Rugby Field Relocation at Ashbridges Bay Park and Site Preparation at Ashbridges Bay Treatment Plant

Tubs & Gee Gage Rugby Field Relocation - Contract #17ECS-MI-02DC
Start Date: January 2018 Expected End Date: December 2018

Integrated Pumping Station Site Preparation - Contract #17ECS-MI-03DC
Start Date: February 2018 Expected End Date: March 2019
Timeline is subject to change. Future notice to be provided.

In early 2018, the City will start two large-scale infrastructure projects at the Ashbridges Bay Park and Ashbridges Bay Treatment Plant (ABTP). The first project is part of construction for the 10.6 km Coxwell Bypass Tunnel that will run 50 meters below grade, along the west side of the Don Valley and will improve water quality in the Don River and Central Waterfront area. The Tunnel will capture, store, and transport stormwater runoff and combined sewer overflows along the lower Don River and central waterfront and direct the flow for treatment. The second project is building a new Integrated Pumping Station that will carry sewage flows from numerous trunk sewers up to the ABTP for treatment. It will also serve the future infrastructure for the Don River and Central Waterfront project which will capture stormwater runoff and combined sewer overflows along the lower Don River and Central Waterfront.

Upon completion, the Integrated Pumping Station will replace the function of the M&T Pumping Station buildings since they have reached their useful life expectancy. The buildings located at Ashbridges Bay Park will be decommissioned; but will remain in place.

Construction at Ashbridges Bay Park

To prepare for the upcoming work, the City will relocate the Tubs & Gee Gage Rugby Field and install a new parking lot off Coxwell Avenue. Once complete, the relocated Rugby Field will feature new goal posts, bleachers, and an irrigation and drainage system. The new parking lot will feature 55 parking spaces, bike racks and new lighting.

