

APPENDIX A:
plant catalogue

about the catalogue

The following pages were developed to expand the information readily available for all plants proposed for use in The Guild Park and Gardens. The catalogue is organized alphabetically by scientific name and has been split into two categories representing perennials / forbs and shrubs / small trees.

Along with a photo of each plant and the scientific and common names of each species, the reader will find details regarding height and spread at maturity, blooming season, plant typology category, light requirements, moisture requirements, and suggested planting density.
