For all situations listed in the flow chart below:

- **(A)** Anyone who is a close contact of a positive case will have to isolate for 14 days, and should arrange to get tested. If the person who is a close contact develops symptoms, their household members will need to stay home and self-isolate until COVID-19 is ruled out.

- **(B)** Anyone who has travelled outside of Canada is required to self-isolate for 14 days. Their household members do not need to self-isolate if they have not travelled, if they don’t have symptoms, and if they are not a close contact of a positive case.

- Symptoms are listed in the self-screening questionnaire.

---

**Staff/students to complete the self-screening questionnaires** every day at home and follow the prompts.

**Have symptoms**

- Stay home, self-isolate and arrange to get tested.

- **Household members should self-monitor for symptoms.**

- They can go to school/work, if they don’t have symptoms and A and B do not apply.

**Go for test**

- **Test Positive:** Staff/students who are ill should stay home, self-isolate for at least 10 days, and follow advice from public health. They should not go to school/work.

- **Household members should self-isolate and follow public health advice.**

- **Test Negative:** Staff/students can go back to school/work if it has been 24 hours since their symptoms started improving as long as A and B do not apply.

- **Household members should self-monitor for symptoms and can go to school/work as long as A and B do not apply.**

**Did not go for test**

- **Stay home and self-isolate for 10 days or more.**

  - They can go back to school/work, after 10 days and if their symptoms are improving, as long as A and B do not apply.

  - **Household members should self-monitor for symptoms.** They can go to school/work, if they don’t have symptom and A and B do not apply. If they develop symptoms, they need to self-isolate and arrange to get tested.

---

**Test Positive:**

Staff/students with an alternative diagnosis from a health care provider can go back to school, once their symptoms are improving for 24 hours, as long as A and B do not apply.
