Sanitary Main Replacement on Gannet Road and Birrell Avenue from Sewells Road to Littles Road

Expected Start Date: October 2019

Expected End Date: June 2020

**Timeline is subject to change. Future notice to be provided.*

The City of Toronto will replace the sanitary forcemain (a pressurized sewer pipe that transports wastewater from a lower to higher elevation) on Gannet Road from Sewells Road to Birrell Avenue and on Birrell Avenue from Gannet Road to Littles Road. This work also involves connecting the sanitary forcemain to the existing Sewells Sewage Pumping Station and modifying the station’s internal piping to allow the connection.

The sewage pumping station is a facility which pumps sewage uphill from low points in the sanitary sewer network. The

The construction work will proceed in stages and the entire work area will not necessarily be under construction at the same time.

This work is needed as the existing sanitary forcemain has reached the end of its life cycle. This project is part of the Council-approved 2019 Capital Works Program to renew aging infrastructure reducing the risk of forcemain breaks and collapses.

MAP OF WORK AREA

WHAT TO EXPECT BEFORE CONSTRUCTION

- Work crews will mark the locations of underground utilities, such as gas, water and cable so that the construction work does not interfere with these utilities.
- Affected properties will receive a Construction Notice approximately two weeks before work begins with more information about the work.
- Work in the boulevard in front of homes and commercial properties is expected. This work includes removing and replacing driveways, municipal sidewalks and grassed boulevards, where necessary.
- Property owners should remove items located within City property limits (boulevard), such as landscaping and or decorative objects before work starts. If you have a sprinkler system within the boulevard, please contact the Project Designer listed below.

	<p>Accommodation: Residents who require accommodation (level entry, longer notice, etc) must contact the Project Designer to arrange for access during the construction period.</p>
	<p>Access to Your Home: The City-hired contractor may need access to your home to complete a pre-construction survey. Affected properties will receive a pre-construction survey request to schedule a time to complete the survey.</p>
