Basement Flooding Protection Program

Sanitary and Storm Sewer Upgrades, Watermain Replacement and Local Road Resurfacing in North York

Contract: 20ECS-LU-08FP

Start Date: Spring 2021 End Date: Summer 2023

**Timeline is subject to change. Please note that construction on each street will take place between 2021 and 2023, not for the entire duration of the Contract.*

The City of Toronto is modifying and upgrading the storm and sanitary sewer system in your area in order to reduce surface basement flooding. This work also involves replacing the City-owned portion of substandard water services and sanitary sewer laterals. Work is planned on the following streets (see map on page 2).

Street	Limits
Stuart Crescent	From Botham Road to 18 m east of Botham Road
Franklin Avenue	From Bassano Road to Gwendolen Crescent
Radine Road	From 77 m north of Stuart Avenue to Poyntz Avenue
Cameron Avenue	From Bassano Road to 27 m west of Radine Road
Pewter Road	From Cameron Avenue to Florence Avenue
Florence Avenue	From 97 m east of Pewter Road to 12 m west of Radine Road
Johnston Avenue	From 78 m east of Easton Road to 145 m west of Botham Road
Poyntz Avenue	From 48 m west of Senlac Road to 52 m west of Beaman Road
Senlac Road	From 26 m north of Senlac Road to Poyntz Avenue
Fennell Street	From 26 north of Fennell Street to Poyntz Avenue
Harlandale Avenue	From Senlac Road to 73 m west of Welbeck Road
Brentwood Avenue	From Sheppard Avenue West to 35.5 m north of Roycrest Avenue
Roycrest Avenue	From 155 m west of Brentwood Avenue to Brentwood Avenue
Wentworth Avenue	From 74 m west of Eddfield Avenue to 47 m west of Eddfield Avenue
Burndale Avenue	From 15 m east of Senlac Road to 44 m east of Senlac Road

The sanitary service lateral is the pipe connecting your home's sewage plumbing to the City's sewer. The water service is the underground pipe that brings water to your water meter and is owned by you and by the City. The part you own is from your house to the end of your property, the part the City owns is from the end of your property to the watermain.

This project is part of the Council-approved 2021 Basement Flooding Protection Program to improve the water distribution system; renew our aging infrastructure, and reduce the risk of sewer collapse or blockages that cause sewer backups and flooding

