## City Infrastructure Work on Inverness Avenue

**Contract: 21ECS-TI-104LR**  
**Start Date: March 9, 2022 End Date: June 2022**  
*\*Timeline is subject to change.*

The City of Toronto will complete infrastructure improvements on Inverness Avenue from Chartwell Road to Islington Avenue. Details of the work and locations are described below.

Street / Location	Road Resurfacing	Watermain and Substandard Water Service Replacement	New Sidewalk with Curb and Gutter Installation
Inverness Avenue from Chartwell Road to Parker Avenue	✓	n/a	n/a
Inverness Avenue from Parker Avenue to Rothsay Avenue	✓	✓	n/a
Inverness Avenue from Rothsay Avenue to Islington Avenue	✓	n/a	✓

The City of Toronto will install new sidewalks on the south side of Inverness Avenue between Rothsay Avenue and Islington Avenue. Sidewalks are a critical piece of transportation infrastructure which provide accessibility and safety for all, including vulnerable road users. Our data shows that sidewalks are missing on Inverness Avenue between Rothsay Avenue and Islington Avenue.

The City will replace the watermain and City-owned substandard water services on Inverness Avenue from Parker Avenue to Rothsay Avenue. The water service is the underground pipe that brings water to your water meter and is owned by you and by the City. The part you own is from your house to the end of your property, the part the City owns is from the end of your property to the watermain.

Inverness Avenue will be resurfaced. Our inspection of the road shows that it needs repaving and sections of damaged sidewalk need to be replaced to bring them to a state of good repair. The curb radii will also be reduced where possible at each intersection corner and mountable curbs will be installed.

Inverness Avenue was originally designed with ditches on both sides of the road to manage storm water runoff, instead of a storm sewer under the road. Ditches, as part of the drainage system, are intended to manage storm events within the City's right-of-way and prolong the lifespan of the roadway. The existing ditches will be regraded and existing culverts will be replaced.

This project is part of the Council-approved 2021 Capital Works Program to renew our aging infrastructure, improve water distribution and reduce the risk of watermain breaks. Installing new sidewalk is one way the City is committed to making the community safer and more accessible.

