Help reduce virus spread

• Stay two metres away from others, if possible.
• Consider wearing a mask if the space is crowded and poorly ventilated.
• Wash your hands with soap and water or an alcohol-based hand sanitizer after touching surfaces.

Avoid crowding

• Do laundry when the area is less busy.
• Sort and fold your clothes when you return home.

Wash laundry as usual

• It is safe to wash laundry from a person who is sick with other items.
• Use regular laundry detergent and the warmest appropriate water temperature.
• Dry items completely in the dryer, if possible.
