Sidewalk Construction along the 506 Streetcar Route: College Street, Carlton Street, Gerrard Street East and Others

Expected Start Date: Late Summer 2018

Expected End Date: Fall 2018

**Timeline is subject to change. Future notice to be provided.*

506 CARLTON Route

The City of Toronto will be reconstructing sidewalks to install curb cuts/ramps along the 506 CARLTON route. This work will make the route accessible for people using mobility devices (such as wheelchairs and walkers), allowing anyone to easily board the new low-floor streetcars in the near future.

Construction work will be carried out in large sections of sidewalk at TTC stops along the complete route.

This work is part of the Council-approved 2018 Capital Works Program, and will bring all stops to a state of good repair.

As part of these upgrades, some TTC stops will be permanently relocated to new locations to meet the requirements for the new longer streetcars, and for improved safety.

TRANSIT IMPACTS DURING CONSTRUCTION

During construction, some 506 CARLTON stops may be taken out of service and temporary stops placed nearby. “Out of Service” signs will be installed and temporary stop markers will be posted.

506 CARLTON buses will continue to operate to High Park Station in the west end via Parkside Drive and Bloor Street, in both directions. Bus service will be in place until late 2018, coinciding with construction at Gerrard and Broadview, and at Main Street Station.

WHAT TO EXPECT BEFORE CONSTRUCTION

- Work crews will mark sidewalks and curbs requiring replacement and the locations of underground utilities, such as gas, water and cables so that the construction work does not interfere with these utilities.
- Near-by properties will receive notice a minimum of 48 hours before work begins with more information about the work.
- Work in the boulevard in front of homes and commercial properties is expected. This work includes removing and replacing driveways, municipal sidewalks and grassed boulevards, where necessary.
- Property owners should remove items located within City property limits (boulevard), such as landscaping and or decorative objects before work starts. If you have a sprinkler system within the boulevard, please contact the Project Manager listed below.

	<p>Road and Sidewalk Access: In order to complete the work in a safe manner, there will be road and sidewalk restrictions within the construction work area.</p> <p>Driveway Access: The contractor will notify you of any temporary restrictions to your driveway access. If your property has two entrances, one entrance will be kept open at all times. Access for emergency vehicles will be maintained at all times.</p> <p>Laneways: Laneways and driveways that serve businesses in the area will remain accessible for deliveries or service</p>
	<p>Accommodation: Residents that require accommodation must contact the project manager to arrange for access during construction.</p>
