Basement Flooding Protection Program Sanitary and Storm Sewer Upgrades on Roywood Drive and Other Local Roads

Contract: 20ECS-LU-07FP

Start Date: September 20, 2021 End Date: June 2023

**Timeline is subject to change. Please note that construction on each street will take place between 2021 and 2023, not for the entire duration of the Contract.*

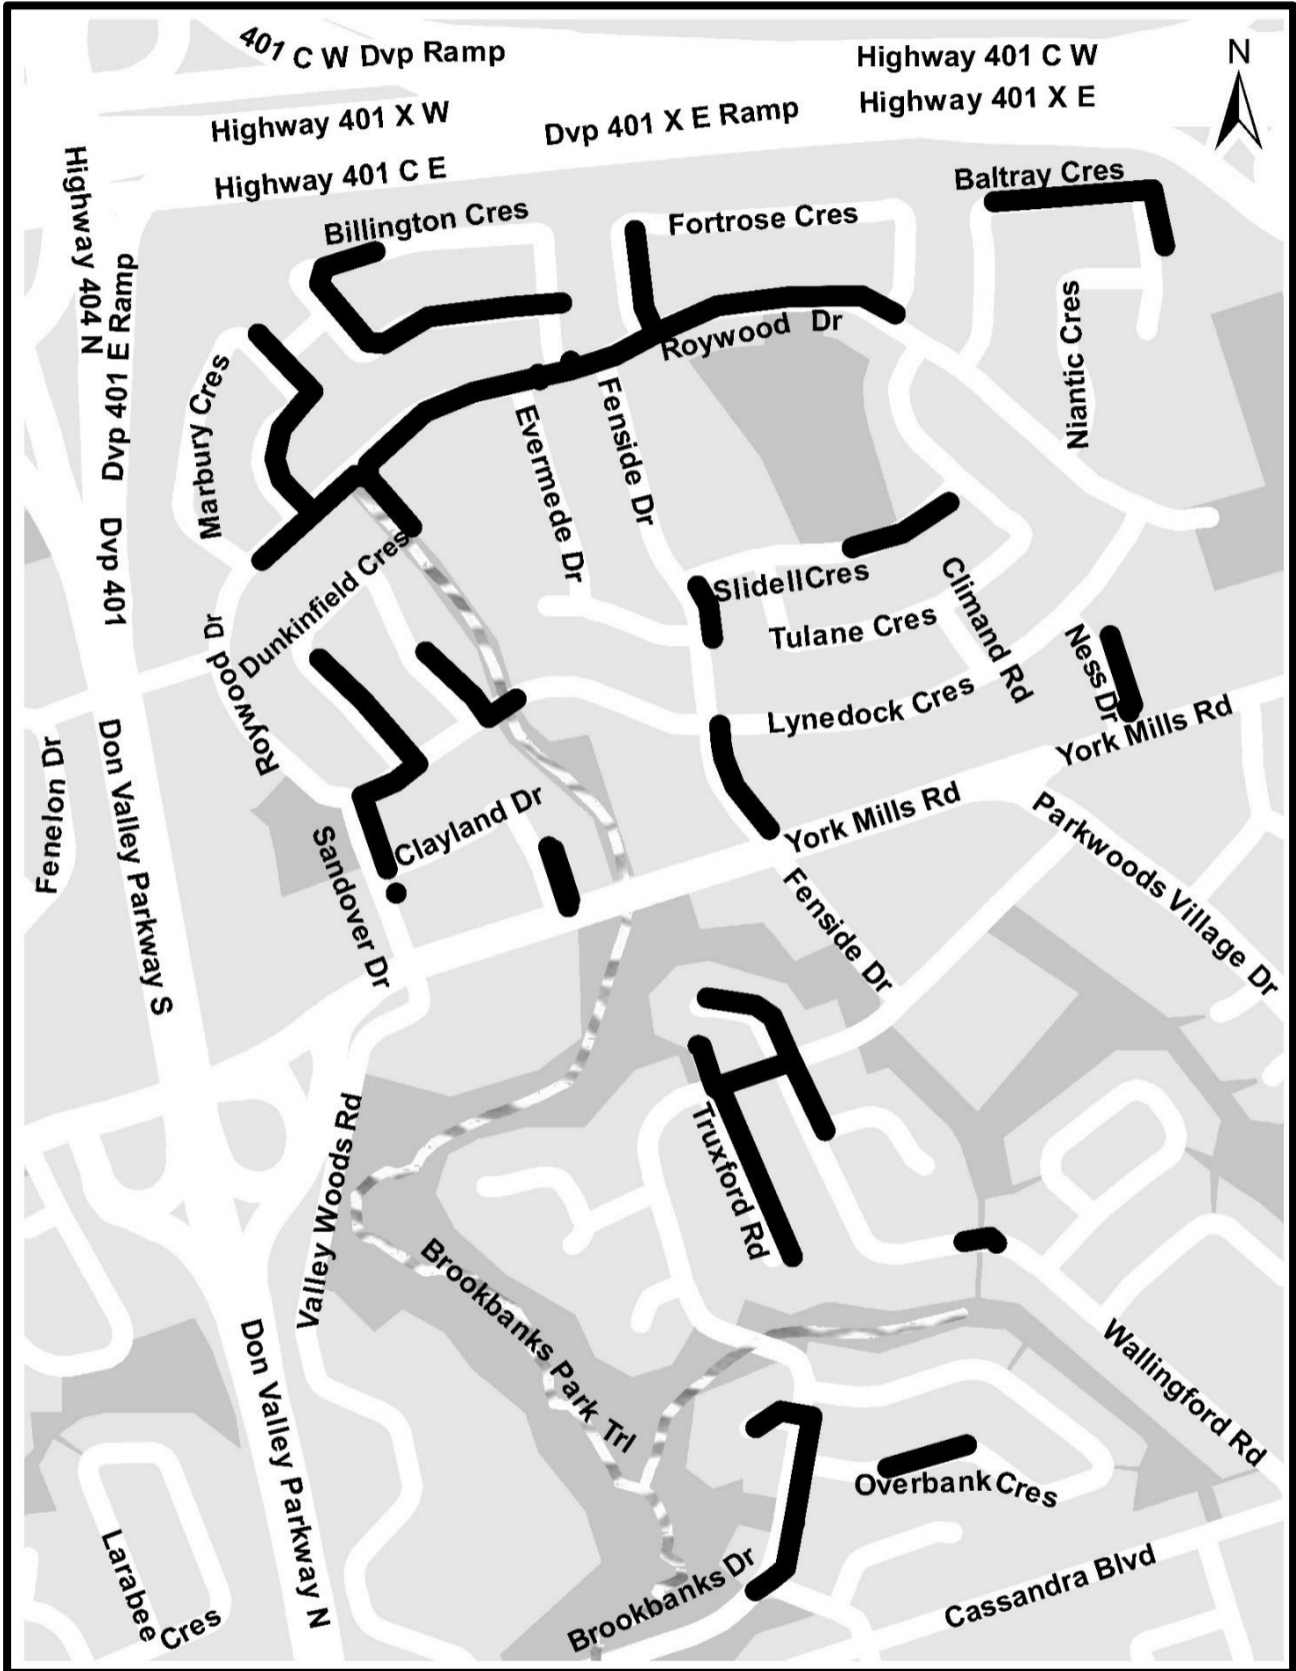

The City of Toronto is modifying and upgrading the storm and sanitary sewer system in your area in order to reduce surface and basement flooding. This work also involves replacing the City-owned portion of substandard water services and sanitary sewer laterals. Work is planned on the following streets (see map on page 2).

Street Name	Storm Sewer	Sanitary Sewer	Watermain	Inlet Control
Baltray Crescent	✓			
Billington Crescent	✓			
Brookbanks Drive	✓			✓
Brookbanks Park Trail	✓			
Brushwood Court	✓			
Clayland Drive	✓	✓		✓
Don River E Branch	✓			
Dukinfield Crescent	✓			
Fenside Drive	✓			✓
Fortrose Crescent	✓			
Hockley Place	✓			✓
Lynedock Crescent	✓			✓
Marbury Crescent	✓			
Ness Drive	✓			
Overbank Crescent	✓			
Roywood Drive	✓		✓	✓
Sandover Drive	✓			✓
Skelmore Crescent	✓			
Slidell Crescent	✓			✓
Truxford Road	✓			
Versend Drive	✓			
Wallingford Road	✓			✓

The mainline sewer work will be limited curb to curb. Any objects (i.e. sprinklers, landscaping features etc.) located on the City's Right of Way in front of your property may be impacted by the sewer lateral and water service connections/upgrades. In this case, you will receive a separate notice in advance of the work.

