INTRODUCTION

This is an Appeal of the Etobicoke York panel of the City of Toronto (City) Committee of Adjustment's (COA) refusal of an application for variances for the property known as 8 Thirty Seventh St (subject property). The purpose of the application is to construct a new detached dwelling with an attached garage.

The subject property is located in the Long Branch neighbourhood of the former City of Etobicoke. It is designated *Neighbourhoods* in the City Official Plan (OP) and zoned RD (f12.0; a370; d0.35) under Zoning By-law 569-2013.

In attendance at the Hearing were:

- Chris Barnett, legal counsel for the Owner/ Appellant, Expert Witness Eldon Theodore (Land Use Planning) and Brittany Wong (Project Manager);
- Mark Hardiejowski, Adam Ward and Adam Kouri (student), legal counsel for the City of Toronto;
- Christine Mercado and Judy Gibson, representing the Long Branch Neighbourhood Association.

Prior to the Hearing Day, the TLAB was advised that on the basis of the revised plans filed with the TLAB, there was no longer any opposition to the requested variances.

BACKGROUND

The Applicant proposes to demolish the existing detached dwelling and construct a new two-storey single detached dwelling.

REQUESTED VARIANCE(S) TO THE ZONING BY-LAWS:

1. Section 10.20.40.20. (1), By-law 569-2013 - Building Length

The maximum permitted building length is 17 m.

The proposed dwelling will have a maximum building length of 17.68 m.

2. Section 10.20.40.40. (1)(A), By-law 569-2013 – Floor Space Index

The maximum permitted floor space index is 0.35 times the lot area.

The proposed dwelling will have a maximum floor space index of 0.45 times the lot area.

3. Section 10.20.40.10. (2)(A)(i), By-law 569-2013 – Maximum Main Wall Height

The permitted maximum height of all front exterior main walls is 7 m.

The proposed height of the front exterior main walls is 7.49 m.

4. Section 10.20.40.10.(2)(A)(ii), By-law 569-2013 - Maximum Main Wall Height

The maximum permitted height of all rear exterior main walls is 7 m.

The new dwelling will have a rear exterior main wall height of 7.43 m.

5. Section 10.20.40.50.(1)(B), By-law 569-2013 - Platforms

The maximum permitted area of a platform above a second storey is 4 m².

The proposed dwelling will have a second storey platform 5.45 m².

MATTERS IN ISSUE

This Appeal arises from a refusal of variances by the COA. The concerns of the City and the Long Branch Neighbourhood Association having been resolved, the matter at issue is exercise of the TLAB's mandate to establish that any approval of the requested variances satisfies the four tests of s.45(1).

JURISDICTION

Provincial Policy – S. 3

A decision of the Toronto Local Appeal Body ('TLAB') must be consistent with the 2014 Provincial Policy Statement ('PPS') and conform to the Growth Plan for the Greater Golden Horseshoe for the subject area ('Growth Plan').

Variance – S. 45(1)

In considering the applications for variances from the Zoning By-laws, the TLAB Panel must be satisfied that the applications meet all of the four tests under s. 45(1) of the Act. The tests are whether the variances:

- maintain the general intent and purpose of the Official Plan;
- maintain the general intent and purpose of the Zoning By-laws;
- are desirable for the appropriate development or use of the land; and
- are minor.

EVIDENCE

A summary of evidence is presented here for the purpose of providing some context for the following sections of this Decision. All of the evidence and testimony in this matter has been carefully reviewed and the omission of any point of evidence in this summary should not be interpreted to mean that it was not fully considered, but rather that the recitation of it is not material to the threads of reasoning that will be outlined in the *Analysis, Findings, Reasons* section below.

Theodore

Mr. Theodore described the planning context as follows:

- The neighbourhood continues to evolve and change in a healthy way.
- The proposed redevelopment has been designed to be in keeping with existing and emerging dwellings within the Immediate and Broader Context Area in terms of deploying traditional pitched roof style, integrating similar building materials and an overall building massing and orientation that is reflective of emerging dwellings.
- The variances sought are in keeping with the design direction of the Long Branch Character Guidelines.
- The original proposal has been revised multiple times to address City staff and resident concerns.
- Proposed building length, floor space index, front and rear main wall height have all been reduced from the original application.

