WHAT TO DO IF YOUR CHILD HAS COVID-19 SYMPTOMS

If your child has one or more (new or worsening) symptoms of COVID-19, they should stay at home, self-isolate, and get tested.

If your child has only one of the symptoms (i.e. sore throat, stuffy/runny nose, headache, nausea/vomiting/diarrhea, or muscle ache/fatigue), they should stay home for 24 hours. If the symptom is improving, they can return to school 24 hours later. Testing is not required. If the symptom is not improving after 24 hours, or is getting worse, the student should stay home, self-isolate and get tested or contact their health care provider.

Call your child’s school to let them know that your child has COVID-19 symptoms.

HOUSEHOLD MEMBERS SHOULD SELF-MONITOR FOR SYMPTOMS
Household members should monitor for symptoms for 14 days. They can go to school or work if they do not have symptoms and the child with symptoms has not tested positive for COVID-19. This includes while you are waiting for the test results. If the child has symptoms and was a close contact of someone who had COVID-19 then household members should stay home and self-isolate.

GET TESTED
Contact your child's health care provider if you have questions about testing. Find an Assessment Centre near you to get tested. Children can often get a swab of the throat and each nostril, so it is more comfortable than a deep nasal swab. Saliva tests are also available.

When going to an assessment centre, don't use public transit. Drive your child if you can, ask for a ride, or use a taxi or ride share. Wear a mask, sit in the back seat, and keep the windows open.

CHECK YOUR CHILD'S TEST RESULTS
You can check your test results at covid-19.ontario.ca by clicking on "check your lab results." Results can take a few days.
WHAT TO DO IF YOUR CHILD HAS COVID-19 SYMPTOMS

If your child TESTS NEGATIVE for COVID-19:
- Your child may return to school if it has been 24 hours since their symptoms started improving.
- Young children may have ongoing mild symptoms, such as a runny nose. If it is not new or worse, they may go back to school if they don’t have other symptoms.

If your child TESTS POSITIVE for COVID-19:
- Your child must stay home and self-isolate for 10 days from the day the symptoms started.
- Household members and close contacts must also self-isolate for 14 days.
- Let your school know that your child tested positive for COVID-19.
- Toronto Public Health will contact you to do an investigation and with further instructions.

NOT TESTED
If your child has COVID-19 symptoms and did not have a COVID-19 test, they must stay home and self-isolate for 10 days from the day the symptoms started. Even if their symptoms get better sooner, they will need to stay home for 10 days. Household members will continue to self-monitor for 14 days. Household members can continue to attend school or work as long as they do not have any symptoms.

SICK FOR OTHER REASONS
Sometimes children are sick for other reasons. If your health care provider has said your child’s symptoms are not related to COVID-19, your child may return to school once it has been 24 hours since their symptoms started improving. If your child has new or worsening cold or respiratory symptoms, your health care provider cannot rule out COVID-19 without a test. Note that Toronto Public Health does not recommend requiring a medical note to confirm this.
