

# COVID-19 VACCINES FOR CHILDREN AGED 5-11 YEARS OLD

1<sup>st</sup> & 2<sup>nd</sup> dose

It's recommended to get it 8 weeks between doses for a better immune response

Booster dose

Only 1 booster is needed at 6 months after a 2<sup>nd</sup> COVID-19 dose or past infection

Vaccination is safe & effective

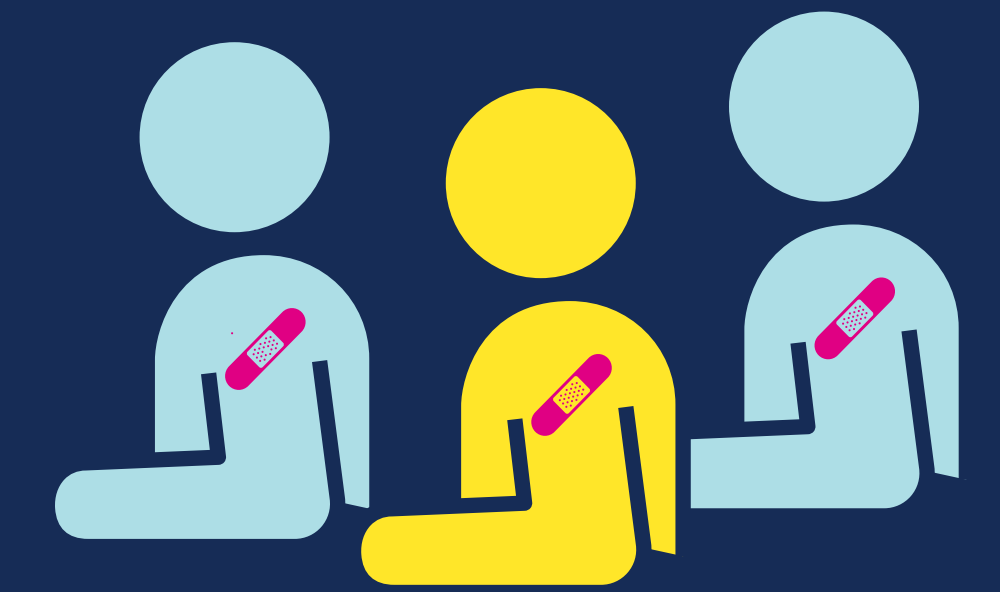

Millions of vaccine doses have been given to children in Canada

Walk-ins & appointments at city clinics welcome

Book at [Toronto.ca/COVID19](https://toronto.ca/COVID19) or call 1-833-943-3900

Protect

Even if a child recently had COVID-19, staying up to date with COVID-19 vaccinations will provide the best protection
