## Catch Basin Installation on Oak Park Avenue at Doncaster Avenue

Contract: 15ECS-LU-14SU

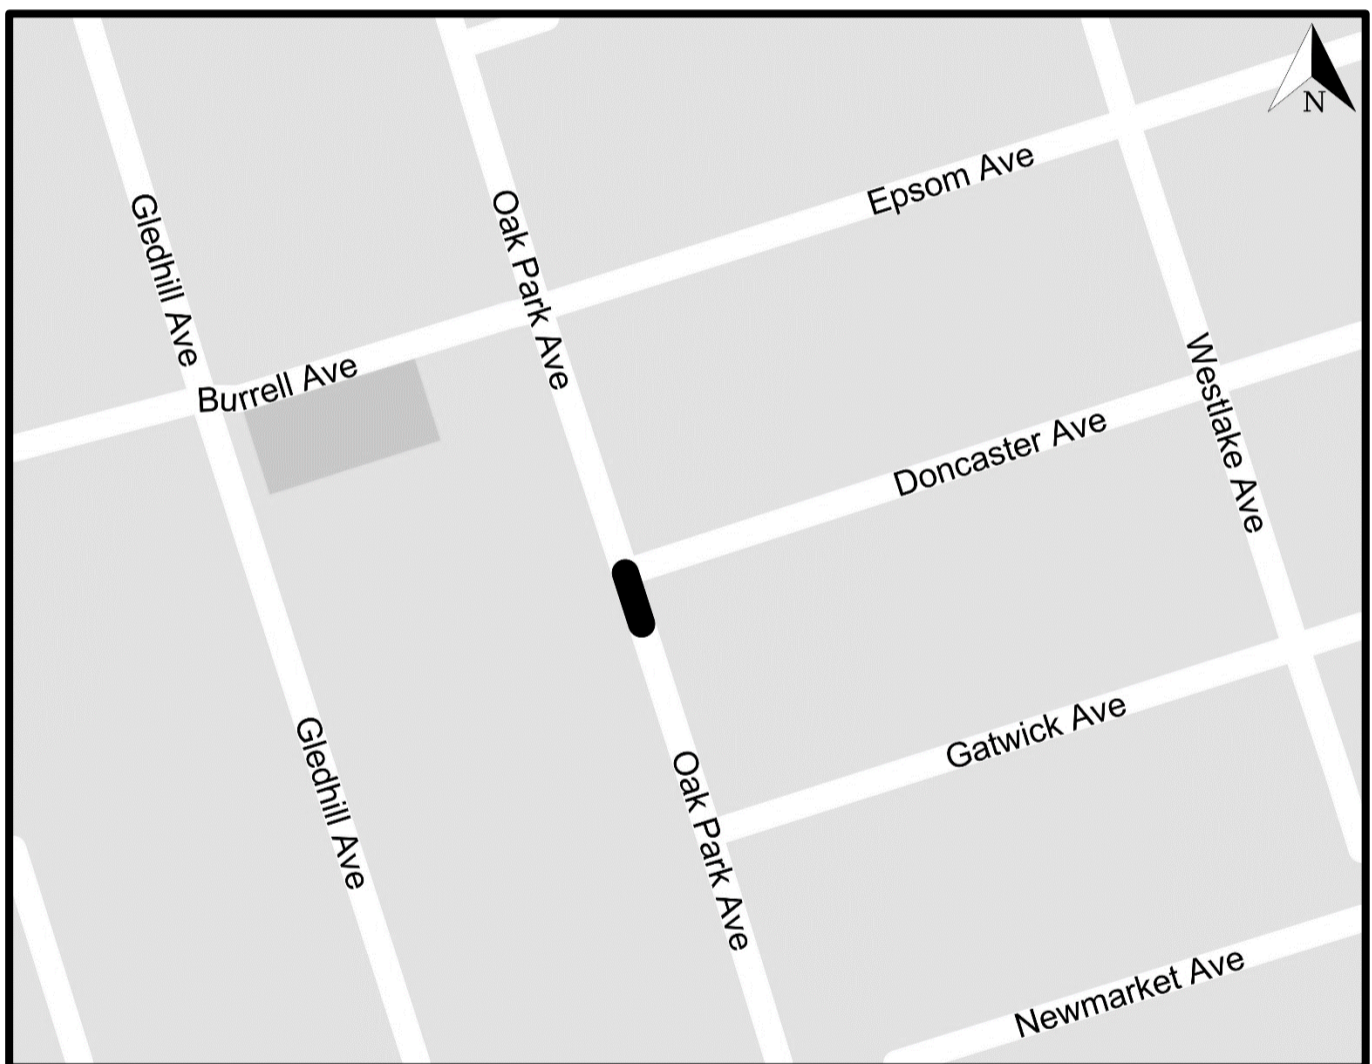

Start Date: May 6, 2019

End Date: May 31, 2019

*\*Timeline is subject to change.*

The City previously completed a combined sewer replacement and road resurfacing on Oak Park Avenue in 2016. After completion of the paving works, an area of ponding water was identified at the corner of Oak Park Avenue and Doncaster Avenue. In order to address this ponding issue, a new catch basin will be installed to drain the water from the street into the existing sewer system.

### MAP OF WORK AREA

### WORK DETAILS

The City's contractor will move equipment on-site and prepare the work area before construction begins. Construction crews will then:

- Excavate the road and dig a trench to access and install the new catch basin and connection to the existing sewer
- Pave a portion of the roadway to ensure proper drainage at this intersection
- Restore all work areas with asphalt, concrete or grass when the construction works are complete

## WHAT TO EXPECT DURING CONSTRUCTION

- You may experience dust, noise and other inconveniences. The City will make efforts to reduce the impacts. Your patience is appreciated.

	<p><b>Work Hours:</b> Work will take place from 7 a.m. to 7 p.m., Monday to Friday, with work after hours and on weekends as required.</p>
  	<p><b>Road and Sidewalk Access:</b> In order to complete the work in a safe manner, there will be road and sidewalk restrictions within the construction work zone. Access for emergency vehicles will be maintained at all times.</p> <p><b>Driveway Access:</b> The contractor will notify you of any temporary restrictions to your driveway access. If your property has two entrances, one entrance will be kept open at all times.</p> <p><b>Accommodation:</b> Residents that require accommodation must contact the Field Ambassador to arrange for access during the construction period.</p>
	<p><b>Traffic Management:</b> Efforts have been made to manage traffic in the area for the safety of workers, road users and residents. Some of these efforts include adding Local Access signs, revising traffic signal times and informing the public of alternate routes during this planned work through twitter. Road users should expect delays and increased traffic on nearby main and side streets.</p> <p><b>Oak Park Avenue will be reduced to one lane. Detour routes may be placed during the sewer works.</b></p>
	<p><b>Parking:</b> Parking in the active work zone is not permitted due to space requirements for construction equipment and materials. If your parked vehicle affects the construction work, it will be re-located with no charge to the owner. Please contact parking control for the location of your vehicle at <b>416-808-2222</b>.</p>
	<p><b>Garbage &amp; Recycling:</b> Please follow your normal routine. If required, the contractor will move bins to an appropriate location and return them. <b><i>Please ensure that you label your bins with your address.</i></b></p>
	<p><b>Restoration:</b> The construction work area will be restored with sod and/or asphalt where required. Interlocking bricks, flagstone on a granular base, or other similar features that are removed during construction will be replaced. Lawn seeding and/or laying of sod will be done as needed during ideal growing seasons only - in the spring (April to June) and fall (September to October).</p>
