Re: Changes to Vaccine Ordering through Toronto Public Health

Toronto Public Health has a new **online vaccine ordering system** for the following vaccines:

- Hepatitis A
- Hepatitis B
- Human Papillomavirus
- Meningococcal (Note: Menactra[®]/Menveo[®] vaccine is a requirement for school attendance)

The online system replaces the previous paper-based order form that will continue to be available during this transition period. Batch orders are also available through the online system for some vaccines. To order vaccines, visit us at toronto.ca/health/professionals and select "Order Vaccine from TPH".

You will need:

- Your clinic's six-digit OGPMS client number
- **Access code: 3387600**
- Client name and date of birth for individual client orders, and reason for ordering

Eligibility criteria for the vaccines is available online.

Continue to order all **routine vaccines through the Ontario Government Pharmacy and Medical Supply Service** – this has not changed.

For more information, contact us at:

 toronto.ca/health/professionals

 Email: vaccineorder@toronto.ca

 **416-338-2030** Monday to Friday 8:30 a.m. to 4:30 p.m.
