Road Resurfacing on Dundas Street West from McMurray Avenue to Annette Street and Reconstruction of McMurray Avenue

Expected Start Date: July 2019

Expected End Date: August 2019

**Timeline is subject to change. Future notice to be provided.*

The City of Toronto is planning to resurface Dundas Street West from McMurray Avenue to Annette Street. The City will also reconstruct the road, and replace the City-owned portion of substandard water services on McMurray Avenue

Our inspection of the roads show that Dundas Street West is in need of road resurfacing including the replacement of sections of damaged curb and sidewalk, and McMurray Avenue is in need of reconstruction. This work is required to bring both roads to a state of good repair and is part of the Council-approved 2019 Capital Works Program to renew aging city roads, sidewalk, and infrastructure for current and future needs.

IMPORTANT INFORMATION ABOUT LEAD WATER SERVICES

If you live in a house on McMurray Avenue that was built before the mid-1950s, your water service may be made of lead. Please read the attached fact sheet with important information about the risks of lead in drinking water, especially if someone in your house is pregnant, there are children under six years old, or there is an infant drinking formula made using tap water.

MAP OF WORK AREA

WHAT TO EXPECT BEFORE CONSTRUCTION

- Work crews will mark sidewalks and curbs requiring replacement and the locations of underground utilities, such as gas, water and cable so that the construction work does not interfere with these utilities.
- Affected properties will receive a Construction Notice approximately two weeks before work begins with more information about the work.
- Work in the boulevard in front of homes and commercial properties is expected. This work includes removing and replacing driveways, municipal sidewalks and grassed boulevards, where necessary.
- Property owners should remove items located within City property limits (boulevard), such as landscaping and or decorative objects before work starts. If you have a sprinkler system within the boulevard, please contact the Project Manager listed below.

	<p>Substandard Water Service Replacement: Please read the attached fact sheet as it contains important information about lead in drinking water and water service replacement. First, you need to find out if your water service is lead – a licensed plumber can help you with this. If it is lead, the City of Toronto encourages you to replace it. We recommend you obtain several quotes and you can contact the City's contractor for one of your quotes. Approximately two weeks prior to construction, you will receive a "Construction Notice" with the name and phone number of the City contractor. Learn more at www.toronto.ca/leadpipes</p>
	<p>Accessible Accommodation: Residents who require accommodation (level entry, longer notice, etc.) must contact the Project Manager to arrange for access during the construction period.</p>
	<p>Access to Your Home: The City-hired contractor may need access to your home to complete a pre-construction survey. Affected properties will receive a pre-construction survey request to schedule a time to complete the survey.</p>
