Basement Flooding Protection Program Sanitary and Storm Sewer Upgrades on McCrae Drive, Stickney Avenue and other local roads

Contract: 19ECS-LU-05FP

Start Date: Summer 2020 End Date: Spring 2021

**Timeline is subject to change.*

The City of Toronto plans to modify and upgrade the storm sewer, combined sewer, watermain, pavement and sidewalk repairs in your area in order to reduce surface basement flooding. This work also involves replacing the City-owned portion of substandard water services and sanitary sewer laterals.

Work is planned on the following streets (see map of work area on page 2):

- Randolph Road: From McCrae Drive to 110 m south of McCrae Drive
- Stickney Avenue: From 30 m west of Laird Drive to Sutherland Drive
- Sutherland Drive: From Stickney Avenue to Lea Avenue
- McCrae Drive: From Crandall Road to Millwood Road
- Hanna Road: From McCrae Drive to Rumsey Road
- Rumsey Road: From Hanna Road to 50 m west of Hanna Road

The sanitary service lateral is the pipe connecting your home's sewage plumbing to the City's sewer. The water service is the underground pipe that brings water to your water meter and is owned by you and by the City. The part you own is from your house to the end of your property, the part the City owns is from the end of your property to the watermain.

This project is part of the Council-approved 2020 Basement Flooding Protection Program to improve the water distribution system; renew aging infrastructure, and reduce the risk of sewer collapse or blockages that cause sewer backups and flooding.

IMPORTANT INFORMATION ABOUT COVID-19 AND CONSTRUCTION WORK IN TORONTO

As restrictions on construction have been lifted by the Province of Ontario, City-led infrastructure will continue to proceed. During construction, the contractor is responsible for the Health & Safety on site under the Ontario Occupational Health and Safety Act and is expected to implement COVID-19 mitigation practices. For more information on the City's response to COVID-19 please visit toronto.ca/covid-19.

