

The City of Toronto holds public consultations as one way to engage residents in the life of their city. We invite you to get involved.

## Deep Lake Water Cooling Supply Expansion Class Environmental Assessment Study - Notice of Study Commencement

### Study Overview

The City of Toronto and Enwave Energy Corporation (Enwave), as co-proponents, are carrying out an assessment to examine expanding the existing Deep Lake Water Cooling (DLWC) system. Enwave provides cooling to over 80 buildings in downtown Toronto through its District Energy Supply.

The City and Enwave operate under an existing Energy Transfer Agreement (ETA) that facilitates the transfer of cooling energy from the City's drinking water infrastructure into Enwave's District Energy System through heat exchangers.

There is continued growth in demand for cooling Toronto's downtown core, and Enwave anticipates about 35% increase in its customers' cooling demands in the near future. There is opportunity for the City and Enwave to amend the ETA and expand the DLWC supply to meet the cooling demand in a mutually beneficial way. This assessment will examine the proposed expansion of the DLWC supply.

### The Process

The assessment is being planned in accordance with the Municipal Class Environmental Assessment (MCEA), Schedule "B" approved planning process under the Environmental Assessment Act. The process provides members of the public and interested stakeholders with opportunities for input at key stages of the assessment. The assessment will define the existing problem and opportunity, review potential impacts, evaluate the alternatives and identify the recommended solution.

**Issue Date: January 31, 2020**

### Public Consultation

Opportunities for public input are a key component of the Class EA planning process. A Public Consultation Event is planned for spring 2020.
