Mendota and Queensway Sanitary Trunk Sewer Rehabilitations

Expected Start Date: February 2020

Expected End Date: December 2020

**Timeline is subject to change. Future notice to be provided.*

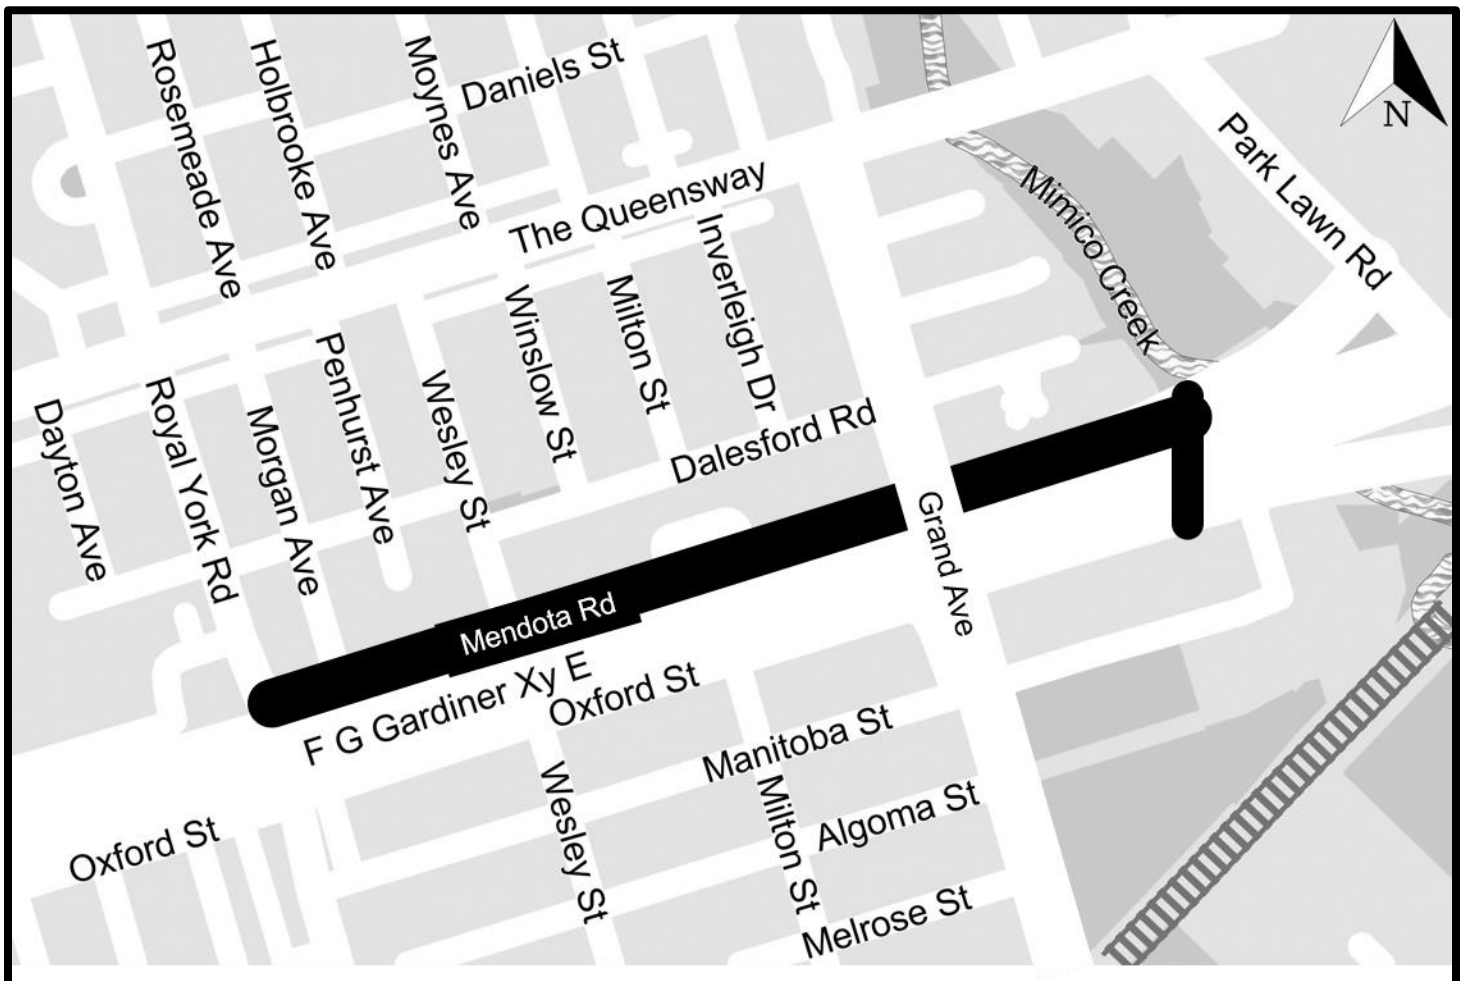

The City of Toronto is planning to rehabilitate:

- The Mendota sanitary trunk sewer (STS) lines running under Mendota Road and the ramp from Park Lawn Road to the F. G. Gardiner Expressway West.
- The Queensway sanitary trunk sewer (STS) lines running under the Gardiner Expressway from the ramp to Park Lawn Road to Mimico Creek.

The sanitary trunk sewer is an underground pipe that collects wastewater from sewers and delivers it to wastewater facilities for treatment.

This project is part of the Council-approved 2019 Capital Works Program to renew the City's aging sewer infrastructure and will extend the service life of these trunk sewer sections by approximately 50 years.

MAP OF WORK AREA

WORK DETAILS

- The City's contractor will move equipment on-site and prepare the work area before construction begins. Majority of the work is taking place in the City streets and the ramp from Park Lawn Road to the Gardiner Expressway West.
- To repair the STS, crews will reline the existing pipes using a trenchless method.
- Construction crews will install temporary pumps and pipes to divert flow from the sewer so that it can be repaired from inside. The temporary pipes will be placed on Grand Ave, the pedestrian bridge, from legion Rd to Park Lawn Rd, and along Park Lawn Rd to The Queensway.
- A sock filled with resin will be inserted into the pipe through maintenance holes and is cured in place with steam.
- When cured a new pipe is formed within the existing pipe.

WHAT TO EXPECT BEFORE CONSTRUCTION

- Work crews will mark underground utilities, such as gas, water and cable to ensure they are not affected by the work.
- Affected properties will receive a Construction Notice approximately two weeks before work begins with more information about the work.
- Work in the boulevard in front of commercial properties is expected. This work includes removing and replacing driveways, municipal sidewalks and grassed boulevards, where necessary.
- Property owners should remove items located within City property limits (boulevard), such as landscaping and or decorative objects before work starts. If you have a sprinkler system within the boulevard, please contact the Project Manager / Field Ambassador listed below.

Accessible Accommodation: Residents who require accommodation (level entry, longer notice, etc.) must contact the **Project Manager** to arrange for access during the construction period.

NEED MORE INFORMATION?

If you have questions about the upcoming work, please contact us.
