

# WAYS TO KEEP CHILD CARE CENTRES HEALTHY & SAFE

Children & staff must be screened daily for symptoms & stay home if sick.

All activities during playtime, mealtime & naptime should allow for physical distancing.

Children & staff will be placed in assigned groups or cohorts.

Clean hands frequently with soap & water or alcohol-based hand sanitizer.

All toys in use must be made of material that can be cleaned & disinfected daily.

Centres must have a plan when a child or staff becomes ill with symptoms of COVID.
