## Road Reconstruction on Arcot Boulevard, Tandridge Crescent, and Byng Avenue

**Expected Start Date: Summer 2018**

**Expected End Date: Fall 2018**

*\*Timeline is subject to change. Future notice to be provided.*

The City of Toronto is planning to reconstruct the road and replace the City-owned portion of substandard water services on Arcot Boulevard, Tandridge Crescent and Byng Avenue. Our inspection of the road shows that it needs reconstruction and sections of damaged curb and sidewalk need to be replaced to bring them to a state of good repair.

The water service is the underground pipe that brings water to your water meter and is owned by you and by the City. The part you own is from your house to the end of your property, the part the City owns is from the end of your property to the watermain.

*The City of Toronto plans to construct some Green Infrastructure on **Byng Avenue**. The residents on Byng Avenue will receive separate information about this work.*

This project is part of the Council-approved 2018 Capital Works Program to renew our aging infrastructure, improve water distribution and ensure roads and sidewalks are in a good state of repair.

### IMPORTANT INFORMATION ABOUT LEAD WATER SERVICES

If you live on these streets in a house that was built before the mid-1950s, your water service may be made of lead. Please read the attached fact sheet with important information about the risks of lead in drinking water, especially if someone in your house is pregnant, there are children under six years old, or there is an infant drinking formula made using tap water.

### MAP OF WORK AREA

## WHAT TO EXPECT BEFORE CONSTRUCTION

- Work crews will mark sidewalks and curbs requiring replacement and the locations of underground utilities, such as gas, water and cable so that the construction work does not interfere with these utilities.
- Affected properties will receive a Construction Notice approximately two weeks before work begins with more information about the work.
- Work in the boulevard in front of homes and commercial properties is expected. This work includes removing and replacing driveways, municipal sidewalks and grassed boulevards, where necessary.
- Property owners should remove items located within City property limits (boulevard), such as landscaping and or decorative objects before work starts. If you have a sprinkler system within the boulevard, please contact the Project Manager listed below.

	<p><b>Accessible Accommodation:</b> Residents who require accommodation (level entry, longer notice, etc.) must contact the <b>Project Manager</b> to arrange for access during the construction period.</p>
	<p><b>Substandard Water Service Replacement:</b> Please read the attached fact sheet as it contains important information about lead in drinking water and water service replacement. <b>First, you need to find out if your water service is lead</b> – a licensed plumber can help you with this. If it is lead, the City of Toronto encourages you to replace it. We recommend you obtain several quotes and you can contact the City's contractor for one of your quotes. Approximately two weeks prior to construction, you will receive a "Construction Notice" with the name and phone number of the City contractor.