Long Branch Neighbourhood Association (LBNA)

Ms. Mercado confirmed that the LBNA did not oppose the application. However, she wanted to be sure that the commitment to specific materials was secured. She sought assurances that the proposed garage will have features that will break it up, as shown in the drawings, and that the exterior materials will be brick and wood siding.

ANALYSIS, FINDINGS, REASONS

I accept Mr. Theodore's evidence that the proposal as revised is consistent with the Provincial Policy Statement and conforms to the Growth Plan.

General Intent and Purpose of the Official Plan

Mr. Theodore presented a thorough review of Official Plan policies. OP Policy 4.1.5 c) merits some further discussion in this Decision.

4.1.5 Development in established Neighbourhoods will respect and reinforce the existing physical character of each geographic neighbourhood, including in particular:...

c) prevailing heights, massing, scale, density and dwelling type of nearby residential properties;

- Prevailing Heights, Massing and Scale – Main Wall Height

I note that the proposal does not require a variance for maximum height. The requested variances are for front and rear main wall heights.

Mr. Theodore provided data reflecting previous approvals of height variances in the neighbourhood to support his opinion (Exhibit 3, Tab 32), along with photographic evidence (Exhibit 3, Tabs 4 and 5) of similar heights, massing and scale.

Of the nine approvals for front main wall height variances Mr. Theodore identified in the neighbourhood, all but two are for variances greater than what is requested for this proposal. Two of the variances are within the Immediate context of the subject property. I recognize that the table captures only those variances that have been required and approved within the last ten or so years.

Compliance with the Long Branch Neighbourhood Guidelines has resulted in a front facade that incorporates a porch, a ground related first floor and windows at the first and second storeys, all of which mitigate the imposition that an increased wall height may otherwise have had on the streetscape.

On the basis of the Mr. Theodore's evidence, I find that the proposed variances for front and rear main walls maintain the general intent and purpose of the Official Plan and of the Zoning By-law. I find that the requested variances for front and rear main wall height to be desirable for the development of the land and minor.

- Prevailing Density – Floor Space Index (FSI)

Mr. Theodore provided data reflecting previous approvals of floor space index variances in the neighbourhood. There have been fifty FSI variances granted in approximately the last ten years, seven being in the Immediate Context. I am satisfied that the proposed FSI respects and reinforces the prevailing density in the neighbourhood.

I find the proposed floor space index variance maintains the general intent and purpose of the Official Plan and the Zoning By-law and that it is both desirable for the development of the land and minor.

- Building Length

The table of variance approvals (Exhibit 3, Tab 32) shows that there have been four variances approved for building length in the neighbourhood over the term of data collection. Three of the four variances were granted for building length greater than the proposal.

The subject property's "keyhole" situation (that locates its south side yard contiguous to the rear yards of the properties facing on to Lake Promenade) mitigates any potential impact of the proposed variance of 68cm in building length.

I note that no rear yard setback variance is required.

I find that the proposed variance for building length maintains the general intent and purpose of the Official Plan and of the Zoning By-law. I find that the requested variance for building length to be desirable for the development of the land and minor.

- Area of Platform

The proposed second floor balcony is inset into the southwest corner of the house, mitigating any potential overlook or loss of privacy for neighbouring properties.

I concur with Mr. Theodore that the proposed variance for the area of the second floor balcony meets the four tests of s.45(1).

Conclusion

I find that the proposed variances, individually and cumulatively, meet the four tests as set out in s. 45(1) of the *Planning Act*.

I find that the revisions to the proposal that was submitted to the COA constitute reductions in the magnitude of the requested variances for floor space index, building length and front and rear wall height and I therefore find that no further notice is required under s.45(18.1.1).

To assure the Ms. Mercado (LBNA) that the stipulated exterior materials will be used in the construction of the proposal, counsel for the Applicant agreed to provide the TLAB with revised drawings noting materials to be used. The revised drawings have been submitted and approval of the variances will be conditional on construction in substantial accordance with these provided plans and drawings.

DECISION AND ORDER

The Appeal is allowed, in part. The variances listed in Appendix A are authorized, subject to the conditions contained therein.

