Road Reconstruction & Green Infrastructure Installation on Winnett Avenue from Durham Avenue to Arlington Avenue

Contract: 20ECS-TI-02LR

Start Date: Summer 2021 End Date: Fall 2021

**Timeline is subject to change.*

The City of Toronto is planning to reconstruct Winnett Avenue from Durham Avenue to Arlington Avenue. Our inspection of the road shows that it needs reconstruction and sections of damaged curb and sidewalk need to be replaced to bring them to a state of good repair. Green Infrastructure refers to natural and engineered structures that allow for rain runoff to be captured and cleaned before entering creeks. Permeable pavement is an example of Green Infrastructure that allows stormwater to drain through the surface into a subsurface stone reservoir. A lane within the road will be constructed with permeable pavement on the west side of Winnett Avenue from Durham Avenue to 392 Winnett Avenue.

In addition, the City will replace the City-owned portion of substandard water services. The water service is the underground pipe that brings water to your water meter and is owned by you and by the City. The part you own is from your house to the end of your property, the part the City owns is from the end of your property to the watermain.

This project is part of the Council-approved 2021 Capital Works Program to renew aging city roads and sidewalk for current and future needs.

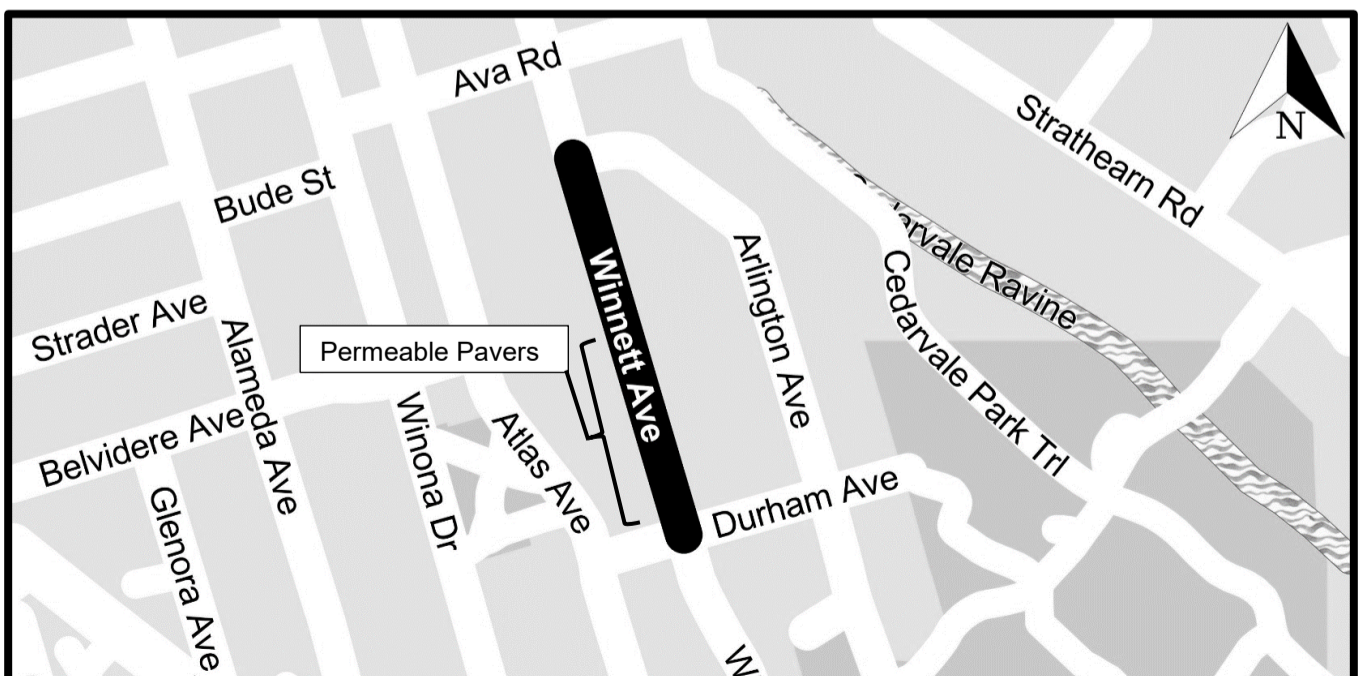

IMPORTANT INFORMATION ABOUT COVID-19 AND CONSTRUCTION WORK IN TORONTO

During construction, the contractor is responsible for the Health & Safety on site under the Ontario Occupational Health and Safety Act and is expected to implement COVID-19 mitigation practices. For more information on the City's response to COVID-19 please visit toronto.ca/covid-19.

IMPORTANT INFORMATION ABOUT LEAD WATER SERVICES

If you live on Winnett Avenue between Durham Avenue and Arlington Avenue in a house that was built before the mid-1950s, your water service may be made of lead. Please read the attached fact sheet with important information about the risks of lead in drinking water, especially if someone in your house is pregnant, there are children under six years old, or there is an infant drinking formula made using tap water.

MAP OF WORK AREA

WHAT TO EXPECT BEFORE CONSTRUCTION

- Work crews will mark sidewalks and curbs requiring replacement and the locations of underground utilities, such as gas, water and cable so that the construction work does not interfere with these utilities.
- Affected properties will receive a Construction Notice approximately two weeks before work begins with more information about the work.
- The City will not be responsible for damage to any privately owned items on City property.

	<p>Accessible Accommodation: Residents who require accommodation (level entry, longer notice, etc.) must contact the Project Manager to arrange for access during the construction period.</p>
	<p>Access to Your Home The City-hired contractor may need access to the exterior of your home to complete a pre-construction survey. Affected properties will receive a pre-construction survey request to schedule a time to complete the survey.</p>
	<p>Important information for owners of sprinkler systems / heated driveways and private landscaping features. Property owners should remove items located within City property limits (boulevard) to avoid damage.</p> <p>This includes items such as landscaping (plants and pavers), decorative objects, sprinkler systems or heated driveways. If you have a sprinkler system or heated driveway, please contact the Project Manager listed below.</p>
	<p>Substandard Water Service Replacement: Please take the time to read the attached fact sheet carefully as it contains important information on lead in drinking water and how to prepare for replacement. First, you need to find out if your water service is lead – a licensed plumber can help you with this. If it is lead, the City of Toronto encourages you to replace it. We recommend you obtain several quotes. PLEASE NOTE: The City is not able to get involved in any contract to have work done on private property. Property owners are responsible for ensuring contractors do not interfere with the work being done on City property. Learn more at www.toronto.ca/leadpipes</p>
