

MAINTAIN A CLEAN WORKPLACE DURING COVID-19

Use cleaners to break down grease & other organic material from surfaces.

Use disinfectants with a 9-digit Drug Identification Number (DIN) to kill germs. Check the expiry date.

Follow manufacturer's instructions & wear gloves when handling these products. Wash hands with soap & water immediately after use.

Clean & disinfect frequently touched objects & surfaces such as door knobs, elevator buttons, workstations & equipment at least twice per day.

Equipment, workstations & tools that must be shared should be cleaned & disinfected regularly, including between users.

Encourage employees to clean & disinfect their workstations at the start & end of each day.