X 

A. Bassios
Panel Chair, Toronto Local Appeal Body

APPENDIX A

APPROVED VARIANCES AND CONDITIONS OF VARIANCE APPROVAL:

VARIANCES:

1. Section 10.20.40.20. (1), By-law 569-2013 - Building Length

The maximum permitted building length is 17 m.

The proposed dwelling will have a maximum building length of 17.68 m.

2. Section 10.20.40.40. (1)(A), By-law 569-2013 – Floor Space Index

The maximum permitted floor space index is 0.35 times the lot area.

The proposed dwelling will have a maximum floor space index of 0.45 times the lot area.

3. Section 10.20.40.10. (2)(A)(i), By-law 569-2013 – Maximum Main Wall Height

The permitted maximum height of all front exterior main walls is 7 m.

The proposed height of the front exterior main walls is 7.49 m.

4. Section 10.20.40.10.(2)(A)(ii), By-law 569-2013 - Maximum Main Wall Height

The maximum permitted height of all rear exterior main walls is 7 m.

The new dwelling will have a rear exterior main wall height of 7.43 m.

5. Section 10.20.40.50.(1)(B), By-law 569-2013 - Platforms

The maximum permitted area of a platform above a second storey is 4 m².

The proposed dwelling will have a second storey platform 5.45 m².

CONDITIONS:

