Sanitary Sewer Replacement on Cordella Avenue from Weston Road to Louvain Street

Expected Start Date: Summer 2018

Expected End Date: Fall 2018

**Timeline is subject to change. Future notice to be provided.*

The City of Toronto is planning to replace the sanitary sewer, the City-owned portion of sanitary service laterals and the City-owned portion of substandard water services on Cordella Avenue from Weston Road to Louvain Street.

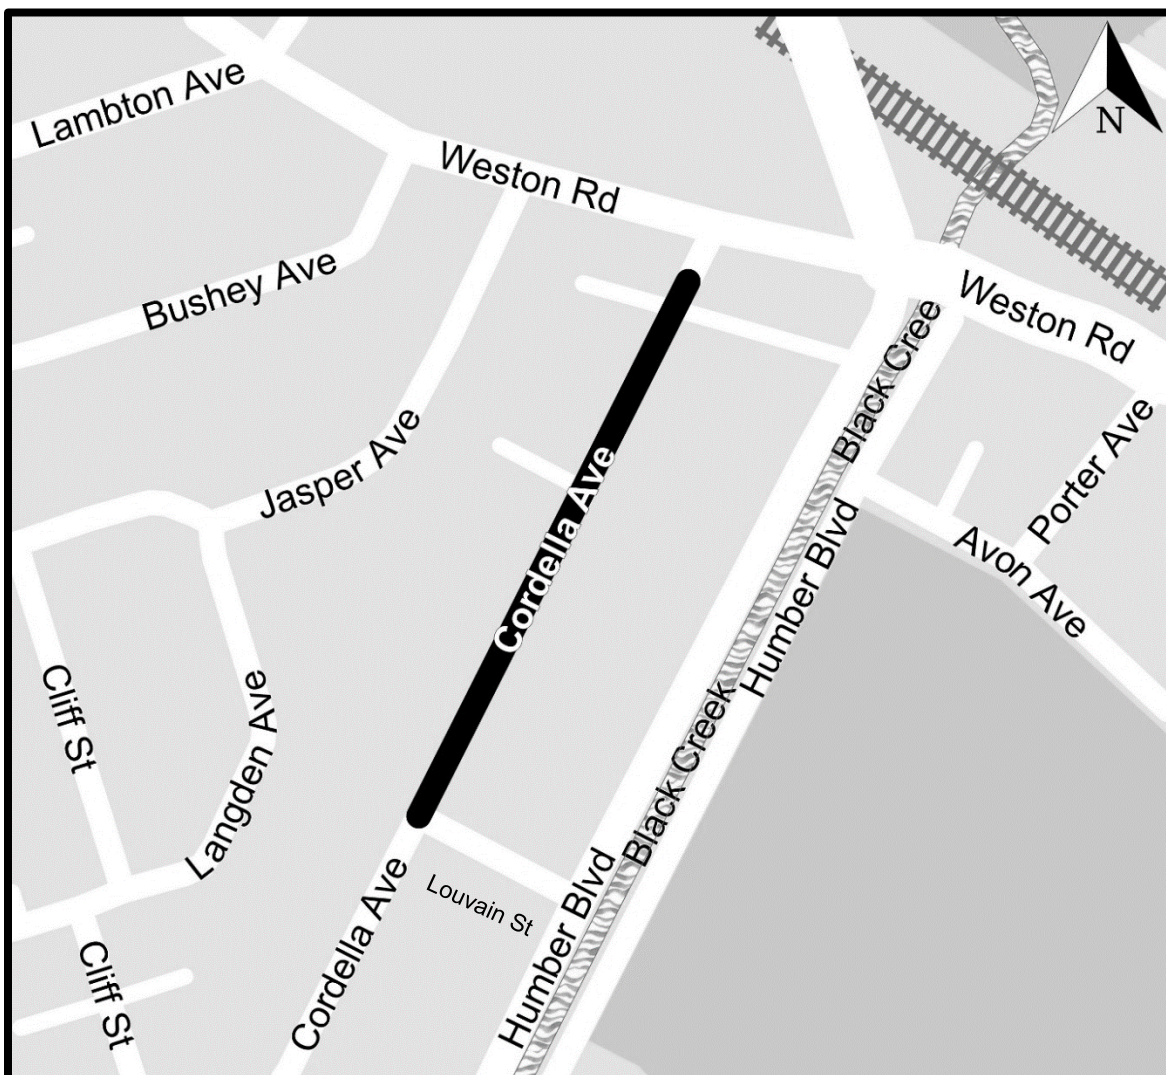

The sanitary sewer carries sewage from bathrooms, sinks, kitchens, and other plumbing components in homes to wastewater treatment plants. The sanitary service lateral is the pipe connecting your home's plumbing to the City's sewer, the water service is the underground pipe that brings clean water to your home; both of these pipes are owned by you and by the City. The part that you own is from your house to the end of your property, the part the City owns goes from the sewer and watermain to your property line.

This project is part of the Council-approved 2018 Capital Works Program to improve water distribution and renew aging infrastructure reducing the risk of sewer collapse or blockages that cause sewer backups.

IMPORTANT INFORMATION ABOUT LEAD WATER SERVICES

If you live on Cordella Avenue in a house built before the mid-1950s, your water service may be made of lead. Please read the attached fact sheet with important information about the risks of lead in drinking water, especially if someone in your house is pregnant, there are children under six years old, or there is an infant drinking formula made using tap water.

MAP OF WORK AREA

WHAT TO EXPECT BEFORE CONSTRUCTION

- Work crews will mark the locations of underground utilities, such as gas, water and cable so that the construction work does not interfere with these utilities.
- Affected properties will receive a Construction Notice approximately two weeks before work begins with more information about the work.
- Work in the boulevard in front of homes and commercial properties is expected. This work includes removing and replacing driveways, municipal sidewalks and grassed boulevards, where necessary.
- Property owners should remove items located within City property limits (boulevard), such as landscaping and or decorative objects before work starts. If you have a sprinkler system within the boulevard, please contact the Field Ambassador listed below.

	<p>Substandard Water Service Replacement: Please read the attached fact sheet as it contains important information about lead in drinking water and water service replacement. First, you need to find out if your water service is lead – a licensed plumber can help you with this. If it is lead, the City of Toronto encourages you to replace it. We recommend you obtain several quotes and you can contact the City's contractor for one of your quotes. Approximately two weeks prior to construction, you will receive a "Construction Notice" with the name and phone number of the City contractor. Learn more at www.toronto.ca/leadpipes</p>
	<p>Accommodation: Residents who require accommodation (level entry, longer notice, etc.) must contact the Field Ambassador to arrange for access during the construction period.</p>
	<p>Access to Your Home: The City-hired contractor may need access to your home to complete a pre-construction survey. Affected properties will receive a pre-construction survey request to schedule a time to complete the survey.</p>
