

COVID-19 Decision Tool for Post-Secondary Institutions

October 13, 2020

For all situations listed in the flow chart below:

- **(A)** Anyone who is a close contact of a positive case will have to isolate for 14 days, and should arrange to get tested. If the person who is a close contact develops symptoms, their household members will need to stay home and self-isolate until COVID-19 is ruled out.
- **(B)** Anyone who has travelled outside of Canada is required to self-isolate for 14 days. Their household members do not need to self-isolate if they have not travelled, if they don't have symptoms, and if they are not a close contact of a positive case.
- Symptoms are listed in the [self-screening questionnaire](#).
