

## Casa Loma Transportation Management Mitigation Plan

The City of Toronto is undertaking a Transportation Management and Mitigation Plan (TMMP) to evaluate potential improvement alternatives such as transportation demand management and parking strategies to address congestion and parking demands during special events at Casa Loma. The TMMP identifies priority locations for interventions and short/long-term improvement alternatives.

We invite you to attend an upcoming public event to discuss and provide your input on the proposed improvement alternatives.

Details of the public event are as follows:

**Tuesday, July 2, 2019**

**Time: Drop-in anytime between 6:00 p.m. – 8:00 p.m.**

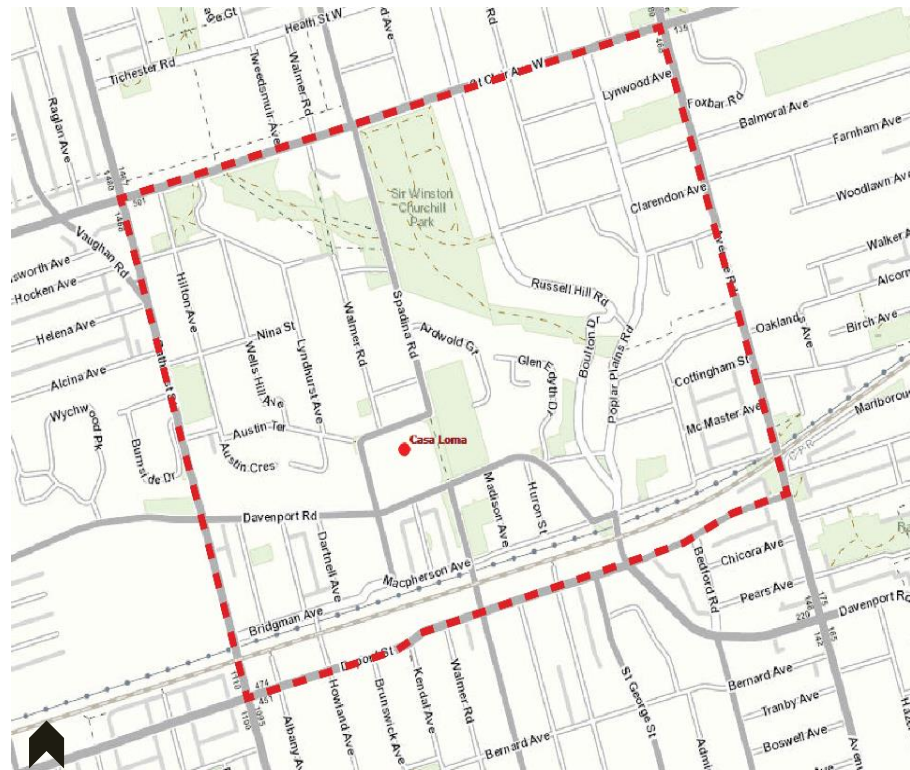

**Place: City of Toronto Archives, 255 Spadina Road**

### Study Area and Process

The study area is bounded to the north by St. Clair Avenue West, to the west by Bathurst Street, to the east by Avenue Road and to the south by Dupont Street.

The TMMP evaluated the existing traffic conditions surrounding Casa Loma, and then proposed preliminary improvement alternatives to address traffic and parking issues that arise within the study area. These preliminary improvement alternatives were presented at the first round of engagement in the Fall 2018. The project team then evaluated the preliminary improvement alternatives based on public feedback and socio economic, cultural environment, transportation, and construction considerations. A list of recommended alternatives has now been developed.

The second round of consultation will take place on July 2, 2019, and summarize the public feedback received, the improvement alternative evaluation findings, and the recommended solutions. Feedback collected will be considered and incorporated into the final recommendation report.

Visit the project web page at [toronto.ca/casaloma-tmmp](http://toronto.ca/casaloma-tmmp) to view more information regarding the TMMP.
