Fact Sheet: Monkeypox - Reference guide comparing monkeypox, chickenpox, and hand-foot-and-mouth disease

Category	Monkeypox	Chickenpox	Hand-Foot-and-Mouth Disease
Virus	Monkeypox virus ¹	Varicella zoster virus (VZV)²	<i>Enteroviruses</i> (e.g. Coxsackievirus A16, Enterovirus 71) ³
Incubation period	5-21 days ¹	10-21 days, but can be up to 28 days in breakthroughª infections²	3-7 days³
Fever	May occur ^ь , most commonly 1-3 days before rash onset ^{1,4}	<i>Unvaccinated:</i> Mild if present, 1-2 days before rash ² <i>Breakthrough</i> : Less common ²	1-2 days before oral vesicles⁵
Lymphadenopathy	May occur ¹	Less common ¹	Less common ³

^a Breakthrough varicella is an infection that occurs in a varicella vaccinated person more than 42 days after varicella vaccination.

^b Atypical presentations of monkeypox include initial signs of a genital or peri-anal rash prior to or without prodromal symptoms which may not spread to other parts of the body, and having lesions at different stages of development.⁴,¹⁰

Category	Monkeypox	Chickenpox	Hand-Foot-and-Mouth Disease
Rash appearance	 Appears at the site of inoculation^b, then may appear on other parts of the body, including¹: oral mucosa, genital area, conjunctiva, palms of the hands, and soles of the feet 	Usually appears on the chest, back, and face then spreads to other parts of the body ⁶ Rarely, lesions may appear on palms of the hands and soles of the feet in immunocompromised individuals ⁷	Usually, vesicles appear in or on the mouth, then may appear on other parts of the body, including ³ • palms of the hands, • soles of the feet, • knees, • elbows, • buttocks, or • genital area
Rash progression	Slowly progresses through macules, papules, vesicles, pustules, and crusting/scab. May have central umbilication ^{4,8} Lesions may develop simultaneously and evolve together ^b on any given part of the body (i.e., monomorphic) ⁸	<i>Unvaccinated:</i> Pleomorphic rash; Rapidly progresses through macules, papules, vesicles, and crusting/scab ² <i>Breakthrough</i> : Usually, maculo- papular lesions that do not progress to vesicles ² Lesions occur in "crops" with old and new lesions present at the same time ²	Macules, sometimes with vesicles ⁹ Vesicles may break open and progress to crusting/scab ⁹
Rash duration	14-28 days ¹	Unvaccinated : 4-7 days ⁶	7-10 days³
		<i>Breakthrough:</i> Shorter duration of illness compared to unvaccinated ⁶
