

TORONTO Toronto Water

Infrastructure Services

Toronto Water is responsible for providing services to Toronto residents and businesses including water treatment and supply (also to parts of York Region); wastewater collection and treatment (also to a portion of Peel Region); and stormwater management. The division maintains and services assets worth approximately \$90 billion, some of which includes four water and four wastewater treatment plants, approximately 6100 kilometers of watermains, 4000 kilometers of sanitary sewers, 4900 kilometers of storm sewers and 1500 kilometers of combined sewers.

Environment, Energy & Emergency Planning

We provide a broad range of customer service to external and internal clients that are focussed on the following key environmental and administrative roles: environmental, health and safety regulatory compliance; enforcement of the Sewers and Water Supply By-laws and monitoring of surface water quality; conduct laboratory testing to confirm compliance with water quality standards; and emergency planning and response. Provides operations optimization, energy management services and supports climate mitigation measures for Toronto Water.

Water Treatment & Supply

We treat, transmit, store and distribute potable (drinkable) water to all industrial, commercial and household water users in the City of Toronto. We also deliver water to a major portion of the Region of York. Our challenge is to meet water demands throughout the year, comply with provincial regulations and work responsibly to protect the environment and local water bodies.