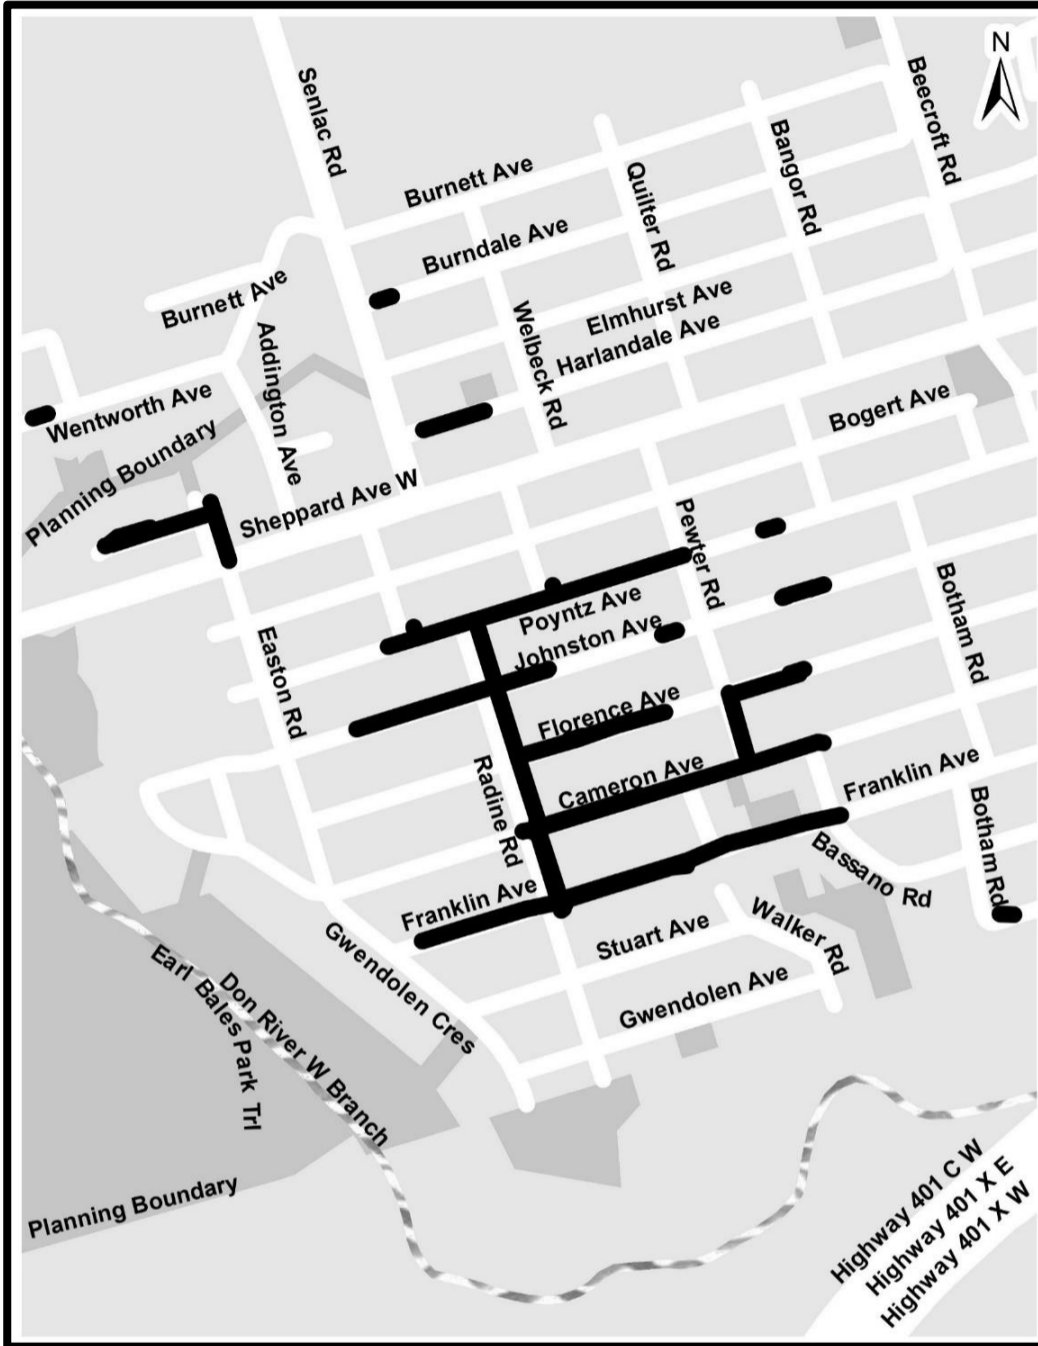

IMPORTANT INFORMATION ABOUT COVID-19 AND CONSTRUCTION WORK IN TORONTO

During construction, the contractor is responsible for the Health & Safety on site under the Ontario Occupational Health and Safety Act and is expected to implement COVID-19 mitigation practices. For more information on the City's response to COVID-19 please visit toronto.ca/covid-19.

IMPORTANT INFORMATION ABOUT LEAD WATER SERVICES

If you live in the areas depicted in the map in a house that was built before the mid-1950s, your water service may be made of lead. Please read the attached fact sheet with important information about the risks of lead in drinking water, especially if someone in your house is pregnant, there are children under six years old, or there is an infant drinking formula made using tap water.

MAP OF WORK AREA

WHAT TO EXPECT BEFORE CONSTRUCTION

- Work crews will mark the locations of underground utilities, such as gas, water and cable so that the construction work does not interfere with these utilities.
- Affected properties will receive a Construction Notice approximately two weeks before work begins with more information about the work.
- The City will not be responsible for damage to any privately owned items on City property, so please ensure that you remove/arrange for removal of each item prior to construction.

	<p>Accessible Accommodation: Residents who require accommodation (level entry, longer notice, etc.) must contact the Field Ambassador to arrange for access during the construction period.</p>
	<p>Access to Your Home: The City-hired contractor may need access to the interior and exterior of your home to complete a pre-construction condition survey. Affected properties will receive a request to schedule a time to complete the pre-construction condition survey. Although participation is voluntary, the pre-construction survey results may be useful to confirm claims for potential damage caused by City construction.</p>

	<p>Important information for owners of sprinkler systems/heated driveways and private landscaping features. Property owners should remove items located within City property limits (boulevard) to avoid damage.</p> <p>This includes items such as landscaping (plants and pavers), decorative objects, sprinkler systems or heated driveways. For details on removal of such items, please contact the Field Ambassador listed below. The Construction Notice, distributed closer to the start of construction, will provide more information on objects located on the City's Right of Way.</p>
	<p>Substandard Water Service Replacement: Please take the time to read the attached fact sheet carefully as it contains important information on lead in drinking water and how to prepare for replacement. First, you need to find out if your water service is lead – a licensed plumber can help you with this. If it is lead, the City of Toronto encourages you to replace it. We recommend you obtain several quotes. PLEASE NOTE: The City is not able to get involved in any contract to have work done on private property. Property owners are responsible for ensuring contractors do not interfere with the work being done on City property. Learn more at www.toronto.ca/leadpipes</p>

NEED MORE INFORMATION?

If you have questions about the upcoming work, please contact us.
