EMERGENCY REPAIR WORK East Don Sanitary Trunk Sewer

Start Date: October 7, 2019
Expected Completion for Repair: February 17, 2020
Expected Completion for Restoration (trees, etc.): Spring and Fall 2020

This construction notice is a follow-up to the October 30, 2019 notice and provides details of emergency work the City of Toronto is undertaking. The East Don Sanitary Trunk Sewer had structural damage and required emergency repair work to protect the infrastructure from possible failure. The City's contractor has replaced a damaged portion of the sewer, and is now working on additional repairs to the infiltration (water coming into the pipe) adjacent to the damaged portion. Due to this additional repair, the project completion date is now February 17, 2020. We apologize for the inconvenience.

The trunk sewer is located in the East Don Parkland adjacent to the Don River East Branch and the East Don Trail. The closest intersection is Finch Avenue East and Leslie Street, with the project location south of Finch Avenue East and west of Alamosa Drive (more details below).

For pedestrian safety during construction, the East Don Trail remains closed. We apologize for the inconvenience. Please do not enter the trail during construction. Traffic restrictions are also in place on Finch Avenue East near the entrance to the East Don Trail.

WORK DETAILS

In order to complete the emergency repair work, crews:

- Closed the East Don Trail walking path/trail from the entrance on the south side of Finch Avenue East to the entrance through Alamosa Park near Alamosa Drive and Gatehead Road. This closure is required for pedestrian safety during construction.
- Closed the eastbound curb lane of Finch Avenue East surrounding the entrance to the East Don Trail. This closure is required for equipment staging and deliveries.

Current and Upcoming Work:

- Repair of a fourth infiltration (water coming into the pipe) point adjacent to the damaged portion of the sewer.
- Removal of equipment and material at the site prior to restoration.
- Once the work is completed, crews will restore the surrounding vegetation, as needed. All work will be done according to seasonal planting guidelines and is being carried out in consultation with Toronto and Region Conservation Authority and the City of Toronto's Parks, Forestry and Recreation division.

Completed Work:

- Removal of five trees to accommodate the replacement of the trunk sewer and two new maintenance holes.
- Installation of two new maintenance holes to facilitate the temporary sewer bypass system and create access.
- Set-up, management and removal of the temporary sewer bypass system.
- Replacement of the damaged portion (approximately 15 m length) of the 1200 mm diameter East Don Sanitary Trunk Sewer.
- Three repairs for infiltration (water coming into the pipe) adjacent to the damaged portion of the sewer.

A map of the work area can be found on the back page.

