Planned Construction Work on Lisgar Street from Queen Street West to Dundas Street West

Contract: 20ECS-LU-16SU

Expected Start Date: June 15, 2020

Expected End Date: July 31, 2021

**Timeline is subject to change.*

The City of Toronto will replace a section of the sanitary sewer and watermain and resurface portions of the road on Lisgar Street, from Queen Street West to Dundas Street West (see map on Page 4).

The sanitary service lateral is the pipe connecting your home's plumbing to the City's sewer. The water service is the underground pipe that brings water to your water meter and is owned by you and by the City. The part you own is from your house to the end of your property, the part the City owns is from the end of your property to the watermain.

This project is part of the Council-approved 2020 Capital Works Program to renew our aging infrastructure, improve water distribution and reduce the risk of watermain breaks.

Please note that you may receive more than one Construction Notice from the City of Toronto, as there are a number of projects planned in the vicinity of Lisgar Street in 2020. Please refer to the map on Page 4 for more information.

In an effort to reduce the impact to on-street parking, the City's contractor will stage work in shorter segments of Lisgar Street.

IMPORTANT INFORMATION ABOUT COVID-19 AND CONSTRUCTION WORK IN TORONTO

As restrictions on construction have been lifted by the Province of Ontario, City-led infrastructure will continue to proceed. During construction, the contractor is responsible for the Health & Safety on site under the Ontario Occupational Health and Safety Act and is expected to implement COVID-19 mitigation practices. For more information on the City's response to COVID-19 please visit toronto.ca/covid-19.

WORK DETAILS AND LOCATION

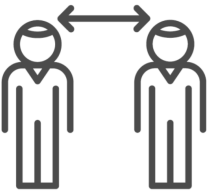

Sanitary Sewer & Watermain Replacement (Queen Street West to Argyle Street)	Watermain Replacement & Road Resurfacing (Afton Avenue to Dundas Street West)
<p>The City's contractor will:</p> <ul style="list-style-type: none"> Excavate the road and dig a trench to access and install the new sanitary sewer Replace the City-owned portion of substandard sanitary sewer laterals Install the new watermain Replace any City-owned water service pipes that do not meet City standards from the watermain to the private property line Resurface the excavated section of road 	<p>The City's contractor will:</p> <ul style="list-style-type: none"> Excavate the road and dig a trench to access and install the new watermain Replace any City-owned water service pipes that do not meet City standards from the watermain to the private property line Repair curbs gutter and driveways Repace the road surface

IMPORTANT INFORMATION ABOUT LEAD WATER SERVICES

If you live on Lisgar Street in a house built before the mid-1950s, your water service may be made of lead. Properties on Lisgar Street where watermain replacement work is taking place will receive a separate *Lead in Drinking Water* fact sheet. It will contain important information about the risks of lead in drinking water, especially if someone in your house is pregnant, there are children under six years old, or there is an infant drinking formula made using tap water.

