Basement Flooding Protection Program Sanitary and Storm Sewer Upgrades, Watermain Replacement, and Local Road Resurfacing in Bathurst Manor

Contract: 19ECS-LU-09FP

Start Date: August, 2019 End Date: September, 2021

**Timeline is subject to change. Please note that construction on each street will take place between 2019 and 2021, not for the entire duration of the Contract.*

The City of Toronto is modifying and upgrading the storm and sanitary sewer system in your area in order to reduce surface basement flooding. This work also involves some watermain replacement work, local road resurfacing, and replacing the City-owned portion of substandard water services and sanitary sewer laterals. Work is planned in the following locations:

Street	Distance
Hove Street	From Searle Avenue to Sheppard Avenue West
Codsell Avenue	From Hove Street to 80 m east of Hove Street
Waterloo Avenue	From Hove Street to Tillplain Road
Cocksfield Avenue	From Hove Street to Maxwell Street
Bryant Street	From Tokay Court to Cocksfield Avenue
Tokay Court	From Bryant Street to 90 m east of Bryant Street
Goddard Street	From Waterloo Avenue to Baintree Court
Baintree Court	From 100 m west of Goddard Street to Goddard Street
Wilmington Avenue	From Waterloo Avenue to Amos Crescent
Amos Crescent	From Wilmington Avenue to 110 m east of Wilmington Avenue
Shaftsbury Street	From Searle Avenue to Waterloo Avenue
Tillplain Road	From Waterloo Avenue to 40 m south of Waterloo Avenue
Searle Avenue	From Shaftsbury Street to Dufferin Street
Wilson Heights Boulevard	From Brighton Avenue to Waterloo Avenue
Brighton Avenue	From 60 m west of Wilson Heights Boulevard to Wilson Heights Boulevard