WHAT TO EXPECT DURING CONSTRUCTION

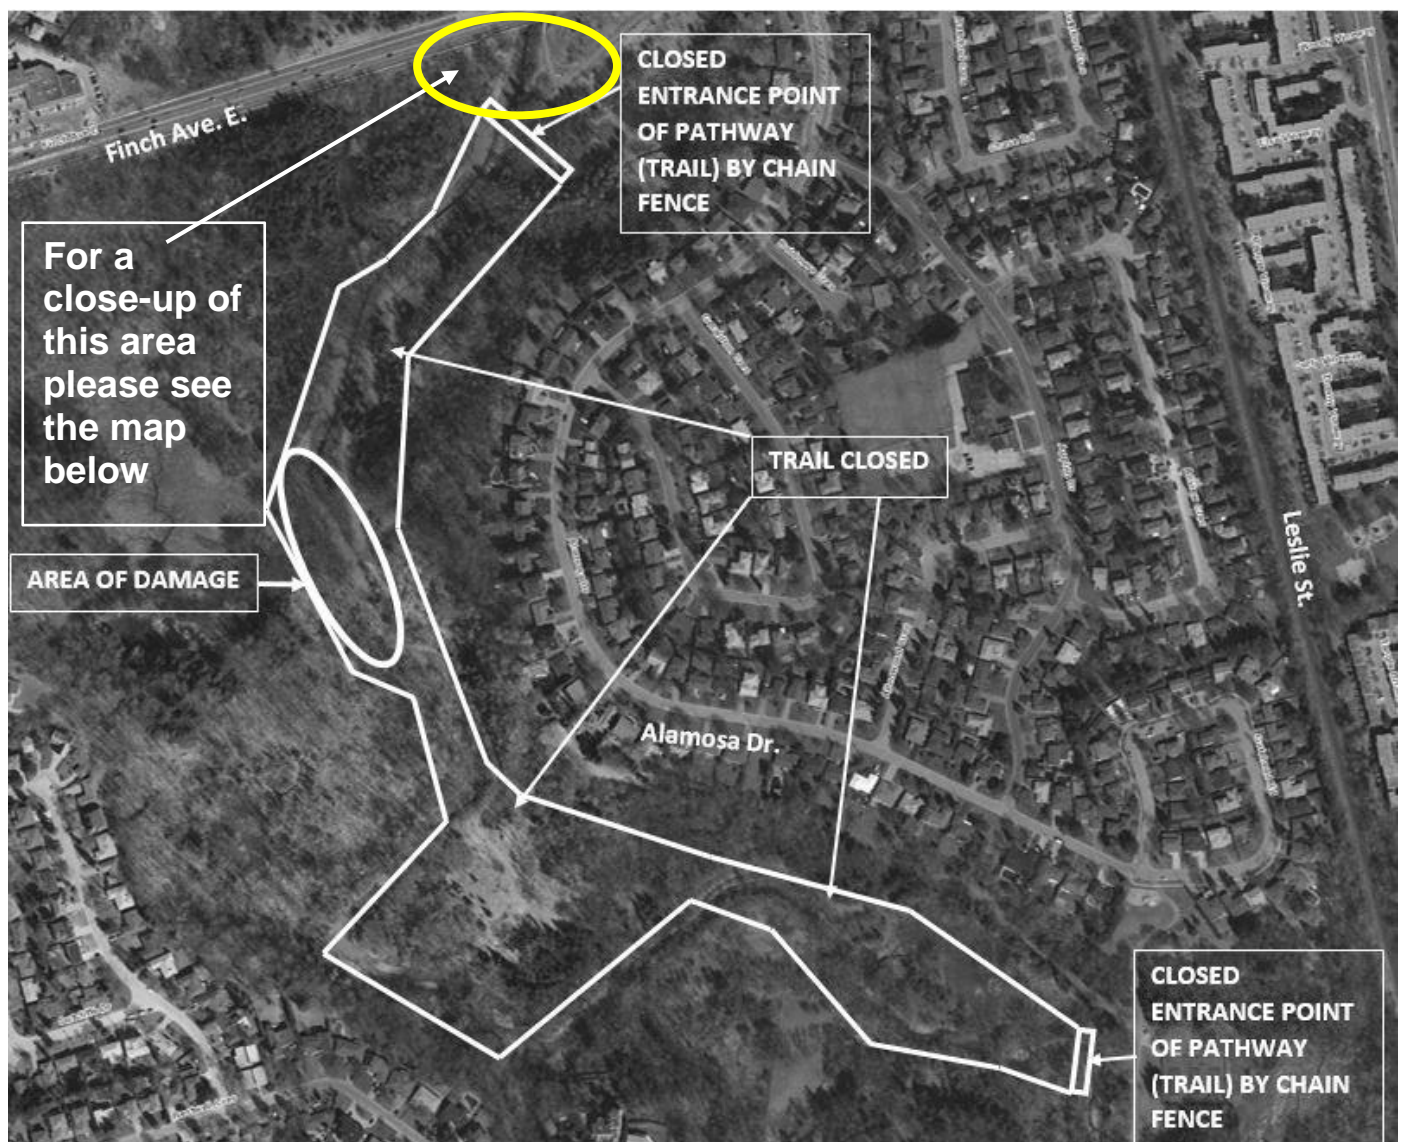

Work Hours: Work will be completed in accordance with the City's Noise By-law predominately between 7:00 a.m. to 7:00 p.m., Monday to Friday, but also with work after hours, on weekends, and occasionally on a 24/7 basis.

| | |
|---|---|
|  | <p>Pedestrian Access: To complete the work safely, pedestrian restrictions will occur. The East Don River Trail will be closed during the work from the north side (40 metres south of Finch Avenue East) toward south side at Alamosa Park. Temporary fencing and signs will be erected around the construction site to protect the public.</p> |
|  | <p>Traffic Management: Efforts have been made to manage traffic in the area of the access routes for the safety of works, road users and residents. The southbound curb lane of Finch Avenue East surrounding the entrance to the East Don Trail will be closed -- please see map below. This closure is required for contractor access including equipment and deliveries. There will also be increased truck traffic on Finch Avenue East for material deliveries.</p> |
