

# Measures to keep everyone safe at work:

Increase online or phone services & offer curb side delivery or pickup.

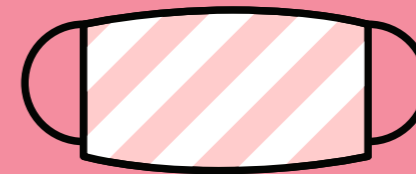

Have staff complete a health screening before each shift & stay home if sick.

Limit staff & customers, to allow for physical distancing at all times.

Use floor markers & signs to reduce congestion & keep everyone 6 feet apart.

Encourage cloth masks, handwashing & have hand sanitizer by entrance/exit.

Clean & disinfect high-touch surface areas often, including washrooms.
