

Confirmation Form for COVID-19 Vaccines

Pfizer-BioNTech, Moderna, AstraZeneca/COVISHIELD & Janssen

Updated March 10, 2021

Before making an appointment, please screen for the following conditions to ensure this vaccine is right for you.

A. Do not get this vaccine & speak with an allergist or your health care provider if you:

- have an allergy to an ingredient in the vaccine
- have allergies to polyethylene glycol (PEG), thiomersal or polysorbate
- had a severe allergic reaction to a previous COVID-19 vaccine
- had a severe reaction, within 4 hours after receiving a vaccine or a medication, given by injection

B. Consult your health care provider, before making an appointment, if you:

- are pregnant, could be pregnant or breastfeeding
- have an autoimmune disorder
- have an illness that causes a weakened immune system
- are taking medication that can lower the immune system [e.g. chemotherapy or high-doses of steroids]

I have one of the above conditions:

- I am confirming that I had a conversation with my health care provider about the risks and benefits of receiving the COVID-19 vaccine, given my current condition, and will get vaccinated.
- My health care provider said it is safe to get this vaccine, and has advised me to stay at the clinic for 30 minutes to monitor for reactions.
- My health care provider said I should not receive the vaccine.

C. Wait until you are feeling better, if you:

- have a fever or COVID-19 symptoms
- have received a vaccine in past 14 days
