COVID-19 Guidance for Community & Allotment Gardens

This document provides interim directions for managers and participants (i.e. garden member/gardeners) of community and allotment gardens to help reduce the risk of COVID-19. Any person that uses community or allotment gardens must do so in accordance with these directions. Community gardens exist on both City of Toronto and private property. Allotment gardens are permitted through the City of Toronto and are located on City property. Review COVID-19 Guidance for Community Agencies for more information.

The aim and purpose of this document is to assist individuals and businesses with information related to the Ontario Government’s reopening framework as well as Toronto Public Health requirements to reduce the spread of COVID-19. It is important to know that breaches of some of these directions will constitute offences under provincial regulations or other public health legal requirements. While we aim to provide relevant and timely information, no guarantee can be given as to the accuracy or completeness of any information provided. This guidance is not intended to nor does it provide legal advice and should not be relied upon or treated as legal advice. Users seeking legal advice should consult with a qualified legal professional.

Reduce the risk of transmission

- Get a COVID-19 vaccination.
- Stay at home when you are ill, even if symptoms are mild.
- Keep at least a two metre distance from those you don't live with.
- Where a mask indoors, and outdoors when physical distancing is difficult.

Capacity limits and restrictions

- Garden capacity must be limited so that members of the public are able to maintain a physical distance of at least two metres from every other person.
- Indoor facilities must limit capacity so that members of the public are able to maintain a physical distance of at least two metres from every other person, and the total number of members of the public does not exceed 50 per cent capacity.
  - 50 per cent capacity is determined by taking 50 per cent of the maximum occupant load of the business or facility, or part of a business or facility, as applicable, as calculated in accordance with Ontario Regulation 213/07 (Fire Code), made under the Fire Protection and Prevention Act, 1997.
• Every person in attendance shall maintain a physical distance of at least two metres from every other person, except from their caregiver or from members of the person’s household.
• Organized public events and social gatherings are limited to 5 people indoors and 10 people outdoors, with physical distancing.
• See COVID-19 Guidance for Places of Worship for religious service, rite or ceremony restrictions.
• Day camps for children must be operated in a manner consistent with the COVID-19 safety guidelines produced by the Office of the Chief Medical Officer of Health.
• In-person indoor instructional programs are not permitted. See COVID-19 Guidance for In-person Instructional Services for more information.
• Wear a mask in indoor public spaces, and outdoors when physical distancing is difficult.

Hand hygiene and respiratory etiquette
• Prior to entering or exiting the gardens, every person must wash or sanitize their hands.
• If hands are visibly soiled, handwashing with soap and water is preferred. If soap and water are not available, wipe hands clean before applying hand sanitizer (70 to 90% alcohol concentration).
• Cover your cough or sneeze with a tissue. Immediately throw the tissue in the garbage and clean your hands.
• If you don’t have a tissue, sneeze or cough into your sleeve or arm.
• Avoid touching your face, nose and mouth with unwashed hands.

Self-screening
• Every person must self-screen for COVID-19 (also available in other languages) before visiting the garden.
• All garden members and managers should be aware of symptoms of COVID-19.

Entrance restrictions
• Anyone who answers YES to any of the screening questions should stay home and not attend the community gardening.
• Allotment garden permit holders must keep a log of all garden visits (name, contact information, date and time of visit). The log must be made available to TPH upon request to support COVID-19 contact tracing, if necessary.

Cleaning and disinfecting
• Clean and disinfect high touch surfaces and items in common areas after each use.
• In general, most common household disinfectants such as bleach, or alcohol-based solutions will kill the virus that causes COVID-19.

**Equipment and tools**
• Avoid sharing tools and equipment, if possible.
• If you must share tools and equipment, clean and disinfect after each use.
• Do not share gardening gloves. Gardening gloves should be laundered after each use.
• Wash or sanitize your hands before putting on and after taking off gardening gloves.
• If using a tent or canopy, at least two full sides must be open to the outdoors and not substantially blocked by any walls or other impermeable barriers. To maximize airflow further, ensure all four sides are open.
  o Limit capacity under the tent to ensure physical distancing can be maintained.
  o Arrange tables and chairs to promote physical distancing.
  o Require masks or face coverings if physical distancing cannot be maintained.

**Signage**
• Post the [physical distancing poster](https://www.publichealthontario.ca/en/document/physical-distancing-poster) and [how to protect yourself poster](https://www.publichealthontario.ca/en/document/how-to-protect-yourself-poster) at all garden entrances, and at common areas, such as the tool shed and hose area.

**Communications**
• Community garden managers must:
  o Provide information to garden members to ensure they are familiar with COVID-19 symptoms.
  o Where required to ensure physical distancing, create a schedule to minimize crowding at the garden and to keep attendance records to assist with contact tracing, if someone develops COVID-19.
  o Maintain an up-to-date list of members, including contact information.
  o Communicate with members frequently about these guidelines.

**Gardeners who become ill while at the garden**
• People who become ill with COVID-19 symptoms while at the garden should go home immediately and [self-isolate](https://www.publichealthontario.ca/en/document/self-isolation). They should also review the City of Toronto website for more information about COVID-19, including [getting tested](https://www.publichealthontario.ca/en/document/getting-tested).
• Toronto Public Health will help individuals with COVID-19 to identify who is a close contact.
If the person who tested positive is unsure who they interacted with at the garden, they should notify the garden manager or permit contact of the dates they visited the garden while contagious. Garden managers/permit contacts should communicate potential risk to other garden members, as appropriate. See Managing COVID-19 in the Workplace for more information on contact tracing.

• Encourage members to download the COVID Alert app so they can be notified directly if they have been in close contact with someone who was contagious with COVID-19.

Encourage vaccination

• Encourage visitors, patrons and staff who are 5 years of age and older to get vaccinated with the COVID-19 vaccine. Read and share information about the vaccine and where to get vaccinated.
• Post signs and share COVID-19 vaccine resources, available in multiple languages.
