

JUNE CALLWOOD PARK: Concept Plan for Priority Park Improvements

*This plan reflects a recommended scope of work for critical improvements across the entire park. Priority items for improvement include, but may not be limited to, the following:

- replace all loose granular surfacing with a new stable/porous surface or new planting beds
- complete all required removals (trees, vegetation, site furnishings, etc.) to open up north-south axis through the park and improve sight-lines and pedestrian circulation
- remove existing hedge maze
- install new linear "play" elements within central area of park
- remove raised planters, relocate existing park benches and waste bins; install new high-quality park benches and communal seating/tables
- install new City park signs and concrete sidewalks at Fleet Street and Fort York Boulevard street frontages
- improve existing park lighting

Legend:

-  existing rubberized surface
-  new rubberized surface (colour to match existing)
-  new linear play element (TBD)
-  new stable/porous surface (to replace existing loose granular surface)
-  new concrete sidewalk
-  existing granite pavers
-  existing garden beds (to remain) - replace/upgrade planting in select beds
-  bench
-  light pole
-  existing deciduous tree
-  new deciduous tree (to replace dead/removed trees)