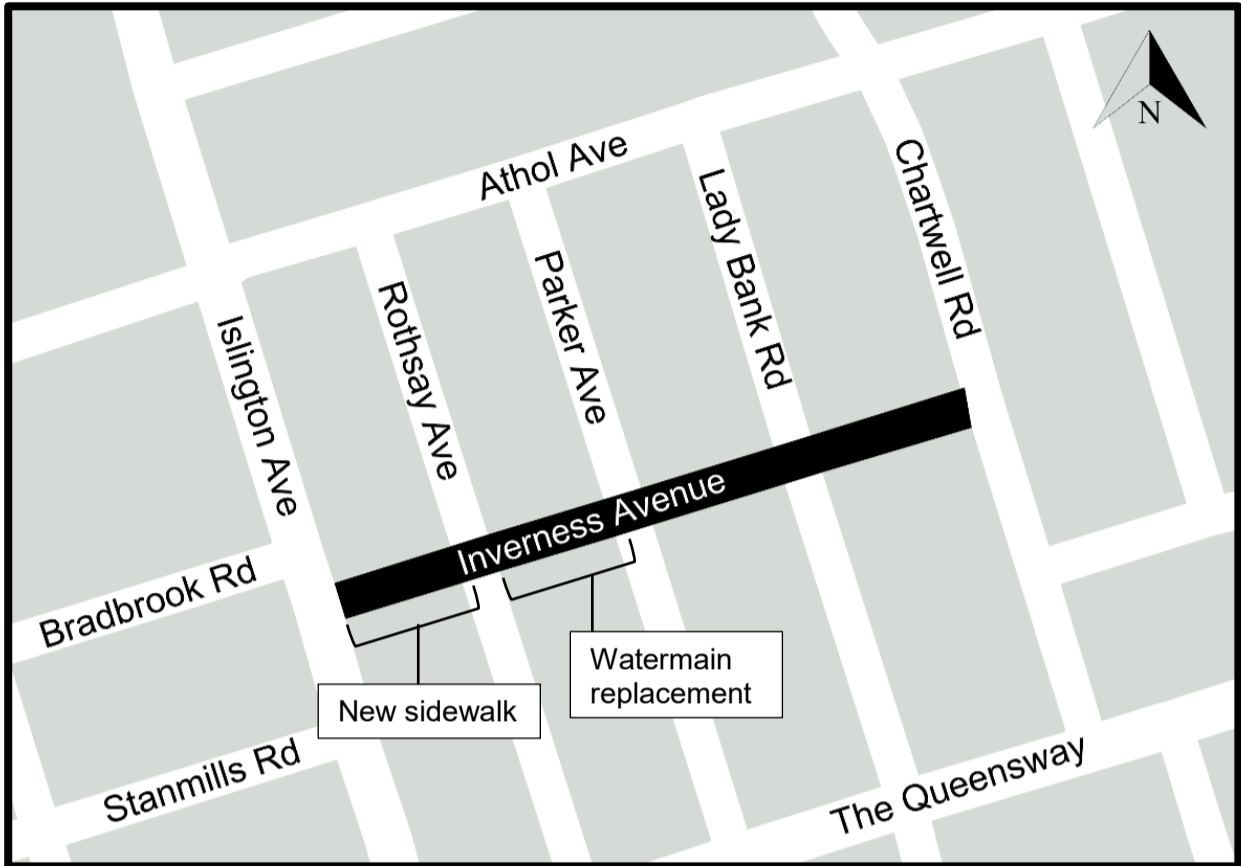

### IMPORTANT INFORMATION ABOUT COVID-19 AND CONSTRUCTION WORK IN TORONTO

During construction, the contractor is responsible for the Health & Safety on site under the Ontario Occupational Health and Safety Act and is expected to implement COVID-19 mitigation practices. For more information on the City's response to COVID-19 please visit [toronto.ca/covid-19](https://toronto.ca/covid-19).

### IMPORTANT INFORMATION ABOUT LEAD WATER SERVICES

If you live on Inverness Avenue between Parker Avenue and Rothsay Avenue in a house that was built before the mid-1950s, your water service may be made of lead. Please read the attached fact sheet with important information about the risks of lead in drinking water, especially if someone in your house is pregnant, there are children under six years old, or there is an infant drinking formula made using tap water.

## MAP OF WORK AREA

## WORK DETAILS

Phase 1: starting March 9, the City’s contractor will:

- Excavate the road and dig a trench to access and install the new watermain
- Replace any City-owned water service pipes that do not meet City standards from the watermain to the private property line

Phase 2:

- Mark the area where the new sidewalk will be installed on City-owned land (Right-of way)
- Dig out the marked area
- Install granular base
- Form the area for new sidewalk bays
- Pour concrete and install tactile plates where required
- Remove forms
- Resurface the road / watermain trench

## WHAT TO EXPECT DURING CONSTRUCTION

- You may experience dust, noise and other inconveniences. The City will make efforts to reduce the impacts. We appreciate your patience.
- The City will not be responsible for damage to any privately owned items on City property.

	<p><b>Work Hours:</b> Work will take place from 7 a.m. to 7 p.m., Monday to Friday, with work after hours and on weekends as required.</p>
	<p><b>Pre-Construction Inspection:</b> OZA Inspections Ltd., under contract to the City of Toronto, will survey all properties within 30 metres of the construction area before construction starts. The inspection will look at the interior and exterior of all properties to verify existing conditions. Although participation is voluntary, the City encourages all homeowners to participate. Without the survey, it will be difficult to confirm any claims of damage caused by construction.</p> <p>Affected properties will receive a separate notice to set up an appointment. All inspection staff will wear photo I.D. and carry photo equipment for this work.</p>