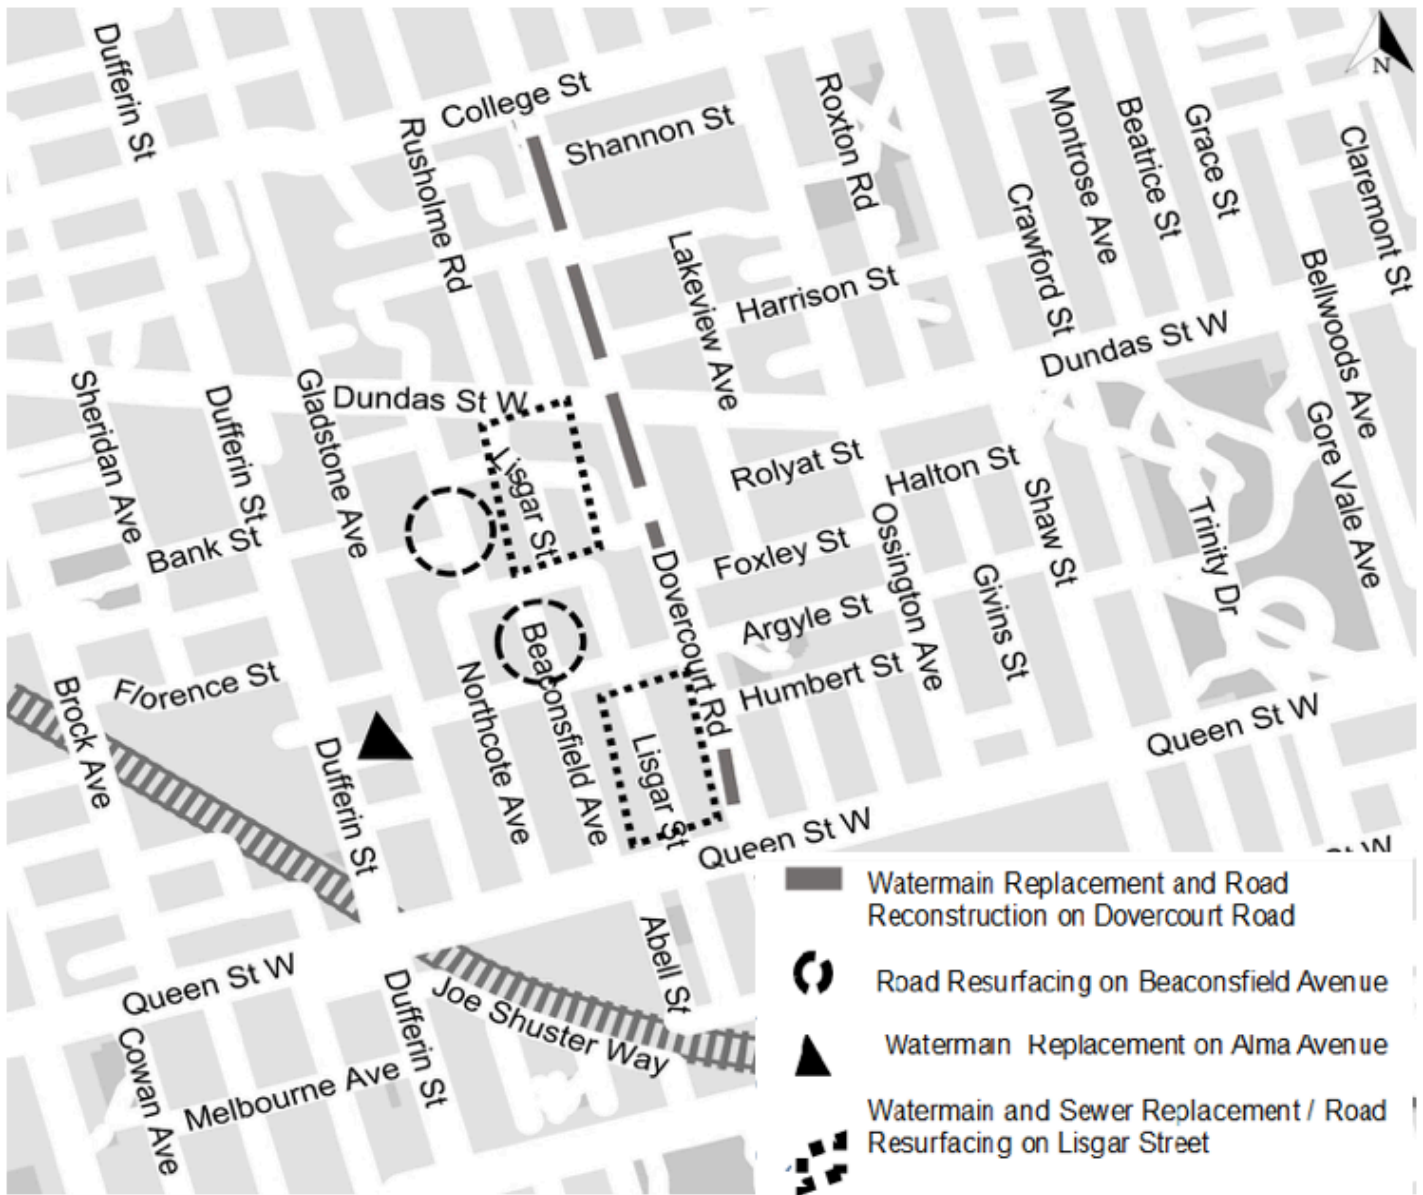

WHAT TO EXPECT DURING CONSTRUCTION

- Work crews will mark the locations of underground utilities, such as gas, water and cable so that the construction work does not interfere with these utilities.
- You may experience dust, noise and other inconveniences. The City will make efforts to reduce the impacts. We appreciate your patience.
- Property owners should remove items located within City property limits (boulevard), such as landscaping and / or decorative objects. If you have a sprinkler system within the boulevard, please contact the **Field Ambassador** listed on Page 4.
- The City will not be responsible for damage to any privately owned items on City property.

