Road Resurfacing on Forest Hill Road and Kilbarry Road

Contract: 20ECS-TI-13LR

Start Date: April 5, 2021

End Date: July 9, 2021

**Timeline is subject to change.*

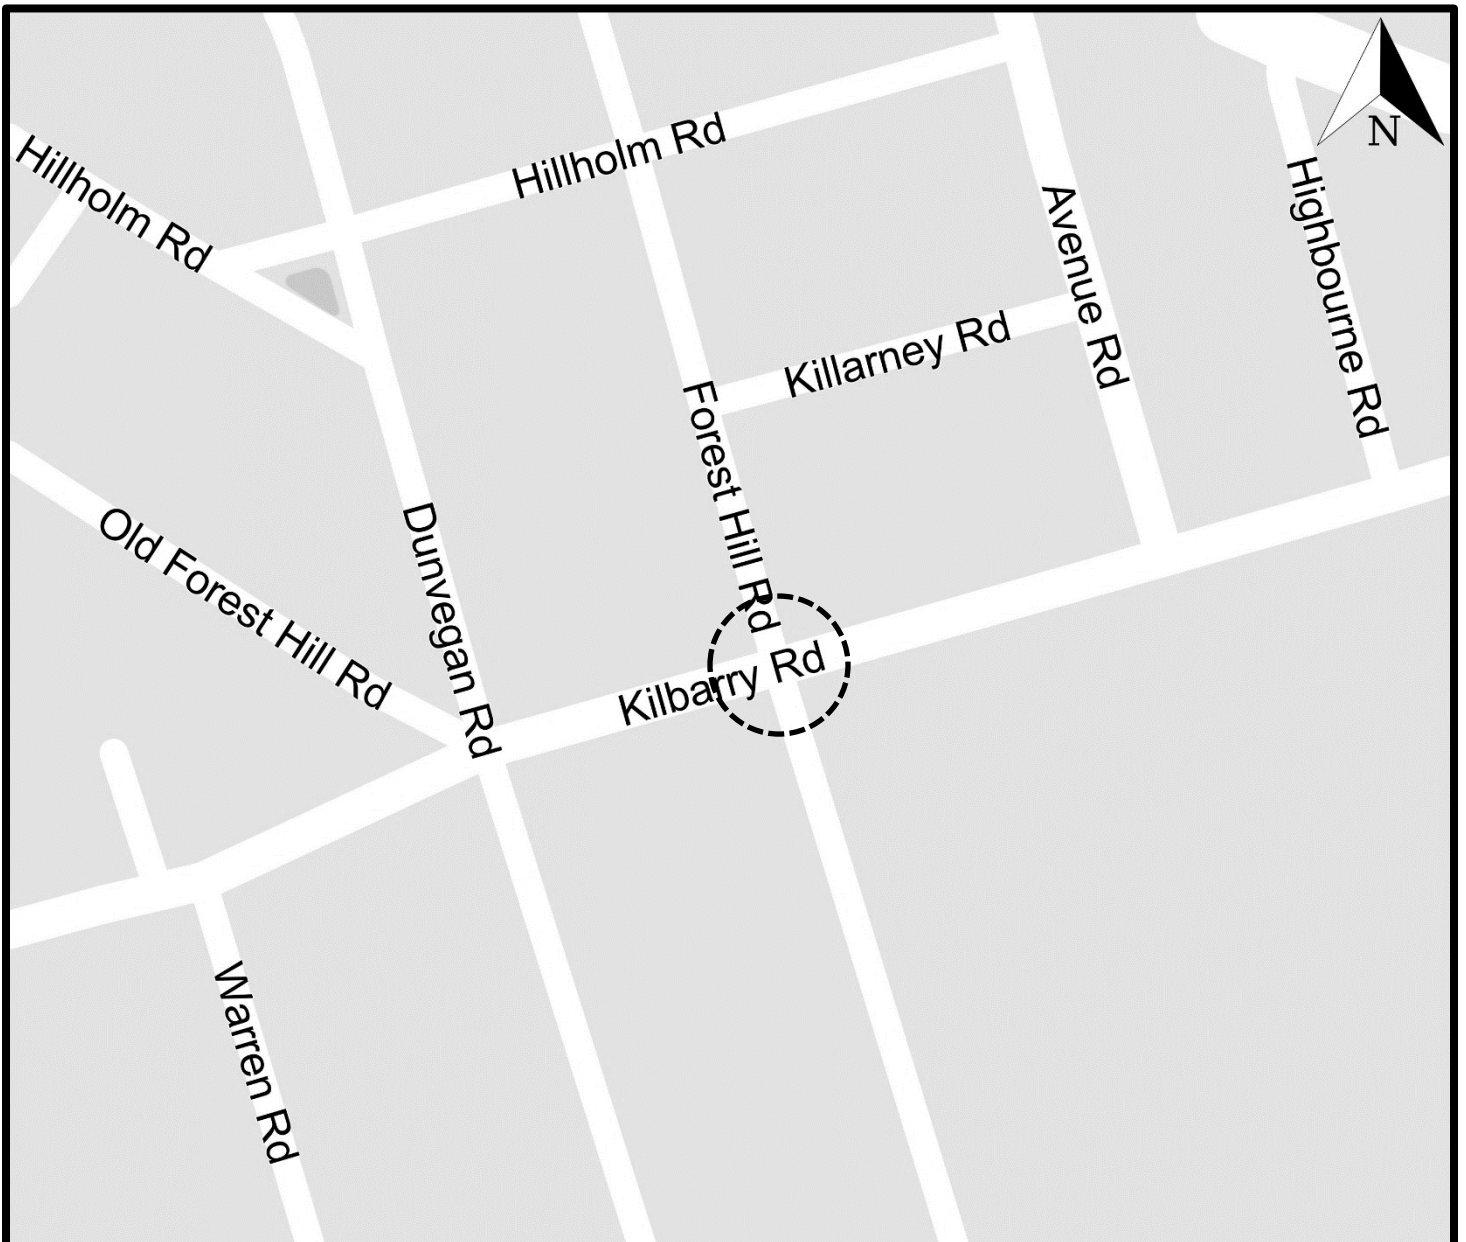

In 2020, the City resurfaced Forest Hill Road and Kilbarry Road. As part of the Vision Zero Road Safety Plan, the City's contractor will return to implement a number of effective road safety measures to help create better sight lines for pedestrians, cyclists, and drivers, shorten pedestrian crossing distances and encourage drivers to move at the speed limit. The measures will be installed at the Forest Hill Road and Kilbarry Road intersection.

The improvements are part of the Council-Approved 2020 budget and the City's Vision Zero Road Safety Plan that aims to create a safe and healthy city by eliminating all fatalities and serious injuries on city streets.

IMPORTANT INFORMATION ABOUT COVID-19 AND CONSTRUCTION WORK IN TORONTO

During construction, the contractor is responsible for the Health & Safety on site under the Ontario Occupational Health and Safety Act and is expected to implement COVID-19 mitigation practices. For more information on the City's response to COVID-19 please visit toronto.ca/covid-19.

MAP OF WORK AREA

PLANNED ROAD SAFETY IMPROVEMENTS

<p>INTERSECTION NORMALIZATION</p>	<p>Irregular intersections (e.g. Skewed, offset or complex) are reconfigured to:</p> <ul style="list-style-type: none"> • Increase visibility and shorten crossing distances for pedestrians • Lower vehicle speeds from smaller turning radii.
<p>CURB RADII REDUCTIONS</p> 	<p>The curb radii is the curved section that connects two intersecting streets. Reducing curb radii can:</p> <ul style="list-style-type: none"> • Deter drivers from making right turns at high speeds • Improve pedestrian crossing distances and visibility • Increase the space available for pedestrians waiting to cross.
<p>CURB EXTENSIONS</p> 	<p>Curb extensions, also known as bump-outs, reduce the pavement width at intersections by extending the curb into the roadway. They help to:</p> <ul style="list-style-type: none"> • Reduce crossing distance and time a pedestrian is exposed to traffic • Increase visibility of users • Physically and visually narrow the road, slowing vehicles.