The sanitary service lateral is the pipe connecting your home's sewage plumbing to the City's sewer. The water service is the underground pipe that brings water to your water meter and is owned by you and by the City. The part you own is from your house to the end of your property, the part the City owns is from the end of your property to the watermain.

This project is part of the Council-approved 2021 Basement Flooding Protection Program to improve the water distribution system; renew our aging infrastructure, and reduce the risk of sewer collapse or blockages that cause sewer backups and flooding.

MAP OF WORK AREA

IMPORTANT INFORMATION ABOUT COVID-19 AND CONSTRUCTION WORK IN TORONTO

During construction, the contractor is responsible for the Health & Safety on site under the Ontario Occupational Health and Safety Act and is expected to implement COVID-19 mitigation practices. For more information on the City's response to COVID-19 please visit toronto.ca/covid-19.

IMPORTANT INFORMATION ABOUT LEAD WATER SERVICES

If you live in the area depicted in the map in a house that was built before the mid-1950s, your water service may be made of lead. Please read the attached fact sheet with important information about the risks of lead in

drinking water, especially if someone in your house is pregnant, there are children under six years old, or there is an infant drinking formula made using tap water.

WORK DETAILS

The City's contractor will:

- excavate the road and dig a trench to install the new and/or replace existing sewers and/or watermain;
- replace any City-owned sewer/water service laterals that do not meet City standards from the sewer/watermain to the private property line; and
- restore all areas affected by construction, including resurfacing the trench areas in the roadway.

WHAT TO EXPECT DURING CONSTRUCTION

- You may experience dust, noise and other inconveniences. The City will make efforts to reduce the impacts. We appreciate your patience.
- The City will not be responsible for damage to any privately owned items on City property, so please ensure that you remove/arrange for removal of each item prior to construction

	<p>Work Hours: Work will take place from 7 a.m. to 7 p.m., Monday to Friday, with work after hours and on weekends as required.</p>
	<p>Pre-Construction Inspection: WHS (Wristen's Home Specialties Inc.) under contract to the City of Toronto, will survey all properties within 30 metres of the construction area before construction starts. The inspection will look at the interior and exterior of all properties to verify existing conditions. Although participation is voluntary, the City encourages all homeowners to participate. Without the survey, it will be difficult to confirm any claims of damage caused by construction. Affected properties will receive a separate notice to set up an appointment. All inspection staff will wear photo I.D. and carry photo equipment for this work.</p>
	<p>Physical Distancing: There are times when contractors need to communicate with homeowners about what is happening on-site. This could be about driveway access, water shut offs, pre-construction inspections, and site restoration work (landscaping, installing pavers etc.). Contractor's staff will be identifiable by their high-visibility clothing and will maintain physical distancing.</p>
	<p>Site Safety: Workers on site are responsible for the work assigned to them. If you have construction questions or an issue on site – ask to be directed to the site inspector. If the site inspector is unavailable, contact the person listed at the end of this notice.</p>
	<p>Important information for owners of sprinkler systems/heated driveways and private landscaping features. Property owners should remove items located within City property limits (boulevard) to avoid damage. This includes items such as landscaping (plants and pavers), decorative objects, sprinkler systems or heated driveways. For details on removal of such items, please contact the Field Ambassador listed below.</p>
	<p>Telephone and Internet Services: This work may affect phone and internet cables for individual properties that aren't buried deep below the sidewalk. The contractor will coordinate with utility companies to minimize disruption. Residents who find their service has been disrupted should contact the Field Ambassador <u>and</u> notify their phone or internet service provider.</p>
	<p>Water Service Disruptions: From time-to-time, the water supply to your property will be shut-off to complete construction; the contractor will provide notice at least 24-hours in advance. Throughout the work, it is recommended that you temporarily disconnect any water treatment systems (i.e. softeners or filters), water-cooled air conditioners or similar plumbing fixtures. Automatic lawn sprinkler systems may also be affected, therefore, you</p>