	<p>Work Hours: Work will take place from 7 a.m. to 11 p.m. Monday to Friday, 7 a.m. to 11 a.m. Saturday and 7 a.m. to 11 p.m. on Sundays and Holidays, as required.</p>
	<p>Accessible Accommodation: Residents who require accommodation (level entry, longer notice, etc.) must contact the Field Ambassador listed on Page 4.</p>
	<p>Pre-Construction Inspection: The City contractor will survey all properties within 30 metres of the construction area before construction starts. Participation in the survey is voluntary; however, participating is important in determining if the construction caused damage. The inspection will look at the <u>exterior</u> of all properties to verify existing conditions. The company will deliver a separate notice requesting a time to set up appointments. All inspection staff will be wearing photo identification and carrying photographic equipment during their work.</p>
	<p>Physical Distancing: There are times when contractors need to communicate with homeowners about what is happening on-site. This could be about driveway access, water shut offs, exterior pre-construction inspections, and site restoration work (landscaping, installing pavers etc.). Contractor's staff will be identifiable by their high-visibility clothing.</p> <p>Where possible, a phone number for a contact person on-site will be provided on notices, to answer questions about work near your property. At other times, the contractor may knock on your door, but will then step away the required distance to discuss the work that is taking place and what can be expected that day. Please practice physical distancing with workers so everyone can remain safe. If you have questions, call the contact provided on this notice.</p>
	<p>Important information for owners of sprinkler systems / heated driveways and private landscaping features: Property owners should remove items located within City property limits (boulevard) to avoid damage. This includes items such as landscaping (plants and pavers), decorative objects, sprinkler systems or heated driveways. If you have a sprinkler system or heated driveway, please contact the Field Ambassador listed on Page 4.</p>

	Traffic Management: Efforts have been made to manage traffic in the area for the safety of workers, road users and residents. Road users should expect delays and increased traffic on nearby main and side streets. Lisgar Street will be closed to traffic during active work period.
	Water Service Disruptions: From time-to-time, the water supply to your property will be shut-off to complete construction; the contractor will provide at least 24-hour advance notice. Throughout the work, it is recommended that you temporarily disconnect any water treatment systems (i.e. softeners or filters), water-cooled air conditioners or similar plumbing fixtures. Automatic lawn sprinkler systems may also be affected, therefore, you may need to water manually. In the event you did not received advanced notice, an emergency water shut off could have been necessary.
	Substandard Water Service Replacement: If applicable to you, please take the time to read the <i>Lead in Drinking Water</i> fact sheet carefully as it contains important information on lead in drinking water and how to prepare for replacement. If you want to replace your part of the water service pipe, contact the City's contractor for one of your quotes. Water Service Replacement Contractor: Company/Contractor: Midome Construction Services Limited Contact Person: Michael Lamanna Phone: 416-757-2510 Contract No.: 20ECS-LU-16SU PLEASE NOTE: any contract entered into to replace water services is between the home owner and the contractor.
	Road and Sidewalk Access: In order to complete the work in a safe manner, there will be road and sidewalk restrictions within the construction work zone. Access for emergency vehicles will be maintained at all times. Driveway Access: The contractor will notify you of any temporary restrictions to your driveway access. If your property has two entrances, one entrance will be kept open at all times.
	Parking: Parking in the active work zone is not permitted as space is needed for construction equipment and materials. This project will affect the availability of on-street parking. If your parked vehicle affects construction work, it will be relocated with no charge to the owner. Please call the Field Ambassador listed on Page 4.
	Parking Violation Notice: In an effort to reduce ticketing due to construction, the City encourages communities with construction to be patient as neighbours may need to temporarily relocate vehicles. If enforcement is called, enforcement must issue a yellow parking violation notice (ticket). If you receive a yellow notice during this construction work, do the following within 15 days of the notice date: 1) Contact the site inspector or person listed on the Construction Notice and give them the yellow notice number. 2) Dispute the parking violation notice online or in person following the process listed on the reverse side of the parking violation notice. You may use this construction notice as part of the explanation of why the violation should be cancelled. Please note: that violation notices cannot be cancelled if vehicles are parked in illegal parking spots (i.e. in front of a fire hydrant or in no parking zones).
	Garbage & Recycling: Please follow your normal routine. If required, the contractor will move bins to an appropriate location and return them. Please ensure that you label your bins with your address.
	Restoration: The construction work area will be restored with sod and/or asphalt where required. Interlocking bricks, flagstone on a granular base, or other similar features that are removed from public and private property during construction will be replaced. Lawn seeding and/or laying of sod will be done as needed during ideal growing seasons only - in the spring (April to June) and fall (September to October).
