## Storm Sewer Replacement on Bayview Avenue at Newton Drive

**Contract: 19ECS-LU-05SU**

**Expected Start Date: Summer 2020 Expected End Date: Fall 2020**

*\*Timeline is subject to change. Future notice to be provided.*

The City of Toronto is planning to replace a section of the existing storm sewer on Bayview Avenue at Newton Drive, located approximately 500m south of Steeles Avenue.

The storm sewer is a large underground pipe designed to collect stormwater and melting snow and release it into a nearby creek or river.

This project is part of the Council-approved 2020 Capital Works Program and the City's stormwater infrastructure improvement program that will improve the City's aging infrastructure and bring it to a state of good repair.

### MAP OF WORK AREA

## WHAT TO EXPECT BEFORE CONSTRUCTION

- Work crews will mark underground utilities, such as gas, water and cable to ensure they are not affected by the work.
- Before construction begins, a construction notice will be provided to area residents providing more information about the construction duration and closures.
- Work in the boulevard in front of homes and commercial properties is expected. This work includes removing and replacing municipal sidewalks, curbs and grassed boulevards, where necessary.

	<p><b>Accessible Accommodation:</b> Residents who require accommodation (level entry, longer notice, etc.) must contact the <b>Project Manager</b> to arrange for access during the construction period.</p>
	<p><b>Access to Your Property:</b> The City-hired contractor may need access to your property to complete a pre-construction survey. Affected properties will receive a pre-construction survey request to schedule a time to complete the survey.</p>
	<p><b>Tree Removal:</b> Due to the nature of this project, the City will need to remove two trees within the project limits to accommodate the proposed construction. Tree removal permits have been obtained in coordination with the City's Urban Forestry Division. Each tree removed for the project will be replaced using a replacement ratio of 3:1 or three trees planted for every one tree removed.</p>
