

CARPOOLING TO WORK

If you carpool to work, here are some tips to help reduce opportunities for COVID-19 to spread in closed spaces:

Stay home if you are sick or had close contact with a person who has COVID-19.

Try to ride with the same people each day to limit the number of passengers.

Wash or sanitize your hands, & clean & disinfect surfaces before & after each trip.

Wear your mask at all times when inside vehicles.

Sit as far apart as possible (i.e. one person in the front and one in the back).

Open the windows while driving, if the weather permits.