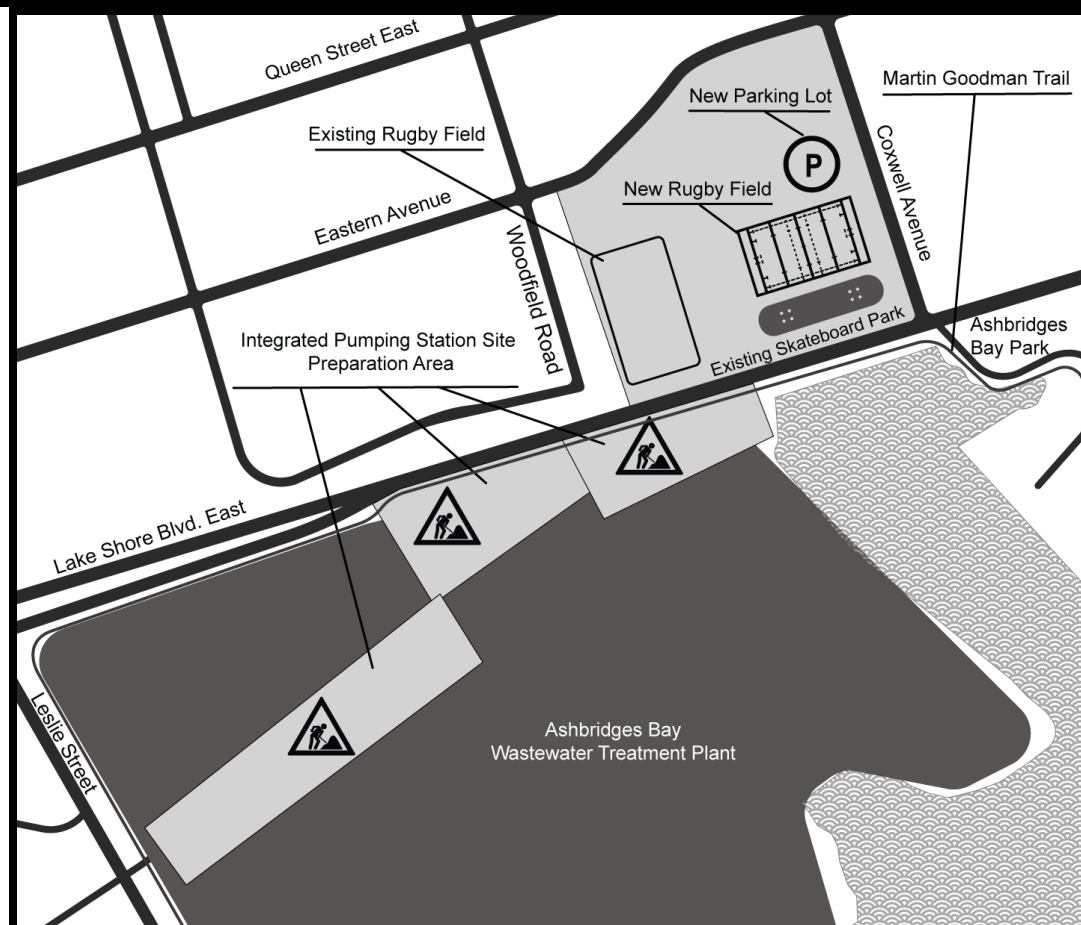

Site Preparation at Ashbridges Bay Treatment Plant

A new Integrated Pumping Station will replace the existing M&T Pumping Stations and will be located on the south side of Lake Shore Boulevard East, north of the ABTP. This work will take place in three phases:

Phase	Timing	Work
1	February 2018 to April 2019	Site preparation work
2	April 2019 to June 2022	Screen building excavation, substructure construction, shafts and tunneling
3	January 2021 to December 2026	Pump house excavation, substructure construction and commissioning of new Pumping Station

These projects are part of the Council-approved 2017-2026 Capital Works Program.

MAP OF WORK AREA

WORK DETAILS

During construction at Ashbridges Bay Park:

- Silt fencing and construction hoarding will be erected around the work site
- soil and trees will be removed
- excavation will take place to install new drainage and irrigation systems
- the new parking lot, Rugby Field and furnishings will be installed
- the existing Rugby Field will be removed when the new field is complete

Construction work at Ashbridges Bay Treatment Plant will involve:

- hoarding and chain link fencing erected around the site
- removing soil and trees at the site
- relocating and protecting buried and above-ground utilities including power cables, storm sewer and watermain;
- service interruptions are not planned or anticipated for the work

WHAT TO EXPECT DURING CONSTRUCTION

You may experience dust, noise and other inconveniences. The City will make efforts to reduce the impacts. We appreciate your patience.

	<p>Work Hours: Work will take place from 7:00 am to 7:00 pm., Monday to Friday, with work after hours and on weekends as required.</p>
	<p>Park Access: In order to complete the work in a safe manner, the southeast quadrant of the park will be closed during construction. The Skateboard Park and Rugby Field will remain open.</p> <p>Ashbridges Bay Treatment Plant Access: Construction vehicles will access the site from Commissioners Street, west of Leslie Street only. The Contactor will maintain access to the plant through the North Access Road and East Gate at all times throughout construction.</p>
	<p>Traffic Management: Efforts have been made to manage traffic in the area for the safety of workers, road users and residents. No significant delays are expected during construction.</p> <p>Vehicular access to the existing pumping station will be maintained.</p>
	<p>Parking: Parking in the active work zone is not permitted due to space requirements for construction equipment and materials. If your parked vehicle affects the construction work, it will be re-located with no charge to the owner. If your vehicle is moved, please contact parking control for its location at 416-808-2222.</p> <p><i>In the event you receive a traffic ticket for on-street parking during this period of construction, you may choose to dispute your ticket at one of the locations listed on the reverse side of the parking infraction notice. You may use this notice as part of your defense for parking consideration during construction; however, the Project Manager does not have the authority to cancel any parking tickets.</i></p>
	<p>Tree Removal: The City has worked to preserve as many trees as possible and trees will be preserved through tree protection measures; however, 19 City-owned trees within the construction area at Ashbridges Bay Park and 65 trees within the construction area for the new Integrated Pumping station at Ashbridges Bay Treatment Plant will be removed in advance. New trees will be planted when construction is complete.</p>
	<p>Restoration: Areas affected by construction will be restored, updates will be provided.</p>
	<p>Cycling: Access to the Martin Goodman Trail will be maintained at all time.</p>
