COVID-19
How to self-isolate (for returning travellers with no symptoms)

If you have travelled outside of Canada you must self-isolate for 14 days after returning.

Follow these instructions to reduce the risk of spreading illness to others:

- **Travelling home from the airport**
  - If possible, drive yourself.
  - If you must travel home via taxi/ride share, keep the windows open.

- **Purchasing supplies for your household**
  - Shop online or have a friend or family member pick up supplies for you.

- **Stay home**
  - Do not go outside, unless on to a private balcony or enclosed yard where you can avoid close contact with others.
  - Do not use public transportation, taxis or ride-shares.
  - Staying home can still mean staying active. Try free-live-streamed fitness classes, or apps to guide your in-home workout.
  - Should you need to go outside, keep at least 2 metres/6 feet from others.

- **Do not have visitors in your home**

- **Avoid contact with others**
  - Stay in a separate room away from other people in your home as much as possible and use a separate bathroom if you have one.
  - Make sure that shared rooms have good airflow (e.g. open windows).

- **Keep Distance**
  - If you are in a room with other people, keep a distance of at least 2 metres/6 feet from others as much as possible and wear a mask that covers your nose and mouth.
  - If you cannot wear a mask, people should wear a mask when they are in the same room as you.

- **Cover your coughs and sneezes**
  - Cover your mouth and nose with a tissue when you cough or sneeze.
  - Cough or sneeze into your upper sleeve or elbow, not your hand.
  - Throw used tissues in a lined wastebasket, and clean your hands. Lining the wastebasket with a plastic bag makes waste disposal easier and safer.
  - After emptying the wastebasket clean your hands.

- **Clean your hands**
  - Clean your hands often with soap and water for at least 15 seconds. Dry your hands with a paper towel, or with your own cloth towel that no one else shares.
  - Use alcohol-based hand sanitizer if your hands are not visibly dirty.
  - Avoid touching your eyes, nose, and mouth with unclean hands.
• **Clean your home**
  - Clean your home with regular household cleaners.
  - Clean regularly touched items such as toilets, sink tap handles, doorknobs and bedside tables on a daily basis.

• **Avoid sharing household items**
  - Do not share dishes, drinking glasses, cups, eating utensils, towels, bedding or other items with others.
  - After use, these items should be washed with soap or detergent in warm water. No special soap is needed.
  - Dishwasher and washing machines can be used.
  - Do not share cigarettes.

• **Wash laundry thoroughly**
  - There is no need to separate the laundry.
  - Clean your hands with soap and water or alcohol-based hand rub immediately after doing laundry.

• **Be careful when touching waste**
  - All waste can go into regular garbage bins.
  - When emptying wastebaskets, take care to not touch used tissues with your hands. Lining the wastebasket with a plastic bag makes was disposal easier and safer.
  - Clean your hands with soap and water or alcohol-based hand rub after emptying the wastebasket.

• **Monitor your symptoms**
  - If you develop symptoms, continue to self-isolate for 14 days from symptom onset.
  - If have questions about your symptoms, contact Telehealth at 1-866-797-0000 or your health care provider.
  - If you need urgent medical attention, contact 911.

• **Travel to/from the hospital or health care provider's office:**
  - Do not use public transportation.
  - Drive yourself if possible.
  - If driving yourself is not possible, arrange a ride with a friend or family member. Ensure the windows of the car are open, sit in the back seat, and wear a mask (if available/you are able to).
  - If you are unable to arrange a ride, take a taxi or car service. Ensure the windows of the car are open, sit in the back seat and wear a mask (if available/you are able to). Record the taxi or car service company name and license plate of the car.
  - If you need urgent medical attention, contact 911.

• **More information**
  - If you have further questions please contact Telehealth at 1-866-797-0000, your health care provider, or your public health unit.
