,000	6,000
South Mimico Trail Link and Restoration	6	2,105	1,052	1,053		1,300	805							
Scarborough Bluffs West Study - EA	6	2,000	1,000	1,000			2,000							
Scarborough Bluffs West Project Implementation	6	28,000	14,000	14,000				4,000	4,000	4,000	4,000	4,000	4,000	4,000
Tommy Thompson Park - Master Plan Phase II	6	17,814	8,907	8,907	990	4,268	2,556	2,000	2,000	2,000	2,000	2,000	2,000	-

Western Beaches Breakwall Repair (Phase 1)	3	7,000	7,000			500	500	2,000	2,000	2,000				
Special Policy Areas and Flood Vulnerable Areas Review	3	1,500	1,500		150	150	150	150	150	150	150	150	150	150
- Dundas West														
- Highland Creek	3													
Watershed Planning	8	780	390	390	78	78	78	78	78	78	78	78	78	78
Gatineau Hydro Corridor Revitalization	8	700		700				100	100	100	100	100	100	100
Climate Research and Resilience	8	400		400		150	150	100						
Sustainable Neighborhood Retrofit Action Plan	8	1,350		1,350	100	100	125	125	150	150	150	150	150	150
Partners in Project Green - Eco Forks	8	1,010		1,010	175	320	370	320						
<b>Total</b>		<b>167,609</b>	<b>81,599</b>	<b>86,010</b>	<b>5,343</b>	<b>14,316</b>	<b>18,434</b>	<b>20,873</b>	<b>20,828</b>	<b>19,828</b>	<b>18,078</b>	<b>18,378</b>	<b>16,628</b>	<b>16,628</b>

**Criteria:** Health & Safety or SOGR projects that need to be addressed to avoid service interruption or legal claims (3), Capital projects that generate operating savings/efficiencies or cost avoidance (5). Capital projects to implement approved Council priorities (6), Capital projects to address a sustained service demand (8).

**Funding allocations** are approximate given the nature of the project and the business case.

- Currently, TRCA is in the process of developing detailed business cases for each of the items above, which will then be prioritized and the associated sources of funding identified. Funding ratios in the table above may change as the business cases are further developed and each component relating to Transportation, Toronto Water and Parks, Forestry and Recreation is determined. It is anticipated that this review will be completed in time for the 2018 Budget Process.

# Appendices

## Appendix 1

### 2016 Performance

#### 2016 Key Accomplishments

In 2016, Toronto Water made significant progress and/or accomplished the following:

##### *Water Treatment & Supply*

- ✓ Approximately 35 km of watermain replacement (\$71 million) and 63 km of structural watermain lining (\$49 million).
- ✓ Water service replacement (\$32 million).
- ✓ Water treatment plant upgrades (\$39 million).
- ✓ Transmission watermain replacement (\$14 million).
- ✓ Reservoirs and pumping stations (\$18 million).
- ✓ St. Clair Reservoir refurbishment award (\$25 million).
- ✓ Ellesmere Pumping Station Power Generators Upgrade award (\$24 million).

##### *Wastewater Collection and Treatment*

- ✓ 7 km of sewer replacement (\$33 million) and 130 km of sewer rehabilitation (\$52 million); trunk sewer rehabilitation (\$21 million).
- ✓ Ashbridges Bay Wastewater Treatment Plant on-going projects – P Building Upgrades, biofilters and engineering for the influent pump station and outfall projects (\$61 million).
- ✓ Highland Creek Treatment Plant – biosolids upgrades, odour control upgrades (\$29 million).
- ✓ Humber Wastewater Treatment Plant – gas compressor, odour control and secondary treatment upgrades (\$41 million).

##### *Stormwater Management*

- ✓ Basement Flooding Protection Program (\$45 million).
- ✓ Wet Weather Flow Master Plan (\$60 million).

#### 2016 Financial Performance

##### 2016 Budget Variance Analysis (In \$000's)

2016 Budget	As of Sep 30, 2016		Projected Actuals at Year-End		Unspent Balance		
	\$	\$	% Spent	\$	% Spent	\$ Unspent	% Unspent
851,652	341,548	40.1%		656,696	77.1%	194,956	22.9%

\* Based on 2016 Q3 Capital Variance Report

For additional information regarding the 2016 Q3 capital variances and year-end projections, please refer to the report entitled "Capital Variance Report for the Nine-Month Period Ended September 30, 2016" considered by City Council at its meeting on December 13 and 14, 2016.

<http://app.toronto.ca/tmmis/viewAgendaItemHistory.do?item=2016.EX20.26>

**Impact of the 2016 Capital Variance on the 2017 Capital Budget**

- As a result of the delays in the capital projects, as described in the 2016 Q3 Capital Variance Report, funding of \$129.579 million is being carried forward to the 2017 Capital Budget to continue the capital work.
- A detailed review of the 2017 – 2026 Capital Budget and Plan has been conducted and the necessary adjustments have been made to the timing of cash flow funding for unique and major capital projects such as Ashbridges Bay, Highland Creek and Humber River Wastewater Treatment Plant upgrades, watermain and sewer replacement projects, basement flooding and wet weather flow implementation projects totalling \$360.472 million. By deferring the cash flow funding to future years, the 2017 Capital Budget reflects readiness to proceed and will lead to a higher rate of spending.