	<p><b>Site Safety:</b> Workers on site are responsible for the work assigned to them. If you have construction questions or an issue on site – ask to be directed to the site inspector. If the site inspector is unavailable, contact the person listed at the end of this notice.</p>
	<p><b>Physical Distancing:</b> There are times when contractors need to communicate with homeowners about what is happening on-site. This could be about driveway access, water shut offs, pre-construction inspections, and site restoration work (landscaping, installing pavers etc.). Contractor's staff will be identifiable by their high-visibility clothing and will maintain physical distancing.</p>
	<p><b>Important information for owners of sprinkler systems / heated driveways and private landscaping features.</b> Property owners should remove items located within City property limits (boulevard) to avoid damage.</p> <p>This includes items such as landscaping (plants and pavers), decorative objects, sprinkler systems or heated driveways. If you have a sprinkler system or heated driveway, please contact the <b>Field Ambassador</b> listed below.</p>
	<p><b>City Owned Trees:</b> The City makes every effort to protect and maintain trees during construction. Due to the nature of this project, the City may have to remove five (5) street trees on Inverness Avenue from the City's boulevard. If this affects a tree near your property, you will receive a separate notice. Compensation will be provided to the City's Parks, Recreation &amp; Forestry Division for every tree proposed to be removed at a 3:1 ratio. The City's Parks, Recreation &amp; Forestry Division will use this compensation to plant trees and other naturalization planting including tree whips and shrubs in a location determined by them, in the future.</p>
	<p><b>Telephone and Internet Services:</b> This work may affect phone and internet cables for individual properties that aren't buried deep below the sidewalk. The contractor will coordinate with utility companies to minimize disruption. Residents who find their service has been disrupted should contact the <b>Field Ambassador</b> <u>and</u> notify their phone or internet service provider.</p>
	<p><b>Water Service Disruptions:</b> From time-to-time, the water supply to your property will be shut-off to complete construction; the contractor will provide notice at least 24-hours in advance. Throughout the work, it is recommended that you temporarily disconnect any water treatment systems (i.e. softeners or filters), water-cooled air conditioners or similar plumbing fixtures. Automatic lawn sprinkler systems may also be affected, therefore, you may need to water manually. In the event you did not receive advance notice, the City may have needed to use an <b>emergency water shut off</b> to complete work.</p>
	<p><b>Substandard Water Service Replacement:</b> Please take the time to read the attached fact sheet carefully as it contains important information on lead in drinking water and how to prepare for replacement. If you want to replace the private portion-of the water service pipe, the City of Toronto recommends that you obtain several quotes before selecting a contractor. <b>PLEASE NOTE:</b> The City is not able to get involved in any contract to have work done on private property. Property owners are responsible for ensuring contractors do not interfere with the work being done on City property. Learn more at <a href="http://www.toronto.ca/leadpipes">www.toronto.ca/leadpipes</a>.</p>
	<p><b>Road and Sidewalk Access:</b> In order to complete the work in a safe manner, there will be road and sidewalk restrictions within the work zone. Access for emergency vehicles will be maintained at all times.</p> <p><b>Driveway Access:</b> The contractor will notify you of any temporary restrictions to your driveway access. If your property has two entrances, one entrance will be kept open at all times.</p>

	<p><b>Traffic Management:</b> Road users should expect delays and increased traffic on nearby streets. Motorists are reminded that bicycles and cars will be sharing the lane. When driving, please be mindful of vulnerable road users. <b>Traffic on Inverness Avenue will be restricted to local traffic only.</b></p>
	<p><b>Parking:</b> This project will affect on-street parking. Parking in the active work zone is not permitted as space is needed for construction equipment and materials. If your parked vehicle affects construction work, it will be relocated with no charge to the owner. Please call 416-808-2222 for its location.</p>
	<p><b>Parking Violation Notice:</b> If parking enforcement is called to a street, officers must issue a yellow parking violation notice (ticket) to vehicles in violation of parking by-laws. If you receive a yellow notice during this construction work, do the following within 15 days of the notice date:</p> <ol style="list-style-type: none"> <li>1) Contact the site inspector or person listed on the Construction Notice and give them the yellow notice number.</li> <li>2) Dispute the parking violation notice online or in person following the process listed on the back of the parking violation notice.</li> </ol> <p><b>You may use this construction notice as part of the explanation of why the violation should be cancelled. Please note:</b> violation notices cannot be cancelled if vehicles are parked in illegal parking spots (i.e. in front of a fire hydrant or in no parking zones).</p> <p>In an effort to reduce ticketing due to construction, please exercise patience with neighbours who are experiencing construction and may need to temporarily park on your street.</p>
	<p><b>Accessible Accommodation:</b> The City's contractor must ensure safe and accessible walkways and entryways are maintained for everyone during construction. Any temporary access disruptions will be communicated as soon as possible. If you experience a disruption, have a specific access need or related accommodation request, contact the <b>Field Ambassador</b> listed below.</p>
	<p><b>Garbage and Recycling:</b> Please follow your normal routine. If required, the contractor will move bins to an appropriate location and return them. <b>Please ensure that you label your bins with your address.</b></p>
	<p><b>Water Flushing:</b> You will see water flushing or running in several areas along this project due to cleaning the new watermain. Before substandard water services are replaced and the new watermain is put into service, the new pipe must meet Toronto Water's servicing and quality standards. <b>Please DO NOT DRINK OR USE THE FLUSHING WATER, it is not potable.</b></p>
	<p><b>Restoration:</b> The construction work area will be restored with sod, concrete and/or asphalt where required. Interlocking bricks, flagstone on a granular base, or other similar features that are removed from public and private property during construction will be replaced. Lawn seeding and/or laying of sod will be done as needed during ideal growing seasons only - April to June and September to October.</p>
