Basement Flooding Protection Program Infrastructure Upgrades on Jane Street, Wilson Avenue and Other Local Roads

Contract: 19ECS-LU-01FP

Start Date: October 2020 End Date: March 2023

**Timeline is subject to change.*

The City of Toronto plans to modify and upgrade the storm and sanitary sewer systems in your area in order to reduce surface and basement flooding. This work also involves some watermain replacement, local road resurfacing and replacement of the City-owned portion of substandard sanitary and storm sewer service laterals and water services.

The sewer service laterals are the underground pipes connecting your home's plumbing to the City's sewer. The water service is the underground pipe that brings water to your property, via water meter. The sewer service and the water service laterals are owned jointly by you and by the City. The part you own is from your house to the end of your property (the property line) and the part the City owns is from the end of your property to the sewer or watermain.

Work will take place on the following streets:

- Buxton Road
- Calvington Drive
- Camborne Avenue
- Chalkfarm Drive
- Clevedon Street
- Dalsby Road
- Dana Avenue
- Datchet Road
- Deevale Road
- Epsom Downs Drive
- Exbury Road
- Forthbridge Crescent
- Heathrow Drive
- Jane Street
- Julian Road
- Letchworth Crescent
- Lexfield Avenue
- Monclova Road
- Neames Crescent
- Peacham Crescent
- Richard Clark Drive
- Smallwood Drive
- Tavistock Road
- Troutbrooke Drive
- Tumpane Drive
- Victory Road
- Westcliffe Road
- William Cragg Drive
- Wilson Avenue

The limits of construction on each of the above streets is shown on the map at the end of this notice. Please note that construction on each individual street will not last for the entire duration of the three (3) year Contract. It will take place at a point in time between 2020 and 2023.

This project is part of the Council-approved 2020 Basement Flooding Protection Program to improve the water distribution system; renew our aging infrastructure, and reduce the risk of sewer collapse or blockages that cause sewer backups and flooding.

IMPORTANT INFORMATION ABOUT COVID-19 AND CONSTRUCTION WORK IN TORONTO

As restrictions on construction have been lifted by the Province of Ontario, City-led infrastructure will continue to proceed. During construction, the contractor is responsible for the Health & Safety on site under the Ontario Occupational Health and Safety Act and is expected to implement COVID-19 mitigation practices. For more information on the City's response to COVID-19 please visit toronto.ca/covid-19.

