

Call **3-1-1**

The City of Toronto holds public consultations as one way to engage residents in the life of their city. Toronto thrives on your great ideas and actions. We invite you to get involved.

## Baby Point Wastewater Pumping Station Forcemain

### Municipal Class Environmental Assessment Study Notice of Study Comencement and Public Drop-in Event

#### Study Overview

The City of Toronto has initiated a Municipal Class Environmental Assessment (EA) Study to explore opportunities to improve reliability of an aging forcemain that serves the Baby Point Wastewater Pumping Station. The existing forcemain is located within Étienne Brûlé Park along the route indicated on the map within the Baby Point area, City of Toronto (see map).

#### The Process

The study follows Schedule “B” of the Municipal Class Environmental Assessment (MCEA) process. The MCEA process provides members of the public and interested parties with opportunities to provide input at key stages of the study. The study will define the existing problem, consider and evaluate alternative solutions, assess impacts of the preferred solution, and identify measures to lessen any adverse impacts.

The City invites you to learn more about the EA study and speak with the project team at our first Public Drop-in Event. Details are as follows:

**Date:** Thursday, October 12, 2017

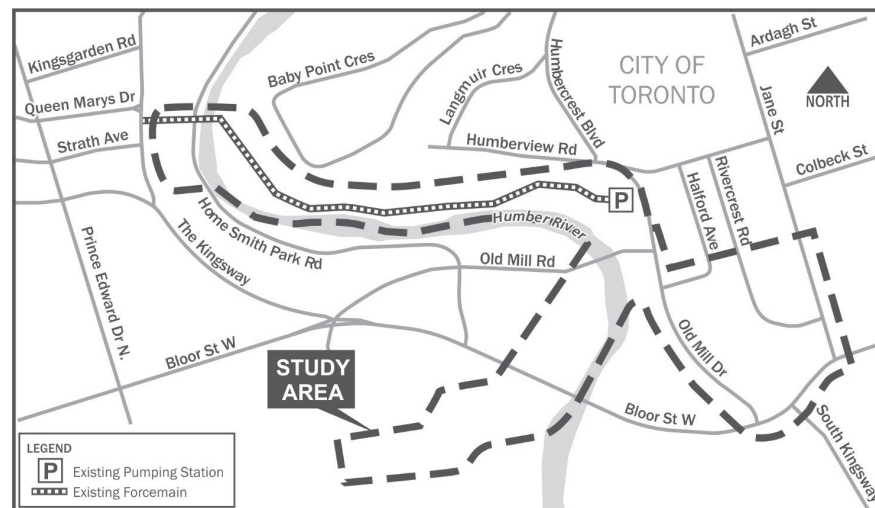

**Time:** 6 p.m. to 8 p.m.

**Location:** Humbercrest United Church, 16 Baby Point Rd.

#### Public Consultation

Early discussions with the community will be critical to identify ways to reduce the impacts of this project on adjacent property owners, park users and pedestrians, while evaluating options and selecting the preferred solution. Two Public Drop-in Events (PIEs) are planned for this Class EA study. PIE 1 will present the problem opportunity statement, alternatives under examination, and the criteria used to evaluate alternatives. The project

team will be present to answer questions and discuss the next steps in the process. The second PIE will present the results of the evaluation and the selected preferred alternative. Notification of the PIEs will be advertised in the local community newspaper and notices will be mailed to residents within the study area.

#### We want to hear from you

Public consultation is an important part of this study. Visit the project website for more information or contact us if you want to be placed on our mailing list for updates.