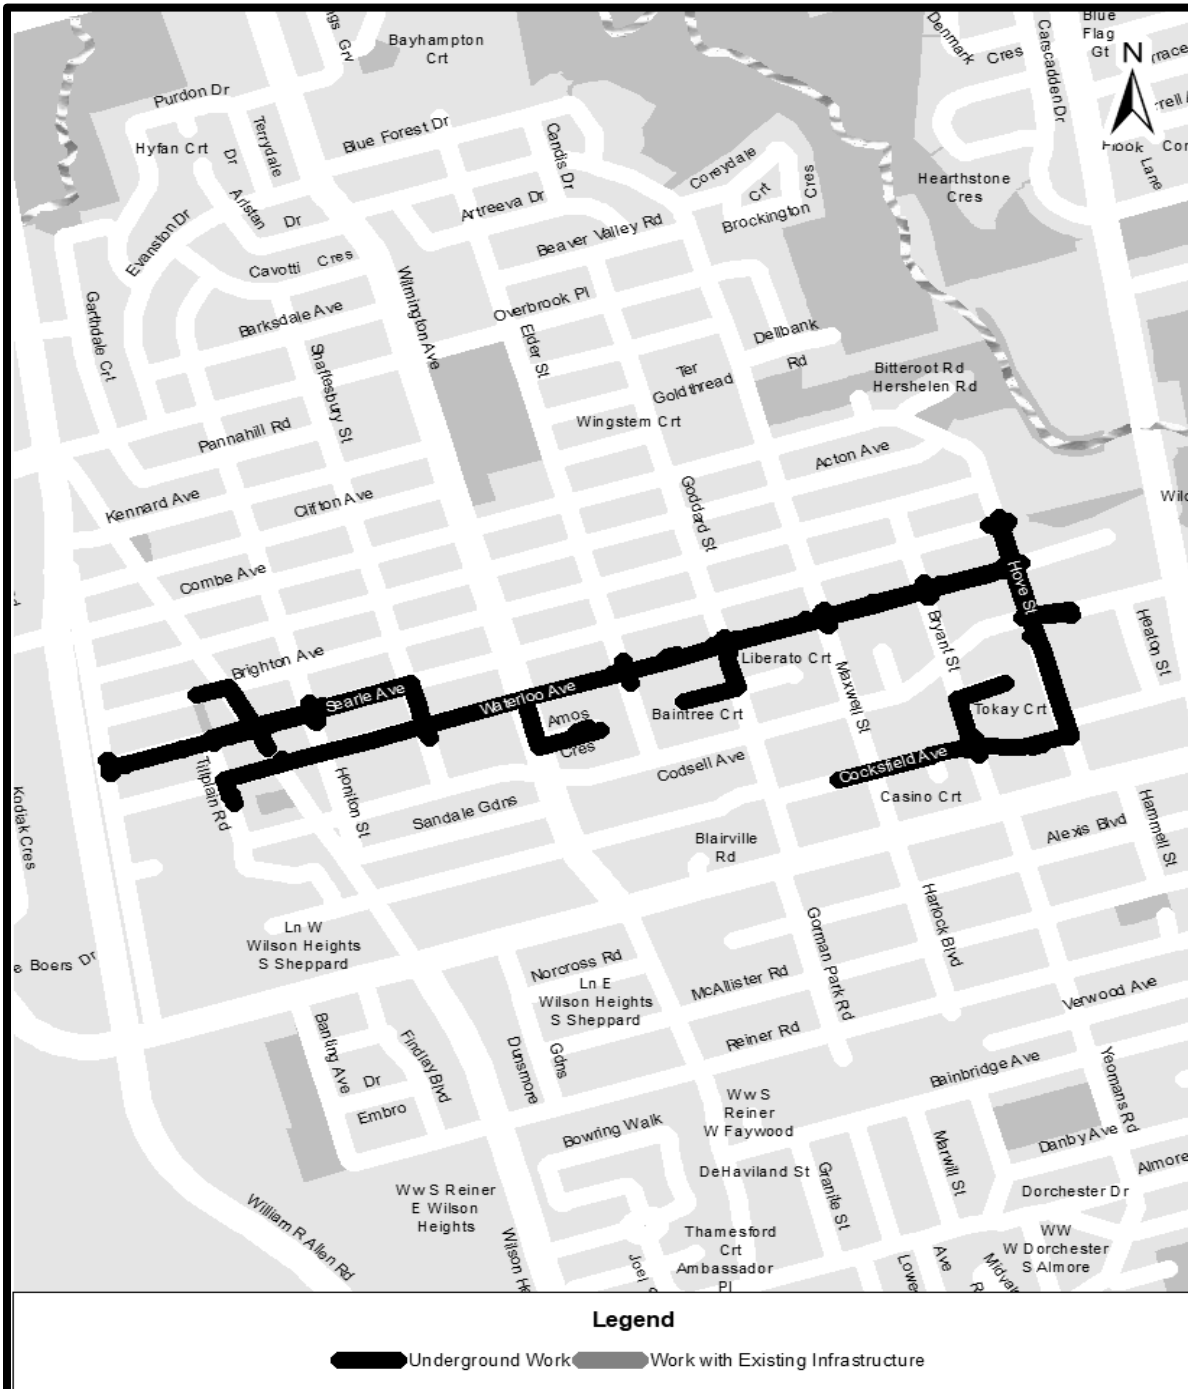

The sanitary service lateral is the pipe connecting your home's sewage plumbing to the City's sewer. The water service is the underground pipe that brings water to your water meter and is owned by you and by the City. The part you own is from your house to the end of your property, the part the City owns is from the end of your property to the watermain.

This project is part of the Council-approved 2019 Basement Flooding Protection Program to improve the water distribution system; renew our aging infrastructure, and reduce the risk of sewer collapse or blockages that cause sewer backups and flooding.

IMPORTANT INFORMATION ABOUT LEAD WATER SERVICES

If you live within the areas shown in the map in a house that was built before the mid-1950s, your water service may be made of lead. Please read the attached fact sheet with important information about the risks of lead in drinking water, especially if someone in your house is pregnant, there are children under six years old, or there is an infant drinking formula made using tap water.

MAP OF WORK AREA

WHAT TO EXPECT BEFORE CONSTRUCTION

- Work crews will mark the locations of underground utilities, such as gas, water and cable so that the construction work does not interfere with these utilities.
- Affected properties will receive a Construction Notice approximately two weeks before work begins with more detailed information.
- The City will not be responsible for damage to any privately owned items on City property, so please ensure that you remove/arrange for removal of each item prior to construction.

	<p>Accessible Accommodation: Residents who require accommodation (level entry, longer notice, etc.) must contact the Field Ambassador to arrange for access during the construction period.</p>
	<p>Access to Your Home: The City-hired contractor may need access to your home to complete a pre-construction survey. Affected properties will receive a pre-construction survey request to schedule a time to complete the survey. At the end of construction work, a post construction survey may be required.</p>
	<p>Important information for owners of sprinkler systems/heated driveways and private landscaping features. Property owners should remove items located within City property limits (boulevard) to avoid damage.</p> <p>This includes items such as landscaping (plants and pavers), decorative objects, sprinkler systems or heated driveways. For details on removal of such items, please contact the Field Ambassador listed below.</p>
	<p>Substandard Water Service Replacement: Please take the time to read the attached fact sheet carefully as it contains important information on lead in drinking water and how to prepare for replacement. First, you need to find out if your water service is lead – a licensed plumber can help you with this. If the water service that you own is made of lead, the City of Toronto encourages you to replace it. We recommend you obtain several quotes and you can contact the City's contractor for one of your quotes. Approximately two weeks prior to construction, you will receive a "Construction Notice" with the name and phone number of the City contractor. Learn more at www.toronto.ca/leadpipes</p>

NEED MORE INFORMATION?
