Neighbourhood ID

Notes:

- 1 – The Neighbourhood Equity Index was developed by the City of Toronto Social Development, Finance & Administration Division for the Toronto Strong Neighbourhoods Strategy 2020. The scores are based on five domains: economic opportunities, social development, participation in decision-making, physical surroundings, and healthy lives. The greater the opportunities and services, the higher the score. Details at [toronto.ca/tsns2020](https://toronto.ca/tsns2020).
- 2 - The Neighbourhood Cycling Index is based on the proportion of street kilometres in the neighbourhood (excluding highways) that have cycling routes (cycle tracks, bike lanes, trails, quiet street sharrows). Current scores reflect the cycling network as of December 2020. The more cycling routes exist, the higher the score.
