

WHAT IS CLOSE CONTACT IN THE COMMUNITY?

Updated April 1, 2022

CLOSE CONTACT

Having a playdate

Going to an indoor birthday party

Close contact without masks on

Hugging someone while they're contagious

NOT A CLOSE CONTACT

Playing outdoors at a distance

Passing others while keeping a distance

Waving to another person on the street

Dropping off something at someone's house

*The Province of Ontario has stated that attending school/childcare with someone who is symptomatic/positive for COVID-19 may not always be considered close contact. All cases in the school/child care settings are encouraged to notify their close contacts directly if they have significant one-on-one interactions, without wearing a well-fitted, high-quality mask.