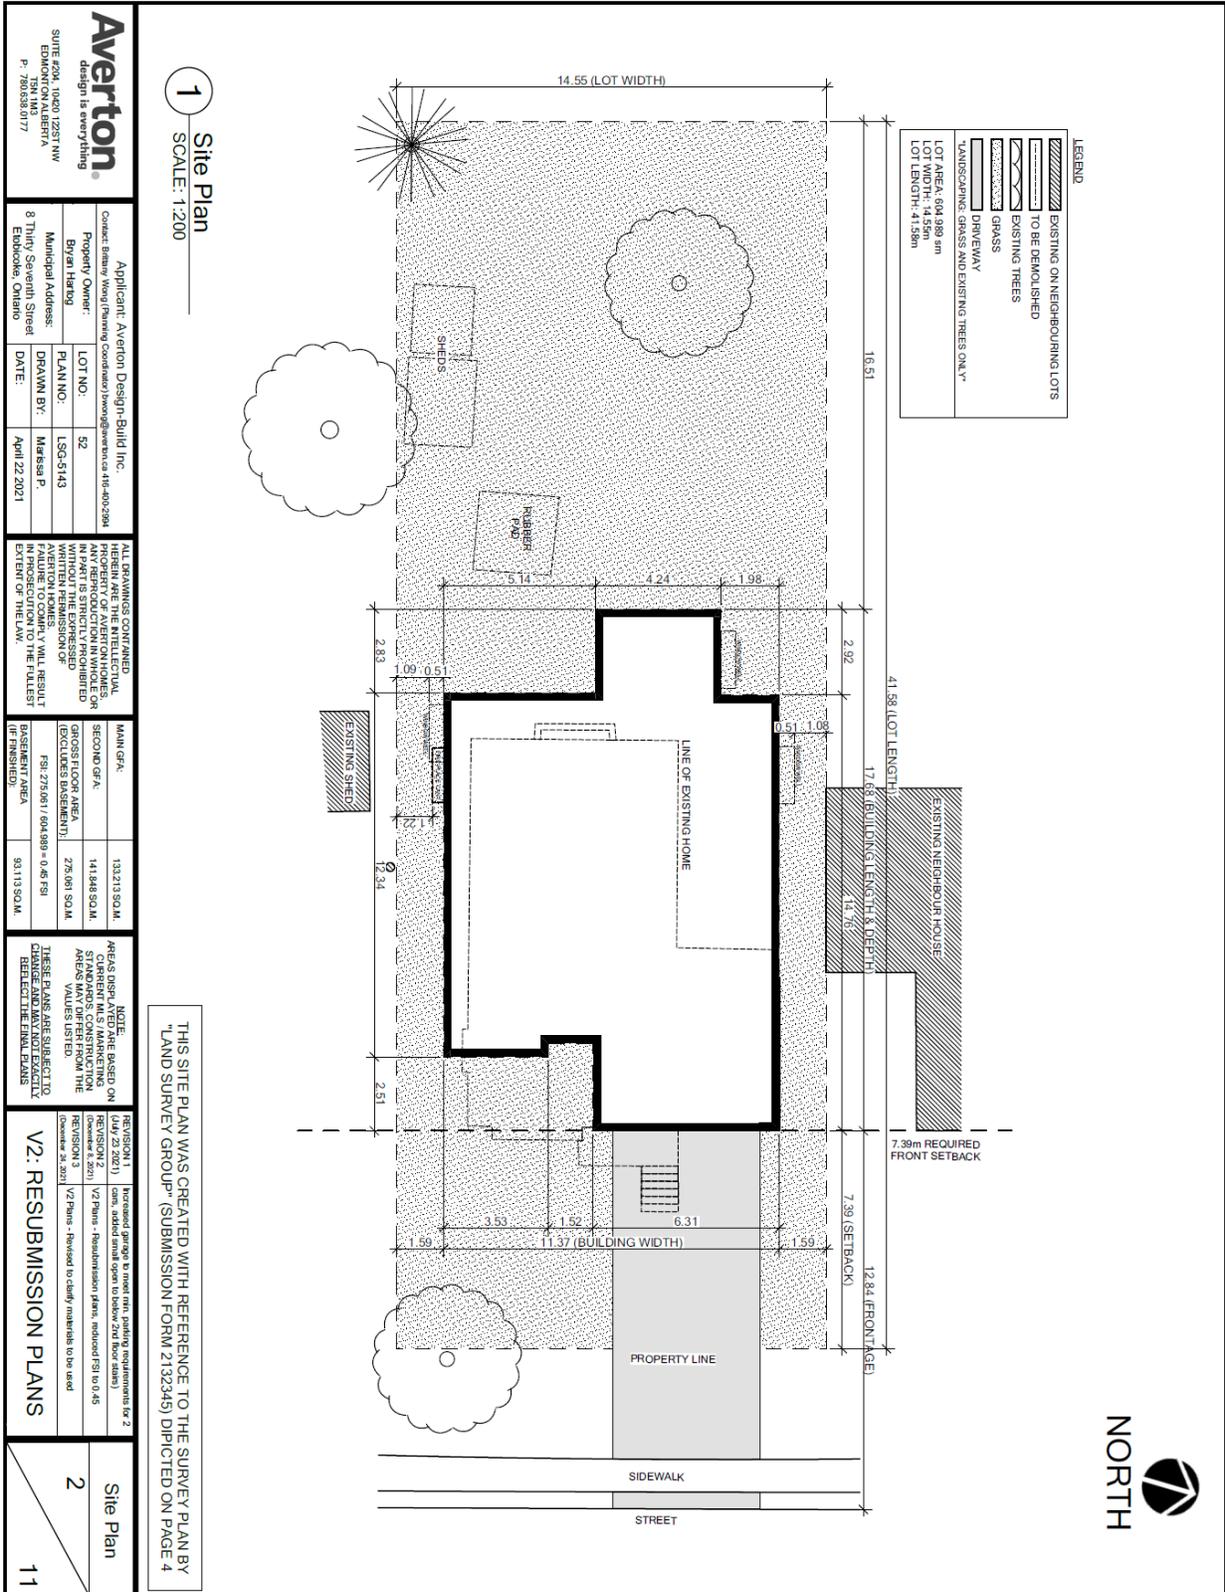

1. The proposed dwelling shall be constructed substantially in accordance with the following plans and drawings, including the materials noted, as prepared by Averton, labelled “V2 Plans – Revised to clarify materials to be used”, and attached hereto.

- Site Plan (2/11)
- East Elevation (4/11)
- North Elevation (5/11)
- South Elevation (6/11)
- West Elevation (7/11)
- Section (11/11)

2. Prior to the issuance of a building permit, the applicant/owner shall submit a complete application for permit to injure or remove privately owned tree(s) under Municipal Code Chapter 813, Trees Article III, Private Tree Protection, to the satisfaction of the Supervisor, Urban Forestry, Tree Protection and Plan Review, Toronto and East York District.

Any other variances that may appear on these plans that are not listed in this decision are NOT authorized
