Six Points Interchange Reconfiguration Travel Update

Project Start Date: Spring 2017
Expected Completion: Spring 2020
Contract: 16ECS-TI-01SP

*timelines are subject to change

Project Update: The Six Points Interchange Reconfiguration has reached a significant milestone with the recent removal of the bridges over Kipling Avenue, and the opening of the new Dundas Street West alignment from Aukland Road to Dunbloor Road/Bloor Street West. This project now moves to the final stages of construction which include: extending Bloor Street West from Kipling Avenue to Dunbloor Road, raising and widening Kipling Avenue from the new Dundas Street West to north of Bloor Street West, and completing Dundas Street West, Beamish Drive, Dunbloor Road, Dundas-Kipling Ramp, and Road C.

Traffic Management: Lane reductions remain in effect as construction continues until Spring 2020. Road users should expect delays and increased traffic on nearby main and side streets. Efforts have been made to manage traffic in the area for the safety of road users, residents and workers. All drivers, pedestrians and cyclists are asked to **please be aware and obey traffic movements, signs and signals**. City staff continue to monitor road conditions as vehicles and pedestrians adjust to the new road configuration.

See information below **and map on page 2** for details about open and closed areas.