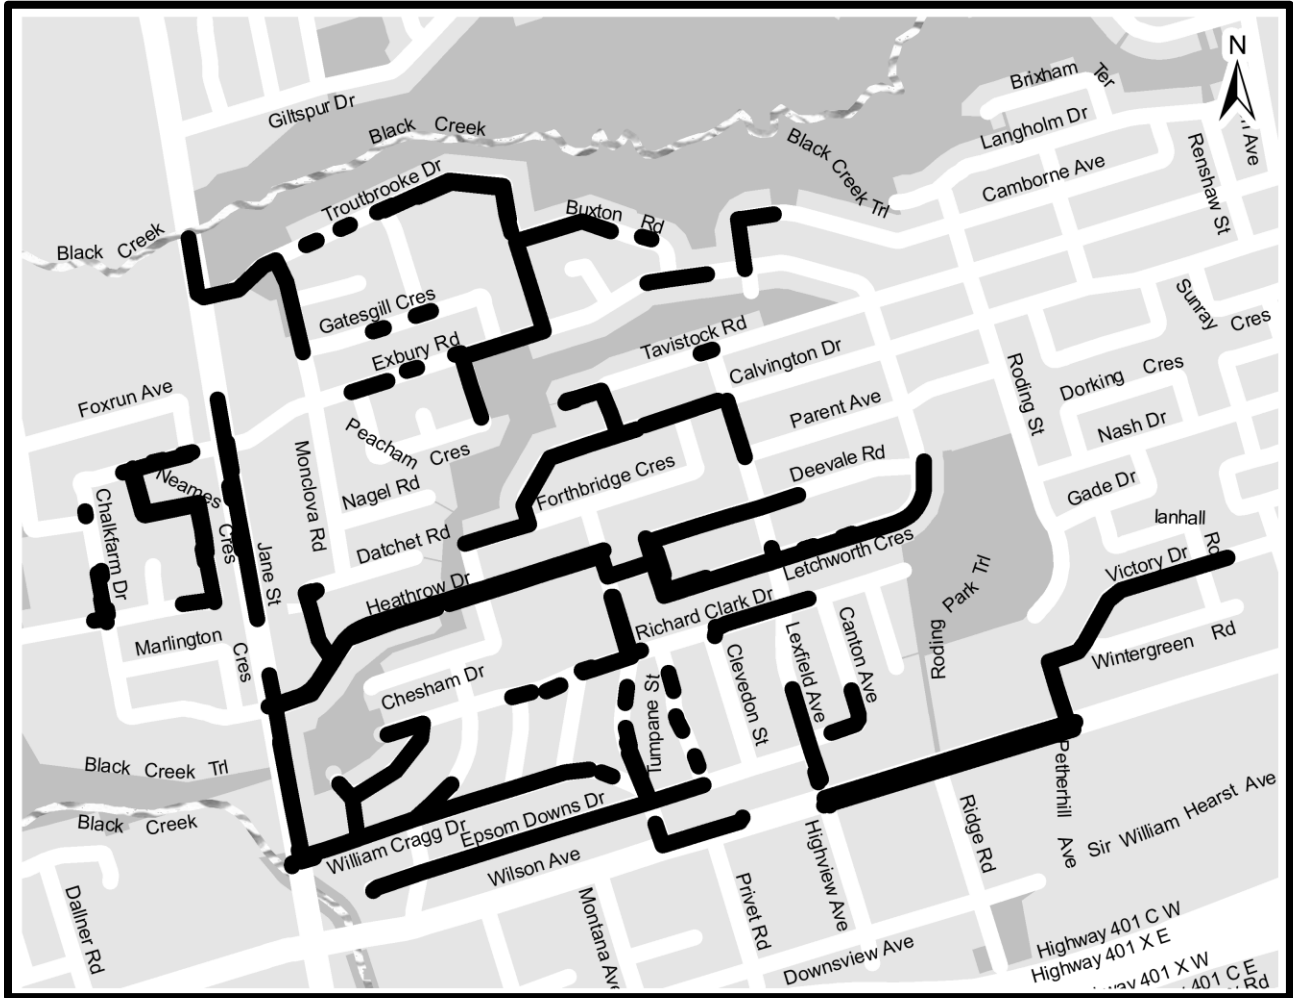

IMPORTANT INFORMATION ABOUT LEAD WATER SERVICES

If you live within the areas shown in the map in a house that was built before the mid-1950s, your water service may be made of lead. Please read the attached fact sheet with important information about the risks of lead in drinking water, especially if someone in your house is pregnant, there are children under six years old, or there is an infant drinking formula made using tap water.

WHAT TO EXPECT BEFORE CONSTRUCTION

- Work crews will mark the locations of underground utilities, such as gas, water and cable so that the construction work does not interfere with these utilities.
- Affected properties will receive a Construction Notice approximately two weeks before work begins with more information about the work.
- The City will not be responsible for damage to any privately owned items on City property, so please ensure that you remove/arrange for removal of each item prior to construction.

	<p>Accessible Accommodation: Residents who require accommodation (level entry, longer notice, etc.) must contact the Field Ambassador to arrange for access during the construction period.</p>
	<p>Important information for owners of sprinkler systems/heated driveways and private landscaping features. Property owners should remove items located within City property limits (boulevard) to avoid damage.</p> <p>This includes items such as landscaping (plants and pavers), decorative objects, sprinkler systems or heated driveways. For details on removal of such items, please contact the Field Ambassador listed below.</p>
	<p>Substandard Water Service Replacement: Please take the time to read the attached fact sheet carefully as it contains important information on lead in drinking water and how to prepare for replacement. First, you need to find out if your water service is lead – a licensed plumber can help you with this. If it is lead, the City of Toronto encourages you to replace it. We recommend you obtain several quotes. PLEASE NOTE: The City is not able to get involved in any contract to have work done on private property. Property owners are responsible for ensuring contractors do not interfere with the work being done on City property. Learn more at www.toronto.ca/leadpipes</p>