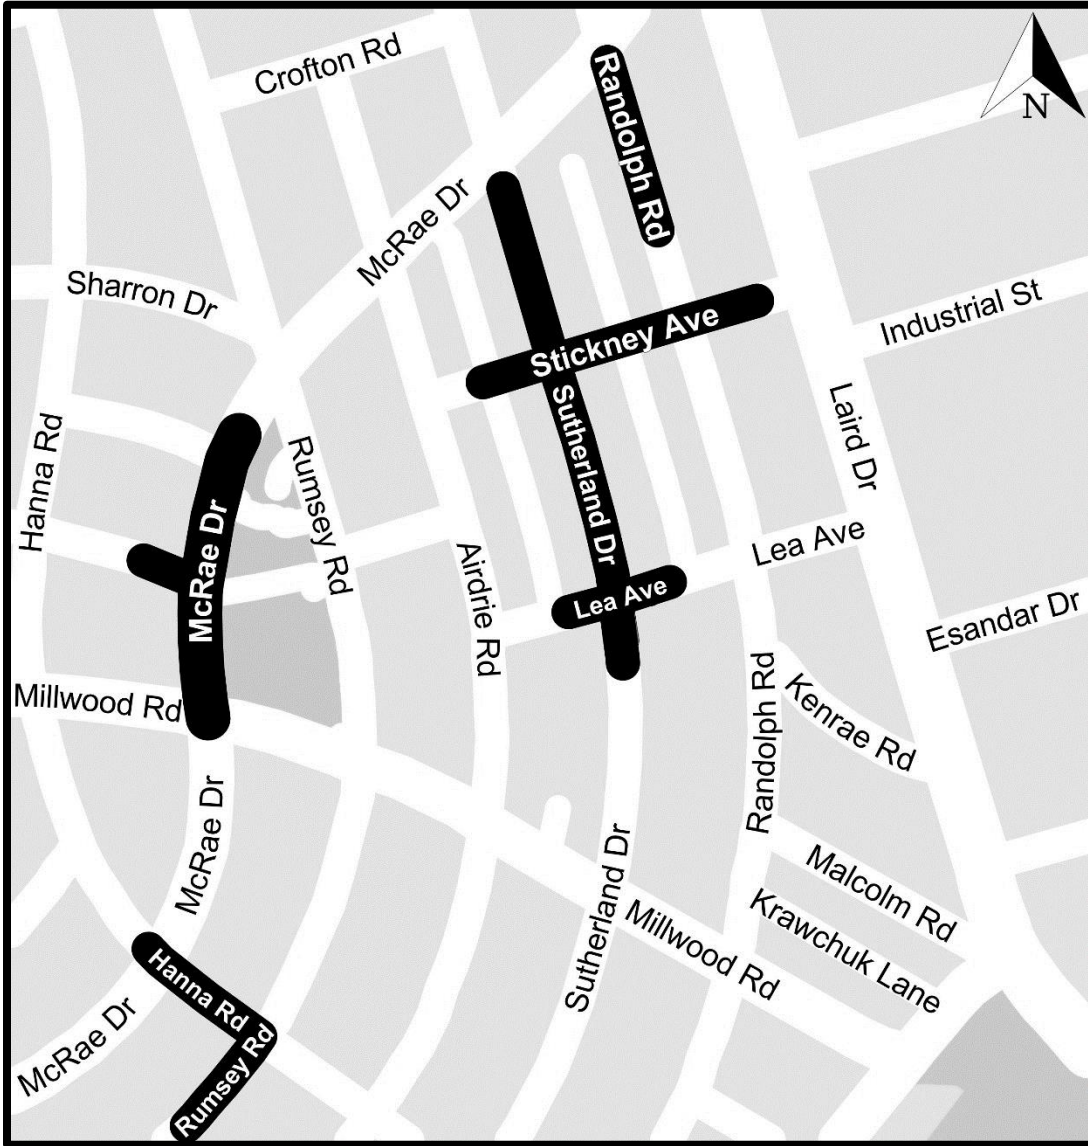

IMPORTANT INFORMATION ABOUT LEAD WATER SERVICES

If you live on the streets in the area described above in a house that was built before the mid-1950s, your water service may be made of lead. Please read the attached fact sheet with important information about the risks of lead in drinking water, especially if someone in your house is pregnant, there are children under six years old, or there is an infant drinking formula made using tap water.

WHAT TO EXPECT BEFORE CONSTRUCTION

- Work crews will mark the locations of underground utilities, such as gas, water and cable so that the construction work does not interfere with these utilities.
- Affected properties will receive a Construction Notice approximately two weeks before work begins with more information about the work.
- Work in the boulevard in front of homes and commercial properties is expected. This work includes removing and replacing driveways, municipal sidewalks and grassed boulevards, where necessary.
- The City will not be responsible for damage to any privately owned items on City property, so please ensure that you remove/arrange for removal of each item prior to construction.

	<p>Accessible Accommodation: Residents who require accommodation (level entry, longer notice, etc.) must contact the Field Ambassador to arrange for access during the construction period.</p>
	<p>Access to Your Home: The City-hired contractor may need access to your home to complete a pre-construction survey. Affected properties will receive a pre-construction survey request to schedule a time to complete the survey. At the end of construction work, a post construction survey may be required.</p>
	<p>Important information for owners of sprinkler systems/heated driveways and private landscaping features. Property owners should remove items located within City property limits (boulevard) to avoid damage.</p> <p>This includes items such as landscaping (plants and pavers), decorative objects, sprinkler systems or heated driveways. For details on removal of such items, please contact the Field Ambassador listed below.</p>
	<p>Substandard Water Service Replacement: Please take the time to read the attached fact sheet carefully as it contains important information on lead in drinking water and how to prepare for replacement. First, you need to find out if your water service is lead – a licensed plumber can help you with this. If it is lead, the City of Toronto encourages you to replace it. We recommend you obtain several quotes. PLEASE NOTE: The City is not able to get involved in any contract to have work done on private property. Property owners are responsible for ensuring contractors do not interfere with the work being done on City property. Learn more at www.toronto.ca/leadpipes</p>