	<p>may need to water manually. In the event you did not receive advance notice, the City may have needed to use an emergency water shut off to complete work.</p>
	<p>Substandard Water Service Replacement: Please take the time to read the attached fact sheet carefully as it contains important information on lead in drinking water and how to prepare for replacement. If you want to replace the private portion-of the water service pipe, the City of Toronto recommends that you obtain several quotes before selecting a contractor. PLEASE NOTE: The City is not able to get involved in any contract to have work done on private property. Property owners are responsible for ensuring contractors do not interfere with the work being done on City property. Learn more at www.toronto.ca/leadpipes.</p>
	<p>Road and Sidewalk Access: In order to complete the work in a safe manner, there will be road and sidewalk restrictions within the work zone. Access for emergency vehicles will be maintained at all times.</p> <p>Driveway Access: The contractor will notify you of any temporary restrictions to your driveway access. If your property has two entrances, one entrance will be kept open at all times.</p>
	<p>Traffic Management: Road users should expect delays and increased traffic on nearby main and side streets. Motorists are reminded that bicycles and cars will be sharing the lane. When driving, please be mindful of vulnerable road users.</p> <p>One lane of traffic on streets will be maintained in both directions at all times. Rolling closures may be required. A rolling closure is a full road closure, 20-30m in length that moves along with the contractor as the work proceeds. The road will be fully opened at the end of each day.</p>
	<p>City Owned Trees: Due to the nature of this project, the City may have to remove 3 street trees from the City's boulevard, 50 trees from Brookbanks Park Trail and 83 trees from Lynedock Park. If this affects a tree near your property, you will receive a separate notice in advance of the work. For street trees removed, there is a 3:1 ratio for replanting. The City will replant the trees where there is adequate space in the boulevard.</p> <p>Privately Owned Trees: If a private tree is equal to or greater than 30cm Diameter at Breast Height (DBH), it is protected under the City's by-laws and any impacts are subject to review and approval by the City's Forestry Division. Removed, protected trees require a 3:1 ratio for replanting. At the private property owner's discretion, the contractor will replant the trees where there is adequate space on the private property. If this affects a protected tree on your property, the City's Forestry Division will notify you in advance on the work. As the private property owner, you will have the final decision regarding any impacts to the tree.</p>
	<p>Parking: This project will affect on-street parking. Parking in the active work zone is not permitted as space is needed for construction equipment and materials. If your parked vehicle affects construction work, it will be relocated with no charge to the owner. Please call 416-808-2222 for its location.</p>
	<p>Parking Violation Notice: If parking enforcement is called to a street, officers must issue a yellow parking violation notice (ticket) to vehicles in violation of parking by-laws. If you receive a yellow notice during this construction work, do the following within 15 days of the notice date:</p> <ol style="list-style-type: none"> 1) Contact the site inspector or person listed on the Construction Notice and give them the yellow notice number. 2) Dispute the parking violation notice online or in person following the process listed on the back of the parking violation notice. <p>You may use this construction notice as part of the explanation of why the violation should be cancelled. Please note: violation notices cannot be cancelled if vehicles are parked in illegal parking spots (i.e. in front of a fire hydrant or in no parking zones). In an effort to reduce ticketing due to construction, please exercise patience with neighbours who are experiencing construction and may need to temporarily park on your street.</p>
	<p>Accessible Accommodation: The City's contractor must ensure safe and accessible walkways and entryways are maintained for everyone during construction. Any temporary access disruptions will be communicated as soon as possible. If you</p>

	experience a disruption, have a specific access need or related accommodation request, inform the contact listed below.
	Garbage and Recycling: Please follow your normal routine. If required, the contractor will move bins to an appropriate location and return them. <i>Please ensure that you label your bins with your address.</i>
	Water Flushing: You will see water flushing or running in several areas along this project enabling the contractor to clean the new watermain. Before substandard water services are replaced to properties and the new watermain is put into service, the contractor ensures the new pipe meets Toronto Water's servicing and quality standards. <i>Please DO NOT DRINK OR USE THE FLUSHING WATER, it is not potable.</i>
	Restoration: The construction work area will be restored with sod, concrete and/or asphalt where required to its initial condition. Interlocking bricks, flagstone on a granular base, or other similar features that are removed from public and private property during construction will be replaced. Lawn seeding and/or laying of sod will be done as needed during ideal growing seasons only - in the spring (April to June) and fall (September to October).

NEED MORE INFORMATION?

If you have questions about this construction project, please contact staff listed below. If you need to speak with staff on the construction site – please ask for the site inspector, respect physical distancing and wear a mask.
